Series U was closed to new investments on May 9, 2017.

Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus before investing. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated. Mutual fund securities are not covered by the Canada Deposit Insurance Corporation or by any other government deposit insurer.

The payment of distributions for Dividend class and the Return of Capital class should not be confused with a mutual fund's performance, rate of return or yield. If distributions paid by a mutual fund are greater than the performance of the fund, then your investment will decline. Distributions paid as a result of capital gains realized by a mutual fund and income and dividends earned by a fund are taxable in your hands in the year they are paid. For Return of Capital class, your adjusted cost base will be reduced by the amount of any returns of capital. If your adjusted cost base goes below zero, then you will have to pay capital gains tax on the amount below zero.

Tax liabilities on investment income and capital gains earned by a mutual fund cannot be mitigated nor can they be fully managed in all circumstances. Therefore, a mutual fund may be required to make taxable distributions to investors in a Tax Class for which a distribution or type of distribution is not optimal or in accordance with their tax preference.
