

Loomis Sayles Strategic Income Fund

Q1 • March 31, 2019

Fund Highlights

- A multisector bond fund with the flexibility to pursue opportunities globally, where managers find value
- Focuses on total return, investing in issuers using bottom-up process
- Run by a seasoned team, with over 35 years on average of industry experience
- May invest up to 35% of its assets in preferred stocks and dividend-paying common stocks
- Backed by Loomis Sayles research
- Has generally outpaced bond market (Bloomberg Barclays U.S. Aggregate Bond Index) since inception

Average annualized total returns[†] (%)

Investment return – Hypothetical growth of \$10,000 investment³

Performance data shown represents past performance and is no guarantee of, and not necessarily indicative of, future results. Total return and value will vary, and you may have a gain or loss when shares are sold. Current performance may be lower or higher than quoted. For most recent month-end performance, visit im.natixis.com. Performance for other share classes will be greater or less than shown based on differences in fees and sales charges. You may not invest directly in an index. [†]Performance for periods less than one year is cumulative, not annualized. Returns reflect changes in share price and reinvestment of dividends and capital gains, if any.

1 Unsubsidized 30-day SEC yield is calculated using the gross expenses of the fund. Gross expenses do not include any fee waivers or reimbursement. 2 As of the most recent prospectus, the investment advisor has contractually agreed to waive fees and/or reimburse expenses (with certain exceptions) once the expense cap of the fund has been exceeded. This arrangement is set to expire on 01/31/2020. When an expense cap has not been exceeded, the gross and net expense ratios and/or yields may be the same. 3 This chart tracks the hypothetical growth of a \$10,000 investment in Class Y shares. Investment returns would be lower for Class A share investments, which are subject to higher fees and may also include sales charges.

Not all share classes are available for purchase by all investors. Class Y shares are available to institutional investors with a minimum initial investment of \$100,000 and through certain wrap-fee programs, retirement plans and investment advisory accounts with no minimum. See the prospectus for more details.

For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating[™] used to rank the fund against other funds in the same category. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly excess performance, without any adjustments for loads (frontend, deferred, or redemption fees), placing more emphasis on downward variations and rewarding consistent performance. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star (each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages). Past performance is no guarantee of future results. ©2019 Morningstar, Inc. All Rights Reserved. Risks

Fixed income securities may carry one or more of the following risks: credit, interest rate (as interest rates rise bond prices usually fall), inflation and liquidity. Below investment grade fixed income securities may be subject to greater risks (including the risk of default) than other fixed income securities. Foreign and emerging market securities may be subject to greater political, economic, environmental, credit, currency and information risks. Foreign securities may be subject to higher volatility than US securities, due to varying degrees of regulation and limited liquidity. These risks are magnified in emerging markets. Currency exchange rates between the US dollar and foreign currencies may cause the value of the Fund's investments to decline. Equity securities are volatile and can decline significantly in response to broad market and economic conditions.

4 The Bloomberg Barclays U.S. Aggregate Bond Index is an unmanaged index that covers the U.S.-dollar-denominated, investment-grade, fixed-rate, taxable bond market of SEC-registered securities. The index includes bonds from the Treasury, government-related, corporate, mortgage-backed securities, asset-backed securities, and collateralized mortgage-backed securities sectors. 5 Bloomberg Barclays U.S. Universal Bond Index represents the union of the U.S. Aggregate Index, the U.S. High-Yield Corporate Index, the 144A Index, the Eurodollar Index, the Emerging Markets Index, and the non-ERISA portion of the CMBS Index. Municipal debt, private placements, and non-dollar-denominated issues are excluded from Barclays U.S. Universal Bond Index. The only constituent of the index that includes floating-rate debt is the Emerging Markets Index. 6 Credit Quality is ranked highest to lowest. Credit quality reflects the highest credit rating assigned to individual holdings of the fund among Moody's, S&P or Fitch; ratings are subject to change. The fund's shares are not rated by any rating agency and no credit rating for fund shares is implied. 7 Cash and equivalents are excluded from the duration and maturity presented. Accordingly, the total may not equal 100%. 8 Assets under management ("AUM"), as reported, may include notional assets, assets serviced, gross assets and other types of non-regulatory AUM. 9 CFA® and Chartered Financial Analyst® are registered trademarks owned by the CFA Institute.

Before investing, consider the fund's investment objectives, risks, charges, and expenses. Visit im.natixis.com or call 800-225-5478 for a prospectus or a summary prospectus containing this and other information. Read it carefully.
