Appendix

1. Creation of a new equity sub-fund

The Board has decided to create a new equity Sub-Fund named Mirova US Sustainable Equity Fund*.

**This sub-fund is not registered in Norway.*

2. Creation of new category of share classes in the Mirova Global Sustainable Equity Fund

In order to support the commercial development of Mirova Global Sustainable Equity Fund, the Board has decided to introduce a new category of share classes, entitled P NPF** which are reserved for investors whose subscriptions are subject to the Singapore Central Provident Fund (Investment Schemes) Regulations ("CPFIS Regulations"), as may be amended from time to time by the Singapore Central Provident Fund Board (the "CPF Board"), and are made using CPF monies. These shares classes are designed to comply with certain restrictions as may be issued from time to time by the CPF Board in accordance with applicable CPFIS Regulations. However, the Management Company reserves the right to designate other types of investors that may be eligible to subscribe for these shares classes, as may be required and/or permitted from time to time under applicable laws, rules and regulations.

The new category of share classes P NPF** has the following characteristics:

Category of Share Classes	Management Fee	Administration Fee	All-In Fee	Maximum Sales Charge	Maximum Redemption Charge	Minimum Initial Investment	Minimum Holding
P NPF**	1.50% p.a.	0.20% p.a.	1.70% p.a.	None	None	None	None

There is no performance fee.

***This share class is not registered in Norway.*

3. Creation of a new type of currency hedging policy in the SICAV

In order to support the commercial development of Mirova Global Sustainable Equity Fund, the Board has decided to introduce **a new type of currency hedging policy**, the BRL hedging.

The BRL hedged Share Classes are intended for master-feeder structures established in Brazil only. A feeder fund is a collective investment scheme that invests all or nearly all of its assets in another single fund (sometimes referred to as a master fund). BRL hedged Share Classes are available at the Management Company's discretion. BRL hedged Share Classes aim to provide investors with currency exposure to BRL without using a hedged share class denominated in BRL (i.e. due to currency trading restrictions on BRL). The currency of a BRL hedged Share Class will be the currency of the relevant Share Class. BRL currency exposure will be sought by converting the Net Asset Value of the BRL hedged Share Class into BRL using financial derivative instruments (including non-deliverable forwards). The Net Asset Value of such BRL hedged Share Class will remain denominated in the relevant Share Class currency (and the Net Asset Value per Share will be calculated in such currency), however, due to the additional financial derivative instrument exposure, such Net Asset Value is expected to fluctuate in line with the fluctuation of the exchange rate between BRL and such share class currency. This fluctuation will be reflected in the performance of the relevant BRL hedged Share Class, and therefore the performance of such BRL hedged Share Class may differ significantly from the performance of the other Share Classes of the relevant Sub-Fund.

BRL hedged Share Classes are identified with the addition of the letters "(H-BRL)" after the name of share class category e.g. I(H-BRL)/A(USD)**."

***This share class is not registered in Norway.*

Class EI Shares are reserved for the Sub-Fund's early investors and will be closed to new subscriptions and switches upon the occurrence of certain events set at the discretion of the Management Company, such as, but not limited to: (i) the end of a stipulated period of time or (ii) a maximum level subscription in the relevant Share Class.
