(†) Registered investment companies are required to value portfolio investments using an unadjusted, readily available market quotation. The Fund obtains readily available market quotations from independent pricing services. Fund investments for which readily available market quotations are not available are priced at fair value pursuant to the Fund's Valuation Procedures. The Board of Trustees has approved a valuation designee who is subject to the Board's oversight.

Unadjusted readily available market quotations that are utilized for exchange traded equity securities (including shares of closed-end investment companies and exchange-traded funds) include the last sale price quoted on the exchange where the security is traded most extensively. Futures contracts are valued at the closing settlement price on the exchange on which the valuation designee believes that, over time, they are traded most extensively. Shares of open-end investment companies are valued at net asset value ("NAV") per share.

Exchange traded equity securities for which there is no reported sale during the day are fair valued at the closing bid quotation as reported by an independent pricing service. Unlisted equity securities (except unlisted preferred equity securities) are fair valued at the last sale price quoted in the market where they are traded most extensively or, if there is no reported sale during the day, the closing bid quotation as reported by an independent pricing service. If there is no last sale price or closing bid quotation available, unlisted equity securities will be fair valued using evaluated bids furnished by an independent pricing service, if available.

Debt securities and unlisted preferred equity securities are fair valued based on evaluated bids furnished to the Fund by an independent pricing service or bid prices obtained from broker-dealers. Broker-dealer bid prices may be used to fair value debt and unlisted equities where an independent pricing service is unable to price an investment or where an independent pricing service does not provide a reliable price for the investment. Forward foreign currency contracts are fair valued utilizing interpolated rates determined based on information provided by an independent pricing service.

The Fund may also fair value investments in other circumstances such as when extraordinary events occur after the close of a foreign market, but prior to the close of the New York Stock Exchange. This may include situations relating to a single issuer (such as a declaration of bankruptcy or a delisting of the issuer's security from the primary market on which it has traded) as well as events affecting the securities markets in general (such as market disruptions or closings and significant fluctuations in U.S. and/or foreign markets). When fair valuing a Fund's investments, the valuation designee may, among other things, use modeling tools or other processes that may take into account factors such as issuer specific information, or other related market activity and/or information that occurred after the close of the foreign market but before the time the Fund's NAV is calculated. Fair valuation by the Fund's valuation designee may require subjective determinations about the value of the investment, and fair values used to determine a Fund's NAV may differ from quoted or published prices, or from prices that are used by others, for the same investments. In addition, the use of fair value pricing may not always result in adjustments to the prices of investments held by a Fund.

The books and records of the Fund are maintained in U.S. dollars. The values of securities, currencies and other assets and liabilities denominated in currencies other than U.S. dollars, if any, are translated into U.S. dollars based upon foreign exchange rates prevailing at the end of the period.

- (‡) Principal Amount stated in U.S. dollars unless otherwise noted.
- (a) All or a portion of these securities are exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers. At December 31, 2023, the value of Rule 144A holdings amounted to \$52,145,039 or 12.3% of net assets.
- (b) Amount shown represents units. One unit represents a principal amount of 1,000.
- (c) Interest rate represents annualized yield at time of purchase; not a coupon rate. The Fund's investment in this security is comprised of various lots with differing annualized yields.
- (d) Interest rate represents annualized yield at time of purchase; not a coupon rate.
- (e) Amount shown represents units. One unit represents a principal amount of 100.
- (f) Variable rate security. Rate as of December 31, 2023 is disclosed. Issuers comprised of various lots with differing coupon rates have been aggregated for the purpose of presentation in the Portfolio of Investments and show a weighted average rate. Certain variable rate securities are not based on a published reference rate and spread, rather are determined by the issuer or agent and are based on current market conditions. These securities may not indicate a reference rate and/or spread in their description.
- (g) Security (or a portion thereof) has been pledged as collateral for open derivative contracts.
- (h) Treasury Inflation Protected Security (TIPS).
- (i) The Fund may enter into repurchase agreements, under the terms of a Master Repurchase Agreement, under which the Fund acquires securities as collateral and agrees to resell the securities at an agreed upon time and at an agreed upon price. It is the Fund's policy that the market value of the collateral for repurchase agreements be at least equal to 102% of the repurchase price, including interest. Certain repurchase agreements are triparty arrangements whereby the collateral is held in a segregated account for the benefit of the Fund and on behalf of the counterparty. Repurchase agreements could involve certain risks in the event of default or insolvency of the counterparty, including possible delays or restrictions upon the Fund's ability to dispose of the underlying securities. As of December 31, 2023, the Fund had an investment in a repurchase agreement for which the value of the related collateral exceeded the value of the repurchase agreement.

Forward Foreign Currency Contracts

The Fund may enter into forward foreign currency contracts, including forward foreign cross currency contracts, to acquire exposure to foreign currencies or to hedge the Fund's investments against currency fluctuation. A contract can also be used to offset a previous contract. These contracts involve market risk in excess of the unrealized appreciation (depreciation). The U.S. dollar value of the currencies the Fund has committed to buy or sell represents the aggregate exposure to each currency the Fund has acquired or hedged through currency contracts outstanding at period end. Gains or losses are recorded for financial statement purposes as unrealized until settlement date. Contracts are traded over-the-counter directly with a counterparty. Risks may arise upon entering into these contracts from the potential inability of counterparties to meet the terms of their contracts and from unanticipated movements in the value of a foreign currency relative to the U.S. dollar. Certain contracts may require the movement of cash and/or securities as collateral for the Fund's or counterparty's net obligations under the contracts.

At December 31, 2023, the Fund had the following open forward foreign currency contracts:

Counterparty	Delivery Date	Curren Bougi Sold (B	ht/	Units of Currency	In Exchange for	Notional Value	Unrealized Appreciation (Depreciation)

At December 31, 2023, the Fund had the following open forward cross currency contracts:

Counterparty	Settlement Date		Deliver/Units of Currency		Receive/Units of Currency		Unrealized Appreciation (Depreciation)	
HSBC Bank USA N.A.	3/20/2024	NOK	32,724,000	EUR	2,787,574	\$3,086,804	\$(139,575)	
UBS AG	3/20/2024	ZAR	24,015,000	EUR	1,159,676	1,284,161	(19,927)	
Total							\$(164,632)	

Futures Contracts

The Fund may enter into futures contracts. Futures contracts are agreements between two parties to buy and sell a particular instrument or index for a specified price on a specified future date.

When the Fund enters into a futures contract, it is required to deposit with (or for the benefit of) its broker an amount of cash or short-term high-quality securities as "initial margin." As the value of the contract changes, the value of the futures contract position increases or declines. Subsequent payments, known as "variation margin," are made or received by the Fund, depending on the price fluctuations in the fair value of the contract and the value of cash or securities on deposit with the broker. Realized gain or loss on a futures position is equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed, minus brokerage commissions. When the Fund enters into a futures contract certain risks may arise, such as illiquidity in the futures market, which may limit the Fund's ability to close out a futures contract prior to settlement date, and unanticipated movements in the value of securities or interest rates.

Futures contracts are exchange-traded. Exchange-traded futures contracts are standardized and are settled through a clearing house with fulfillment supported by the credit of the exchange. Therefore, counterparty credit risks to the Fund are reduced; however, in the event that a counterparty enters into bankruptcy, the Fund's claim against initial/variation margin on deposit with the counterparty may be subject to terms of a final settlement in bankruptcy court.

At December 31, 2023, open long futures contracts were as follows:

Financial Futures	Expiration Date	Contracts	Notional Amount	Value	Unrealized Appreciation (Depreciation)
CBOT 10 Year U.S. Treasury Notes Futures	3/19/2024	23	\$ 2,521,061	\$ 2,596,484	\$ 75,423
CBOT 2 Year U.S. Treasury Notes Futures	3/28/2024	94	19,186,105	19,355,922	169,817

Fair Value Measurements.

In accordance with accounting standards related to fair value measurements and disclosures, the Fund has categorized the inputs utilized in determining the value of each Fund's assets or liabilities. These inputs are summarized in the three broad levels listed below:

- Level 1 quoted prices in active markets for identical assets or liabilities;
- Level 2 prices determined using other significant inputs that are observable either directly, or indirectly through corroboration with observable market data (which could include quoted prices for similar assets or liabilities, interest rates, credit risk, etc.); and
- Level 3 prices determined using significant unobservable inputs when quoted prices or observable inputs are unavailable such as when there is little or no market activity for an asset or liability (unobservable inputs reflect each Fund's own assumptions in determining the fair value of assets or liabilities and would be based on the best information available).

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The Fund's pricing policies have been approved by the Board of Trustees. Investments for which market quotations are readily available are categorized in Level 1. Other investments for which an independent pricing service is utilized are categorized in Level 2. Broker-dealer bid prices for which the Fund has knowledge of the inputs used by the broker-dealer are categorized in Level 2. All other investments, including broker-dealer bid prices for which the Fund does not have knowledge of the inputs used by the broker-dealer, as well as investments fair valued by the valuation designee, are categorized in Level 3. All Level 2 and 3 securities are defined as being fair valued.

Under certain conditions and based upon specific facts and circumstances, the Fund's valuation designee may determine that a fair valuation should be made for portfolio investment(s). These valuation designee fair valuations will be based upon a significant amount of Level 3 inputs.

The following is a summary of the inputs used to value the Fund's investments as of December 31, 2023, at value:

Asset Valuation Inputs

Description	Level 1	Level 2	Level 3	Total
Bonds and Notes(a)	\$ —	\$ 410,941,983	\$—	\$ 410,941,983
Short-Term Investments	—	3,748,454	_	3,748,454
Total Investments		414,690,437		414,690,437
Forward Foreign Currency Contracts (unrealized appreciation)		914,564		914,564
Futures Contracts (unrealized appreciation)	1,007,830	_		1,007,830
Total	\$ 1,007,830	\$ 415,605,001	\$—	\$ 416,612,831

Liability Valuation Inputs

Description	Level 1	Level 2	Level 3	Total
Forward Foreign Currency Contracts (unrealized depreciation)	\$ —	\$ (1,173,921)	\$—	\$ (1,173,921)
Futures Contracts (unrealized depreciation)	(792,231)			(792,231)
Total	\$ (792,231)	\$ (1,173,921)	\$—	\$ (1,966,152)

(a) Details of the major categories of the Fund's investments are reflected within the Portfolio of Investments.

Derivatives

Derivative instruments are defined as financial instruments whose value and performance are based on the value and performance of an underlying asset, reference rate or index. Derivative instruments that the Fund used at period end include forward foreign currency contracts and futures contracts.

The Fund is subject to the risk that changes in foreign currency exchange rates will have an unfavorable effect on the value of Fund assets denominated in foreign currencies. The Fund may enter into forward foreign currency exchange contracts for hedging purposes to protect the value of the Fund's holdings of foreign securities. The Fund may also use forward foreign currency contracts to gain exposure to foreign currencies, regardless of whether securities denominated in such currencies are held in the Fund. As of December 31, 2023, the Fund engaged in forward foreign currency contracts for hedging purposes to gain exposure to foreign currencies.

The Fund is subject to the risk that changes in interest rates will affect the value of the Fund's investments in fixed-income securities. The Fund will be subject to increased interest rate risk to the extent that it invests in fixed-income securities with longer maturities or durations, as compared to investing in fixed-income securities with shorter maturities or durations. The Fund may use futures contracts to hedge against changes in interest rates and to manage duration without having to buy or sell portfolio securities. The Fund may also use futures contracts to gain investment exposure. As of December 31, 2023, the Fund used futures contracts to manage duration.

The following is a summary of derivative instruments for the Fund, as of December 31, 2023:

Assets	Unrealized appreciation on forward foreign currency contracts	Unrealized appreciation on futures contracts	Total
Over-the-counter asset derivatives Foreign exchange contracts Exchange-traded asset derivatives	\$ 914,564	\$ —	\$ 914,564
Interest rate contracts Total asset derivatives	\$ 914,564	1,007,830 \$ 1,007,830	1,007,830 \$ 1,922,394
Liabilities	Unrealized depreciation on forward foreign currency contracts	Unrealized depreciation on futures contracts	Total
Over-the-counter liability derivatives Foreign exchange contracts	\$ (1,173,921)	\$ —	\$ (1,173,921)

Liabilities	Unrealized depreciation on forward foreign currency contracts	Unrealized depreciation on futures contracts	Total
Exchange-traded liability derivatives Interest rate contracts Total liability derivatives	\$ \$ (1,173,921)	\$ (792,231) \$ (792,231)	\$ (792,231) \$ (1,966,152)

The Fund's derivatives do not qualify for hedge accounting under authoritative guidance for derivative instruments. The Fund's investments in derivatives may represent an economic hedge; however, they are considered to be non-hedge transactions for the purpose of this disclosure.

Over-the-counter derivatives, including forward foreign currency contracts, are entered into pursuant to International Swaps and Derivatives Association, Inc. ("ISDA") agreements negotiated between the Fund and its counterparties. ISDA agreements typically contain, among other things, terms for the posting of collateral and master netting provisions in the event of a default or other termination event. Collateral is posted by the Fund or the counterparty to the extent of the net mark-to-market exposure to the other party of all open contracts under the agreement, subject to minimum transfer requirements. Master netting provisions allow the Fund and the counterparty, in the event of a default or other termination event, to offset amounts owed by each related to derivative contracts, including any posted collateral, to one net amount payable by either the Fund or the counterparty. The Fund's ISDA agreements typically contain provisions that allow a counterparty to terminate open contracts early if the NAV of the Fund declines beyond a certain threshold. As of December 31, 2023, the fair value of derivative positions subject to these provisions that are in a net liability position by counterparty, and the value of collateral pledged to counterparties for such contracts is as follows:

Counterparty:	Derivatives	Collateral Pledged
Bank of America N.A.	\$(148,590)	\$ —
Barclays Bank PLC	(20,499)	—
BNP Paribas SA	(124,189)	300,000
Citibank N.A.	(267,345)	190,000
Goldman Sachs Bank USA	(65,821)	_
HSBC Bank USA N.A.	(139,575)	—
Standard Chartered Bank	(92,222)	_
UBS AG	(195,483)	150,000

Counterparty risk is managed based on policies and procedures established by the Fund's adviser. Such policies and procedures may include, but are not limited to, minimum counterparty credit rating requirements, monitoring of counterparty credit default swap spreads and posting of collateral. A Fund's risk of loss from counterparty credit risk on over-the-counter derivatives is generally limited to the Fund's aggregated unrealized gains and the amount of any collateral pledged to the counterparty, which may be offset by any collateral posted to the Fund by the counterparty. ISDA master agreements can help to manage counterparty risk by specifying collateral posting arrangements at pre-arranged exposure levels. Under these ISDA agreements, collateral is routinely transferred if the total net exposure in respect of certain transactions, net of existing collateral already in place, exceeds a specified amount. With exchange-traded derivatives, there is minimal counterparty credit risk still exists in exchange-traded derivatives with respect to initial and variation margin that is held in a broker's customer accounts. While brokers typically are required to segregate customer margin for exchange-traded derivatives from their own assets, in the event that a broker becomes insolvent or goes into bankruptcy and at that time there is a shortfall in the aggregate amount of margin held by the broker for all its customers, U.S. bankruptcy laws will typically allocate that shortfall on a pro rata basis across all of the broker's customers, potentially resulting in losses to the Fund.
