

PORTFOLIO ANALYSIS & CONSULTING

# Observations on Five Institutional Investing Trends

By Mark Cintolo, CFA®, CAIA®, VP, Portfolio Consultant

Natixis Investment Mangers Solutions portfolio consultants monitor asset classes, investment products and market activity both in real time and from a historical perspective. See which institutional investing trends impacted asset allocation decisions in the second half of 2022.

## #1 Pension funded status diverges

In a challenging return environment, public funds saw funded status dip from 85.5% at 12/31/2021 to 72.8% at 12/31/2022. Conversely, corporate plans achieved gains, rising from 97.9% to 110.0%, as higher interest rates drove down liability values.

## BUILDING BETTER PORTFOLIOS

Since 2012, Natixis Investment Managers Solutions has evaluated more than 15,000 model portfolios for wealth managers and institutions. Our experienced consultants, many with credentials including CFA®, CAIA®, and CFP®, provide detailed analysis and interpretation that can lead to better portfolio construction.

## #2 Expected returns higher, but public funds hold off increasing assumptions

Many components of future return expectations – equity earnings yields, government bond yields, credit spreads – are elevated compared to those in recent history. But this has not yet led to meaningful increases in investment return assumptions among public funds. Higher assumptions typically lead to higher funded status estimates and lower required contributions. Given significant momentum in recent years toward reducing assumptions, the investment environment could provide plans with some breathing room to either keep assumptions flat or move them higher.

### Future Returns – Building Blocks

### Average ROA of Public Plans

## #3 Three steps back

US foundations saw asset levels decline to \$1.057 trillion, erasing three years of gains. The average foundation lost 15.5% from market returns plus another 3.4% due to the difference in cash flows among grants, expenses, and new contributions.

### Foundation Assets

#### #4 All-to-all trading for institutions?

The US Treasury market has seen liquidity erode in recent years, most notably in March 2020, but bid/ask spreads remained somewhat elevated throughout 2022. To help address this, some have called for broader “all-to-all” trading, where a larger, more diversified group of potential counterparties, including asset managers and institutions, could exchange Treasury bonds without settling through a clearinghouse. This could provide greater price transparency and improved liquidity in times of stress.

#### #5 Troubled union plans look to high-quality fixed income with SFA relief

The first round of multi-employer union pension plans eligible for federal assistance under the March 2021 American Rescue Plan Act began receiving funds in 2022. Per final guidance issued in July 2022, 67% of all relief funds are required to be invested in high-quality, investment grade fixed income, with the remaining 33% invested in return-seeking assets. Through 12/30/2022, \$45.6 billion had been awarded to 56 plans, covering over 600,000 participants. Many eligible plans will not be able to apply for relief until March 11, 2023. The Pension Benefit Guaranty Corporation (PBGC) estimated the final cost of the program to be \$94 billion, covering over 200 plans.

There can be no assurance that developments will transpire as forecasted, and actual results will be different. Data and analysis do not represent the actual or expected future performance of any investment product. We believe the information, including that obtained from outside resources, to be correct, but we cannot guarantee its accuracy. The information is subject to change at any time without notice.

The data contained herein is the result of analysis conducted by the Natixis Investment Managers Solutions consulting team on model portfolios submitted by Investment Professionals. The Moderate Peer Group consists of model portfolios that have been analyzed by the consulting team and have been designated as moderate by Investment Professionals.

Natixis Investment Managers Solutions collects portfolio data and aggregates that data in accordance with the peer group portfolio category that is assigned to an individual portfolio by the Investment Professionals. At such time that a Professional requests a report, the Professional will categorize the portfolios as a portfolio belonging to one of the following categories: Aggressive, Moderately Aggressive, Moderate, Moderately Conservative, or Conservative. The categorization of individual portfolios is not determined by Natixis Investment Managers Solutions as its role is solely as an aggregator of the precategorized portfolios. Please note that risk attributes of the Moderate Peer Group will change over time due to movements in the capital markets. Portfolio allocations provided to Natixis Investment Managers Solutions are static in nature and subsequent changes in a Professional's portfolio allocations may not be reflected in the current Moderate Peer Group data.

Investing involves risk, including the risk of loss. Investment risk exists with equity, fixed income, international and emerging markets. Additionally, alternative investments, including managed futures, can involve a higher degree of risk and may not be suitable for all investors. There is no assurance that any investment will meet its performance objectives or that losses will be avoided.

Natixis Investment Managers, Global Survey of Institutional Investors, conducted by CoreData Research in October and November 2023. Survey included 500 institutional investors in 27 countries throughout North America, Latin America, the United Kingdom, Continental Europe, Asia and the Middle East.
