As Chairperson of the Board, Mr. Drucker is an *ex officio* member of each Committee.
Effective January 1, 2020, the second paragraph in the sub-section “Trustee Fees” within the section “Management of the Trust(s)” in the Statements of Additional Information is hereby replaced with the following:

The Chairperson of the Board receives a retainer fee at the annual rate of $369,000. The Chairperson does not receive any meeting attendance fees for Board of Trustees meetings or committee meetings that he attends. Each Trustee who is not an employee, officer or director of Natixis Advisors, the Distributor or their affiliates (other than the Chairperson) receives, in the aggregate, a retainer fee at the annual rate of $199,000. Each Trustee who is not an employee, officer or director of Natixis Advisors, the Distributor or their affiliates also receives a meeting attendance fee of $10,000 for each meeting of the Board that he or she attends in person and $5,000 for each meeting of the Board that he or she attends telephonically. In addition, the Chairperson of the Audit Committee, the Chairperson of the Contract Review Committee, and the Chairperson of the Governance Committee, each receive an additional retainer fee at an annual rate of $20,000. Each Contract Review Committee and Audit Committee member is compensated $6,000 for each committee meeting that he or she attends in person and $3,000 for each committee meeting that he or she attends telephonically. These fees are allocated among the funds in the Natixis Funds Trusts, Loomis Sayles Funds Trusts and Natixis ETF Trust based on a formula that takes into account, among other factors, the relative net assets of each mutual fund portfolio. Trustees are reimbursed for travel expenses in connection with attendance at meetings.
Effective June 30, 2020, Kurt L. Wagner, portfolio manager of the Loomis Sayles ETF, will no longer serve as a portfolio manager. Mr. Wagner is retiring from Loomis Sayles effective August 31, 2020.

Effective October 1, 2019, Daniel Conklin will join the portfolio management team of the Loomis Sayles ETF.

The following information supplements the sub-section “Portfolio Managers’ Management of Other Accounts” and “Portfolio Managers’ Ownership of Fund Shares” within the section “Portfolio Management Information.”

Portfolio Managers’ Management of Other Accounts

The following table provides information on the other accounts managed by Daniel Conklin as of August 31, 2019:

Effective July 1, 2019, Peter J. Smail has resigned as Chairperson of the Contract Review Committee and has been appointed as a member of the Audit Committee, Wendell J. Knox has been appointed as Chairperson of the Contract Review Committee and Richard A. Goglia has resigned from the Audit Committee and has been appointed as a member of the Contract Review Committee.

Accordingly, the table in the sub-section “Trustees and Officers” within the section “Management of the Trust(s)” is hereby updated to reflect the above stated changes. In addition, the list of the members of the Audit Committee, Contract Review Committee and Governance Committee in the sub-section “Leadership and Structure of the Board” within the section “Management of the Trust(s)” is hereby replaced with the following:
Audit Committee | Contract Review Committee | Governance Committee
---|---|---
Erik R. Sirri – Chairperson | Wendell J. Knox – Chairperson | Cynthia L. Walker – Chairperson
Edmond J. English | Richard A. Goglia | Edmond J. English
Martin T. Meehan | Maureen B. Mitchell | Wendell J. Knox
Peter J. Smail | James P. Palermo | Peter J. Smail
Cynthia L. Walker

As Chairperson of the Board, Mr. Drucker is an *ex officio* member of each Committee.

**LOOMIS SAYLES BOND FUND**

Effective July 1, 2019, Loomis, Sayles & Company, L.P. has given a binding contractual undertaking to the Fund to limit the amount of the Fund’s total annual fund operating expenses (exclusive of brokerage expenses, interest expense, taxes, acquired fund fees and expenses, organizational and extraordinary expenses, such as litigation and indemnification expenses) to 0.67%, 0.92%, 1.17% and 0.62% of the Fund’s average daily net assets for Institutional Class, Retail Class, Admin Class and Class N shares, respectively. This undertaking is in effect through January 31, 2021. Accordingly, the table regarding advisory fee expense limits within the section “Investment Advisory and Other Services” is amended with respect to the Fund as follows:

<table>

***** Vaughan Nelson Investment Management, L.P. (“Vaughan Nelson”) and Natixis Advisors have agreed to bear the fee waiver and/or expense reimbursement jointly on a pro rata basis relative to their advisory and sub-advisory fees, respectively.

Effective July 1, 2019, Natixis Advisors L.P. has given a binding contractual undertaking to the Fund to limit the amount of the Fund’s total annual fund operating expenses (exclusive of brokerage expenses, interest expense, taxes, acquired fund fees and expenses, organizational and extraordinary expenses, such as litigation and indemnification expenses) to 1.20%, 1.95%, 0.90%, 1.20% and 0.95% of the Fund’s average daily net assets for Class A, Class C, Class N, Class T and Class Y shares, respectively. This undertaking is in effect through April 30, 2021. Accordingly, the table regarding expense limits within the sub-section “Advisory Fees” in the section “Fund Charges and Expenses” is amended with respect to the Fund as follows:

<table>
<thead>
<tr>

**** Vaughan Nelson Investment Management, L.P. (“Vaughan Nelson”) and Natixis Advisors have agreed to bear the fee waiver and/or expense reimbursement jointly on a pro rata basis relative to their advisory and sub-advisory fees, respectively.

---

Effective immediately, the second paragraph within the section “Transfer Agency Expenses” is replaced with the following:

Natixis Advisors has given a binding contractual undertaking to reimburse the Class N shares of the Funds for any and all transfer agency expenses attributable to accounts admitted to Class N via a prospectus provision that allows the Distributor, at its sole discretion, to waive the investment minimum for accounts as to which the relevant financial intermediary has provided assurances, in writing, that the accounts will be held in omnibus fashion beginning no more than two years following the establishment date of such accounts in Class N. Such reimbursement will be in effect during the period July 1, 2019 to June 30, 2021 and may be terminated before then only with the consent of the Board.

---

Effective immediately, the second paragraph in the sub-section “Transfer Agency Expenses” within the section “Other Arrangements” is replaced with the following:

Natixis Advisors has given a binding contractual undertaking to reimburse the Class N shares of the Funds for any and all transfer agency expenses attributable to accounts admitted to Class N via a prospectus provision that allows
the Distributor, at its sole discretion, to waive the investment minimum for accounts as to which the relevant financial intermediary has provided assurances, in writing, that the accounts will be held in omnibus fashion beginning no more than two years following the establishment date of such accounts in Class N. Such reimbursement will be in effect during the period July 1, 2019 to June 30, 2021 and may be terminated before then only with the consent of the Board.

INVESTMENT RESTRICTIONS

The following is a description of restrictions on the investments to be made by the Fund. Except where noted below, these restrictions are fundamental policies that may not be changed without the vote of a majority of the outstanding voting securities of the Fund (as defined in the Investment Company Act of 1940, as amended (the “1940 Act”)). Except in the case of the restriction marked with a dagger (†) (see “General Notes on Investment Restrictions” below), the percentages set forth below and the percentage limitations set forth in the Prospectus apply at the time an investment is made and shall not be considered violated unless an excess or deficiency occurs or exists immediately after and as a result of such investment.

Loomis Sayles ETF

Loomis Sayles ETF may not:

(1) Purchase any security (other than U.S. government securities) if, as a result, 25% or more of the Fund’s total assets (taken at current value) would be invested in any one industry. For purposes of this restriction, telephone, gas and electric public utilities are each regarded as separate industries and finance companies whose financing activities are related primarily to the activities of their parent companies are classified in the industry of their parents, finance companies whose financing activities are not related primarily to the activities of their parent companies are classified in the industry the Fund’s Subadviser believes is most applicable to such finance companies, and each foreign country’s government (together with all subdivisions thereof) will be considered to be a separate industry. For purposes of this restriction, asset-backed securities are not considered to be bank obligations.

(2) Make short sales of securities or maintain a short position, except that the Fund may make any short sales or maintain any short positions where the short sales or short positions would not constitute “senior securities” under the 1940 Act.

(3)† Borrow money, except to the extent permitted under the 1940 Act.

(4) Make loans, except that the Fund may purchase or hold debt instruments in accordance with its investment objectives and policies, provided, however, this restriction does not apply to repurchase agreements or loans of portfolio securities.

(5) Act as an underwriter of securities of other issuers except that, in the disposition of portfolio securities, it may be deemed to be an underwriter under the federal securities laws.

(6) Purchase or sell real estate, although it may purchase securities of issuers which deal in real estate, securities which are secured by interests in real estate, and securities which represent interests in real estate, and it may acquire and dispose of real estate or interests in real estate acquired through the exercise of its rights as a holder of debt obligations secured by real estate or interests therein.

(7) Issue senior securities, except for permitted borrowings or as otherwise permitted under the 1940 Act.

(8) Invest under normal circumstances, less than 80% of its net assets (plus any borrowings made for investment purposes) in fixed-income securities. This policy is non-fundamental. Prior to any change to such policy adopted by the Board of the Fund, the Fund will provide notice to shareholders as required by Rule 35d-1 under the 1940 Act, as such rule may be interpreted from time to time by the staff of the SEC.
Loomis Sayles ETF may:

(9) Purchase and sell commodities to the maximum extent permitted by applicable law.

In restriction (8), the 80% policy is applied at the time of investment. However, if the Fund no longer meets the 80% policy (due to changes in the value of its portfolio holdings or other circumstances beyond its control), it must make future investments in a manner that would bring the Fund into compliance with the 80% requirement, but would not be required to sell portfolio holdings that have increased in value.

**General Notes on Investment Restrictions**

In addition to temporary borrowing, and subject to any stricter restrictions on borrowing applicable to the Fund, the Fund may borrow from any bank, provided that immediately after any such borrowing there is an asset coverage of at least 300% for all borrowings by the Fund and provided further, that in the event that such asset coverage shall at any time fall below 300%, the Fund shall, within three days (not including Sundays and holidays) thereafter or such longer period as the U.S. Securities and Exchange Commission (“SEC”) may prescribe by rules and regulations, reduce the amount of its borrowings to such an extent that the asset coverage of such borrowing shall be at least 300%. With respect to restrictions on borrowing, the 1940 Act limits the Fund’s ability to borrow money on a non-temporary basis if such borrowings constitute “senior securities.” The Fund may also borrow money or engage in economically similar transactions if those transactions do not constitute “senior securities” under the 1940 Act.

Where applicable, the foregoing investment restrictions shall be interpreted based upon no-action letters and other pronouncements of the staff of the SEC. Under current pronouncements, certain positions (e.g., reverse repurchase agreements) are excluded from the definition of “senior security” so long as the Fund maintains adequate cover, segregation of assets or otherwise. Similarly, a short sale will not be considered a senior security if the Fund takes certain steps contemplated by SEC staff pronouncements, such as ensuring the short sale transaction is adequately covered.

The Fund may not purchase any illiquid security if, as a result, more than 15% of the Fund’s net assets (based on current value) would then be invested in such securities. Securities generally will be considered “illiquid” if a Fund reasonably expects the security cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the security. For purposes of the foregoing restrictions, the Fund does not consider a swap or other derivative contract on one or more commodities, securities, indices, currencies or interest rates to be a commodity or a commodity contract, nor, consistent with the position of the SEC, does the Fund consider such swap contracts to involve the issuance of a senior security, provided the Fund designates on its records or segregates with its custodian or otherwise designates liquid assets (marked to market on a daily basis) sufficient to meet its obligations under such contracts.

**FUND CHARGES AND EXPENSES**

**Advisory Fees**

Pursuant to an investment advisory agreement, Natixis Advisors, L.P., (“Natixis Advisors” or “Adviser”) has agreed, subject to the supervision of the Board of Trustees, to manage the investment and reinvestment of the assets of the Fund, and to provide a range of administrative services to the Fund.

For the services described in the advisory agreement, the Fund has agreed to pay Natixis Advisors an advisory fee at the annual rate of 0.30% of the average daily net assets, reduced by the amount of any subadvisory fees payable directly by the Fund to its Subadviser pursuant to any subadvisory agreement.

Natixis Advisors has given a binding contractual undertaking to the Fund to waive its advisory fee and, if necessary, to reimburse certain expenses related to operating the Fund in order to limit the Fund’s expenses, exclusive of acquired fund fees and expenses, brokerage expenses, interest expense, taxes, organizational and extraordinary expenses, such as litigation and indemnification expenses, to the annual rate indicated below. The undertaking is in effect until April
30, 2021 for the Fund and may be modified before then only with the consent of the Board. The undertaking will be reevaluated on an annual basis thereafter, subject to the obligation of the Fund to repay such advisory fees waived and/or expenses reimbursed in later periods to the extent that the total annual Fund operating expenses for a class fall below the expense limit; provided, however, that the Fund is not obligated to repay such waived/reimbursed fees and expenses more than one year after the end of the fiscal year in which the fees or expenses were waived/reimbursed.

Subadvisory Fees

The advisory agreement between Natixis Advisors and the Fund provides that Natixis Advisors may delegate its responsibilities thereunder to other parties. Pursuant to a subadvisory agreement, Natixis Advisors has delegated its portfolio management responsibilities to Loomis, Sayles & Company, L.P. (“Loomis Sayles” or “Subadviser”). For the services described in the subadvisory agreement, the Fund has agreed to pay Loomis Sayles a subadvisory fee at the annual rate of 0.15% of the average daily net assets.

Payment of Advisory and Subadvisory Fees

For the fiscal years ended December 31, 2017 and December 31, 2018, the following table shows the total advisory fees (including subadvisory fees) paid by the Fund, and of these amounts, the total paid to Natixis Advisors and the total paid to the Subadviser of the Fund:

</table>

*From commencement of operations on December 27, 2017 through December 31, 2017.

Affiliated Brokerage Commissions

The Fund has not incurred any brokerage commissions to an affiliated broker for the fiscal year ended December 31, 2018.

For a description of how transactions in portfolio securities are effected and how the Subadviser selects brokers, see the section entitled “Portfolio Transactions and Brokerage” in this Statement.

Regular Broker-Dealers

The Fund does not have any holdings of its regular broker-dealers as of the date of this Statement.

Distribution and Service (Rule 12b-1) Fees

As explained in this Statement, the Fund may pay ALPS Distributors, Inc. (“ALPS” or the “Distributor”), an unaffiliated distributor, fees under a plan adopted pursuant to Rule 12b-1 under the 1940 Act (the “Plan”) in order for the Distributor to compensate certain financial intermediaries that may provide distribution and other services with respect to the Fund. Currently, no Rule 12b-1 fees are charged. Future payments may be made under the Plan without further shareholder approval.

Ownership of Fund Shares

Although the Trust does not have information concerning the beneficial ownership of shares held in the names of DTC Participants, as of April 1, 2019, the name and percentage ownership of each DTC Participant that owned of record 5% or more of the outstanding shares of the Fund were as follows.¹

<table>
<thead>
<tr>

</tbody>
</table>
Such ownership may be beneficially held by individuals or entities other than the owner listed. To the extent that any listed shareholder beneficially owns more than 25% of the Fund, it may be deemed to “control” the Fund within the meaning of the 1940 Act. The effect of such control may be to reduce the ability of other shareholders of the Fund to take actions requiring the affirmative vote of holders of a plurality or majority of the Fund’s shares without the approval of the controlling shareholder.

As of April 1, 2019, National Financial Services, LLC owned 78.78% of the outstanding shares of the Fund and therefore may be presumed to “control” the Fund, as that term is defined in the 1940 Act.

THE TRUST

Natixis ETF Trust (the “Trust”) is registered with the SEC as an open-end management investment company and is organized as a Massachusetts business trust under the laws of the Commonwealth of Massachusetts by a Declaration of Trust (the “Declaration of Trust”) dated July 19, 2011, and is a “series” company as described in Section 18(f)(2) of the 1940 Act, as amended. The Trust consists of two diversified series, the Natixis Seeyond International Minimum Volatility ETF and the Natixis Loomis Sayles Short Duration Income ETF. The Funds are exchange-traded funds (“ETFs”).

Unlike a mutual fund, the Funds offer and issue shares at their net asset value (“NAV”) to broker-dealers and other financial intermediaries who are participants in the National Securities Clearing Corporation (“NSCC”) and who have signed an Authorized Participant Agreement with the Distributor (each an “Authorized Participant”), and accepted by the Transfer Agent, only in aggregations of a specified number of shares (“Creation Units”), generally in exchange for a basket of securities and/or instruments that generally corresponds pro rata to the positions in each Fund’s portfolio (the “Deposit Securities”) together with a deposit of a specified cash payment (the “Cash Component”). The Funds may, in certain circumstances, issue Creation Units solely in exchange for a specified all-cash payment (“Cash Deposit”). Shares are redeemable by the Funds only in Creation Units and, generally, in exchange for securities and instruments that correspond pro rata to the positions in each Fund’s portfolio (“Redemption Securities”) together with a Cash Component. As with the offer and sale of Creation Units, the Funds may, in certain circumstances, redeem Creation Units in exchange for a specified all-cash payment. Shares trade in the secondary market and elsewhere at market prices that may be at, above or below NAV.

The Funds may charge creation/redemption transaction fees for each creation and redemption. In all cases, transaction fees will be limited in accordance with the requirements of the SEC applicable to management investment companies offering redeemable securities (see “Creations and Redemptions” below).

EXCHANGE LISTING AND TRADING

A discussion of exchange listing and trading matters associated with an investment in the Fund is contained in the “Shareholder Information” section of the Prospectus. The discussion below supplements, and should be read in conjunction with, such section of the Prospectus.
The shares of the Fund are listed for trading on the NYSE Arca, Inc. (the “NYSE Arca”). The shares will trade on the NYSE Arca at prices that may differ to some degree from NAV. There can be no assurance that the requirements of the NYSE Arca necessary to maintain the listing of shares of the Fund will continue to be met.

The NYSE Arca may, but is not required to, remove the shares of the Fund from listing if: (i) following the initial twelve-month period beginning upon the commencement of trading of the Fund, there are fewer than 50 beneficial holders of the shares for 30 or more consecutive trading days; (ii) the “intra-day indicative value” (“IIV”) of the Fund is no longer calculated or available; or (iii) such other event shall occur or condition exists that, in the opinion of the NYSE Arca, makes further dealings on the NYSE Arca inadvisable. In addition, the NYSE Arca will remove the shares of the Fund from listing and trading upon termination of the Fund.

As in the case of other publicly-traded securities, when you buy or sell shares through a broker-dealer, you will incur a brokerage commission determined by that broker-dealer.

The Fund reserves the right to adjust the share prices of the Fund in the future to maintain convenient trading ranges for investors. Any adjustments would be accomplished through stock splits or reverse stock splits, which would have no effect on the net assets of the Fund or an investor’s equity interest in the Fund.

The base and trading currencies of the Fund is the U.S. dollar. The base currency is the currency in which the Fund’s NAV per share is calculated and the trading currency is the currency in which shares of the Fund are listed and traded on the NYSE Arca.

Intraday Indicative Values (IIV)

The approximate value of the Fund’s investments on a per-Share basis, the IIV, shall be disseminated by NYSE Arca every 15 seconds during hours of trading through the facilities of the Consolidated Tape Association, or through other widely disseminated means. An independent third party calculator calculates the IIV for the Fund during hours of regular session trading on NYSE Arca and the Fund is not involved in the actual calculation of the IIV.

The Fund’s IIV is based on the current market value of the Fund’s portfolio holdings and represents only an estimate of the Fund’s intraday NAV. The IIV does not necessarily reflect the precise composition of the current portfolio of securities held by the Fund at a particular point in time or the best possible valuation of the current portfolio. Therefore, the IIV should not be viewed as a “real-time” update of the Fund’s NAV, which is computed only once a day at the end of the day. The IIV is generally determined by using current market trades. The trades of certain Fund holdings may not be updated during U.S. trading hours if such holdings do not trade in the United States. Neither the Fund nor the third party calculator makes any representations or warranties as to the accuracy of the IIVs.

INVESTMENT STRATEGIES AND RISKS

Investment Strategies

The descriptions below describe certain investment strategies, including particular types of securities or instruments or specific practices that may be used by the Subadviser in managing the Fund.

The Fund’s principal strategies are described in its Prospectus. This Statement describes some of the non-principal strategies that the Fund may use, including related risks, in addition to providing additional information about its principal strategies.

The list of securities or other instruments under each category below is not intended to be an exclusive list of securities, instruments and practices for investment and unless a strategy, practice or security is specifically prohibited by the investment restrictions listed in the Prospectus, in the section “Investment Restrictions” in this Statement or under applicable law, the Fund may engage in each of the strategies and invest in securities and instruments in addition to those listed below. The Fund is not required to engage in a particular transaction or invest in any security or instrument, even if to do so might benefit the Fund. The Prospectus and/or this Statement will be updated if the Fund begins to engage in investment practices that are not described in the Prospectus and/or this Statement.
Adjustable-Rate Mortgage Securities (“ARMs”)

The Fund may invest in ARMs. An ARM, like a traditional mortgage security, is an interest in a pool of mortgage loans that provides investors with payments consisting of both principal and interest, as mortgage loans in the underlying mortgage pool are paid off by the borrowers. ARMs have interest rates that are reset at periodic intervals, usually by reference to some interest rate index or market interest rate. Although the rate adjustment feature may act as a buffer to reduce sharp changes in the value of adjustable rate securities, these securities are still subject to changes in value based on changes in market interest rates or changes in the issuer’s creditworthiness. Since the interest rates are reset only periodically, changes in the interest rate on ARMs may lag behind changes in prevailing market interest rates. In addition, some ARMs (or the underlying mortgages) are subject to caps or floors that limit the maximum change in interest rate during a specified period or over the life of the security. As a result, changes in the interest rate on an ARM may not fully reflect changes in prevailing market interest rates during certain periods. Because of the resetting of interest rates, ARMs are less likely than non-adjustable rate securities of comparable quality and maturity to increase significantly in value when market interest rates fall. In addition, the Fund will not benefit from increases in interest rates to the extent that interest rates rise to the point where they cause the current coupon of the underlying ARM to exceed a cap rate for a particular mortgage. See the section “Mortgage-Related Securities” for more information on the risks involved in ARMs.

Asset-Backed Securities

The Fund may invest in asset-backed securities, which are securities that represent a participation in, or are secured by and payable from, a stream of payments generated by particular assets, most often a pool or pools of similar assets (e.g., trade receivables). The credit quality of these securities depends primarily upon the quality of the underlying assets and the level of credit support and/or enhancement provided. Mortgage-backed securities are a type of asset-backed security. The securitization techniques used to develop mortgage securities are also applied to a broad range of other assets. Through the use of trusts and special purpose vehicles, assets, such as automobile and credit card receivables, are securitized in pass-through structures similar to mortgage pass-through structures or in a pay-through structure similar to a collateralized mortgage obligation (“CMO”) structure (described herein). Generally, the issuers of asset-backed bonds, notes or pass-through certificates are special purpose entities and do not have any significant assets other than the receivables securing such obligations. In general, the collateral supporting asset-backed securities is of shorter maturity than mortgage loans. Instruments backed by pools of receivables are similar to mortgage-backed securities in that they are subject to unscheduled prepayments of principal prior to maturity. When the obligations are prepaid, the Fund will ordinarily reinvest the prepaid amounts in securities, the yields of which reflect interest rates prevailing at the time. Therefore, the Fund’s ability to maintain a portfolio that includes high-yielding asset-backed securities will be adversely affected to the extent that prepayments of principal must be reinvested in securities that have lower yields than the prepaid obligations. Moreover, prepayments of securities purchased at a premium could result in a realized loss.

In addition, the value of some mortgage-backed or asset-backed securities in which the Fund invests may be particularly sensitive to changes in prevailing interest rates, and the ability of the Fund to successfully utilize these instruments may depend in part upon the ability of the Subadviser to forecast interest rates and other economic factors correctly. These types of securities may also decline for reasons associated with the underlying collateral. Asset-backed securities involve risks similar to those described in the section “Mortgage-Related Securities.” The Fund may also invest in residual interests in asset-backed securities, which are interests in the excess cash flow remaining after the issuer makes required payments on the securities and pays related administrative expenses. The total amount of residual cash flow resulting from a particular issue of asset-backed securities depends in part on the characteristics of the underlying assets, the coupon rate on the securities, prevailing interest rates, the amount of administrative expenses and the actual performance of the underlying assets. Among other things, such performance is influenced by the amount and timing of losses incurred on the assets and leasing and disposition activity of the asset manager.

The Fund may also gain exposure to asset-backed securities through entering into credit default swaps or other derivative instruments related to this asset class. For example, the Fund may enter into credit default swaps on asset-backed securities, which are indices made up of tranches of asset-backed securities, each with different credit ratings. Utilizing asset-backed securities, one can either gain synthetic risk exposure to a portfolio of such securities by “selling
The Fund’s investments in loans are subject to credit/counterparty risk, and, as described above, even secured bank loans may not be adequately collateralized. Indebtedness of borrowers whose creditworthiness is poor involves substantially greater risks, and may be highly speculative. The interest rates on many bank loans reset frequently, and therefore investors are subject to the risk that the return will be less than anticipated when the investment was first made. Most bank loans, like most investment-grade bonds, are not traded on any national securities exchange. Bank loans generally have less liquidity than investment grade bonds and there may be less public information available about them. The Fund may participate in the primary syndicate for a bank loan or it may also purchase loans from other lenders (sometimes referred to as loan assignments). Bank loans are generally less liquid than many other debt securities. Transactions in bank loans may settle on a delayed basis, such that the Fund may not receive the proceeds from the sale of a loan for a substantial period of time after the sale. As a result, the proceeds related to the sale of bank loans may not be available to make additional investments or to meet the Fund’s redemption obligations until a substantial period after the sale of the loans. In order to finance redemptions pending settlement of bank loans, the Fund may employ a wide variety of means to meet short-term liquidity needs, including, without limitation drawing on its cash and other short term positions, all of which may adversely affect the Fund’s performance. With limited exceptions, the Subadviser will take steps intended to ensure that it does not receive material non-public information than other investors about certain of the loans in which it seeks to invest.

Large loans to corporations or governments may be shared or syndicated among several lenders, usually (but often not limited to) banks. The Fund may participate in the primary syndicate for a loan or it may also purchase loans from other lenders (sometimes referred to as loan assignments), in either case becoming a direct lender. The Fund also may acquire a participation interest in another lender’s portion of the loan. Participation interests involve special types of risk, including liquidity risk and the risks of being a lender. Loans and loan participations may be transferable among financial institutions; however, they may not have the liquidity of conventional debt securities and because they may be subject to restrictions on resale, they are potentially illiquid. The purchase or sale of loans may require the consent of a third party or of the borrower, and although such consent is rarely withheld in practice, the consent requirement could delay a purchase or affect the Fund’s ability to dispose of its investments in loans in a timely fashion. Although the market for loans and loan participations has become increasingly liquid over time, this market is still developing, and there can be no assurance that adverse developments with respect to this market or particular borrowers will not prevent the Fund from selling these loans at their market values at a desirable time or price. To the extent a senior loan has been deemed illiquid, it will be subject to the Fund’s restrictions on investment in illiquid securities. When investing in a loan participation, the Fund typically will have the right to receive payments only from the lender to the
extent the lender receives payments from the borrower, and not from the borrower itself. Likewise, the Fund typically will be able to enforce its rights only through the lender, and not directly against the borrower. As a result, the Fund will assume the credit/counterparty risk of both the borrower and the lender that is selling the participation.

Investments in loans through direct assignment of a financial institution’s interests with respect to a loan may involve additional risks to the Fund. For example, if the loan is foreclosed, the Fund could become part owner of any collateral, and would bear the costs and liabilities associated with owning and disposing of the collateral. In addition, it is conceivable that under emerging legal theories of lender liability, the Fund could be held liable as a co-lender.

Some loans may not be considered “securities” for certain purposes under the federal securities laws, and purchasers, such as the Fund, therefore may not be entitled to rely on the anti-fraud protections of the federal securities laws. Loans and other debt instruments that are not in the form of securities may offer less legal protection to the Fund in the event of fraud or misrepresentation.

A loan is often administered by a bank or other financial institution that acts as agent for all holders. The agent administers the terms of the loan, as specified in the loan agreement. Unless, under the terms of the loan or other indebtedness, the Fund has direct recourse against the borrower, it may have to rely on the agent to pursue appropriate credit remedies against a borrower. In addition, holders of the loans, such as the Fund, may be required to indemnify the agent bank in certain circumstances.

In addition to investing in senior secured loans, the Fund may invest in other loans, such as second lien loans and other secured loans, as well as unsecured loans. Second lien loans and other secured loans are subject to the same risks associated with investment in senior loans and below investment grade bonds. However, such loans may rank lower in right of payment than senior secured loans, and are subject to additional risk that the cash flow of the borrower and any property securing the loan may be insufficient to meet scheduled payments after giving effect to the higher ranking secured obligations of the borrower. Second lien loans and other secured loans are expected to have greater price volatility than more senior loans and may be less liquid. There is also a possibility that originators will not be able to sell participations in lower ranking loans, which would create greater credit/counterparty risk exposure. Each of these risks may be increased in the case of unsecured loans, which are not backed by a security interest in any specific collateral.

The Fund may also gain exposure to loan investments through the use of derivatives. See the section “Derivative Instruments.”

Collateralized Loan Obligations (“CLOs”)

The Fund may invest in CLOs. CLOs are types of asset-backed securities. A CLO is a trust typically collateralized by a pool of loans, which may include, among others, domestic and foreign senior secured loans, senior unsecured loans and subordinate corporate loans, including loans that may be rated 30 below investment grade or equivalent unrated loans. CLOs may charge management fees and administrative expenses. For CLOs, the cash flows from the trust are split into two or more portions, called tranches, varying in risk and yield. The riskiest portion is the “equity” tranche which bears the bulk of defaults from the loans in the trust and serves to protect the other, more senior tranches from default in all but the most severe circumstances. Since they are partially protected from defaults, senior tranches from a trust typically have higher ratings and lower yields than their underlying securities, and can be rated investment grade. Despite the protection from the equity tranche, CLO tranches can experience substantial losses due to actual defaults, increased sensitivity to defaults due to collateral default and disappearance of protecting tranches, market anticipation of defaults, as well as aversion to CLO securities as a class. The Fund may invest in any tranche, including the equity tranche, of a CLO. The risks of an investment in a CLO depend largely on the type of the collateral securities and the class of the instrument in which the Fund invests.

Normally, CLOs are privately offered and sold, and thus, are not registered under the securities laws. As a result, investments in CLOs may be characterized by the Fund as illiquid securities, although an active dealer market may exist for CLOs allowing them to qualify for Rule 144A under the Securities Act. In addition to the normal risks associated with debt instruments discussed elsewhere in this prospectus and in the SAI (e.g., prepayment risk, credit risk, liquidity risk, market risk, structural risk, legal risk, default risk and interest rate risk (which may be exacerbated
if the interest rate payable on a structured financing changes inversely to changes in interest rates or based on multiples of changes in interest rates), CLOs may carry additional risks including, but are not limited to: (i) the possibility that distributions from collateral securities will not be adequate to make interest or other payments; (ii) the possibility that the quality of the collateral may decline in value or default; (iii) the possibility that investments in CLOs are subordinate to other classes or tranches thereof; and (iv) the complex structure of the security may not be fully understood at the time of investment and may produce disputes with the issuer or unexpected investment results.

**Collateralized Mortgage Obligations (“CMOs”)**

The Fund may invest in CMOs. CMOs are securities backed by a portfolio of mortgages or mortgage-backed securities held under indentures. CMOs may be issued either by U.S. government instrumentalities or by non-governmental entities. CMOs are not direct obligations of the U.S. government. The issuer’s obligation to make interest and principal payments is secured by the underlying portfolio of mortgages or mortgage-backed securities. CMOs are issued with a number of classes or series which have different maturities and which may represent interests in some or all of the interest or principal on the underlying collateral or a combination thereof. CMOs of different classes are generally retired in sequence as the underlying mortgage loans in the mortgage pool are repaid. In the event of sufficient early prepayments on such mortgages, the class or series of CMO first to mature generally will be retired prior to its maturity. Thus, the early retirement of a particular class or series of CMO held by the Fund would have a similar effect to the prepayment of mortgages underlying a mortgage pass-through security. CMOs and other asset-backed and mortgage-backed securities may be considered derivative securities. CMOs involve risks similar to those described in the section “Mortgage-Related Securities.”

**Corporate Reorganizations**

The Fund may invest in securities for which a tender or exchange offer has been made or announced and in securities of companies for which a merger, consolidation, liquidation or reorganization proposal has been announced if, in the judgment of the Fund’s Subadviser, there is a reasonable prospect of capital appreciation significantly greater than the brokerage and other transaction expenses involved. The primary risk of such investments is that if the contemplated transaction is abandoned, revised, delayed or becomes subject to unanticipated uncertainties, the market price of the securities may decline below the purchase price paid by the Fund.

In general, securities which are the subject of such an offer or proposal sell at a premium to their historic market price immediately prior to the announcement of the offer or proposal. However, the increased market price of such securities may also discount what the stated or appraised value of the security would be if the contemplated transaction were approved or consummated. Such investments may be advantageous when the discount significantly overstates the risk of the contingencies involved, significantly undervalues the securities, assets or cash to be received by shareholders of the prospective company as a result of the contemplated transaction or fails adequately to recognize the possibility that the offer or proposal may be replaced or superseded by an offer or proposal of greater value. The evaluation of such contingencies requires usually broad knowledge and experience on the part of the Subadviser which must appraise not only the value of the issuer and its component businesses, but also the financial resources and business motivation of the offer or proposal as well as the dynamics of the business climate when the offer or proposal is in process.

**Debt Securities**

The Fund may invest in debt securities. Debt securities are used by issuers to borrow money. The issuer usually pays a fixed, variable or floating rate of interest and must repay the amount borrowed at the maturity of the security. Some debt securities, such as zero-coupon securities, do not pay interest but are sold at a discount from their face values. Debt securities include corporate bonds, government securities and mortgage- and other asset-backed securities. Debt securities include a broad array of short-, medium- and long-term obligations issued by the U.S. or foreign governments, government or international agencies and instrumentalities, and corporate issuers of various types. Some debt securities represent uncollateralized obligations of their issuers; in other cases, the securities may be backed by specific assets (such as mortgages or other receivables) that have been set aside as collateral for the issuer’s obligation. Debt securities generally involve an obligation of the issuer to pay interest or dividends on either a current basis or at the maturity of the securities, as well as the obligation to repay the principal amount of the security at maturity.
Debt securities are subject to market/issuer risk and credit/counterparty risk. Credit/counterparty risk relates to the ability of the issuer to make payments of principal and interest and includes the risk of default. Sometimes, an issuer may make these payments from money raised through a variety of sources, including, with respect to issuers of municipal securities, (i) the issuer’s general taxing power, (ii) a specific type of tax, such as a property tax or (iii) a particular facility or project such as a highway. The ability of an issuer to make these payments could be affected by general economic conditions, issues specific to the issuer, litigation, legislation or other political events, the bankruptcy of the issuer, war, natural disasters, terrorism or other major events. U.S. government securities are not generally perceived to involve credit risks to the same extent as investments in other types of fixed-income securities; as a result, the yields available from U.S. government securities are generally lower than the yields available from corporate and municipal debt securities. Market/issuer risk is the risk that the value of the security will fall because of changes in market rates of interest. Generally, the value of debt securities falls when market rates of interest are rising. Some debt securities also involve prepayment or call risk. This is the risk that the issuer will repay the Fund the principal on the security before it is due, thus depriving the Fund of a favorable stream of future interest payments.

Because interest rates vary, it is impossible to predict the income of a fund that invests in debt securities for any particular period. Fluctuations in the value of the Fund’s investments in debt securities will cause the Fund’s NAV to increase or decrease.

**Derivative Instruments**

The Fund may, but is not required to, use a number of derivative instruments for risk management purposes or to seek to enhance investment returns. Generally, derivatives are financial contracts whose value depends upon, or is derived from, the value of an underlying asset, reference rate or index, and may relate to stocks, bonds, interest rates, currencies or currency exchange rates, commodities, related indices and other assets. The Subadviser may decide not to employ one or more of these strategies and there is no assurance that any derivatives strategy used by the Fund will succeed. In addition, suitable derivative transactions may not be available in all circumstances and there can be no assurance that the Fund will engage in these transactions to reduce exposure to other risks when that would be beneficial. Examples of derivative instruments that the Fund may use include (but are not limited to) options and warrants, futures contracts, options on futures contracts, structured notes, zero-strike warrants and options, swap agreements (including interest rate and credit default swaps), swaptions and debt-linked and equity-linked securities.

Transactions in certain derivatives are subject to clearance on a clearing house, while other derivatives are subject to risks of trading in the over-the-counter (“OTC”) markets or on non-U.S. exchanges. In addition, the U.S. government has enacted the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”), which includes provisions for regulation of the derivatives market, including new clearing, margin, reporting and registration requirements. The European Union (and some other countries) are implementing similar requirements that will affect the Fund when it enters into derivatives transactions with a counterparty organized in that country or otherwise subject to that country’s derivatives regulations. Because these requirements are new and evolving (and some of the rules are not yet final), their ultimate impact remains unclear. These regulatory changes could, among other things, restrict the Fund’s ability to engage in derivatives transactions (including because certain types of derivatives transactions may no longer be available to the Fund) and/or increase the costs of such derivatives transactions (including through increased margin requirements), and the Fund may be unable to execute its investment strategy as a result.

Additionally, the new requirements may result in increased uncertainty about credit/counterparty risk, and they may also limit the flexibility of the Fund to protect its interests in the event of an insolvency of a derivatives counterparty. In the event of a counterparty’s (or its affiliate’s) insolvency, the Fund’s ability to exercise remedies, such as the termination of transactions, netting of obligations and realization on collateral, could be stayed or eliminated under new special resolution regimes adopted in the United States, the European Union and various other jurisdictions. Such regimes provide government authorities with broad authority to intervene when a financial institution is experiencing financial difficulty. In particular, with respect to counterparties who are subject to such proceedings in the European Union, the liabilities of such counterparties to the Fund could be reduced, eliminated, or converted to equity in such counterparties (sometimes referred to as a “bail in”). The regulation of derivatives transactions and funds that engage in such transactions is an evolving area of law and is subject to modification by government and judicial action.
Derivatives involve special risks, including credit/counterparty risk, illiquidity, difficulties in valuation, leverage risk and, to the extent the Subadviser’s view as to certain market movements is incorrect, the risk that the use of derivatives could result in significantly greater losses or lower income or gains than if they had not been used. The Fund's derivative counterparties may experience financial difficulties or otherwise be unwilling or unable to honor their obligations, possibly resulting in losses to the Fund. Losses resulting from the use of derivatives will reduce the Fund’s NAV, and possibly income, and the losses may be significantly greater than if derivatives had not been used. The degree of the Fund’s use of derivatives may be limited by certain provisions of the Internal Revenue Code (the “Code”). When used, derivatives may affect the amount, timing and/or character of distributions payable to, and thus taxes payable by, shareholders. See the subsection “Certain Additional Risks of Derivative Instruments” below for additional information about the risks relating to derivative instruments.

Several types of derivative instruments in which the Fund may invest are described in more detail below. However, the Fund is not limited to investments in these instruments and may decide not to employ any or all of these strategies.

**Asset Segregation and Coverage**

The Fund will segregate with its custodian or otherwise designate on its records liquid assets to ensure that it has sufficient liquid assets to meet its obligations under its derivatives contracts and similar transactions, or the Fund may engage in other measures to “cover” its obligations with respect to such transactions. The amounts that are segregated or designated may be based on the notional value of the derivative or on the daily mark-to-market obligation under the derivatives contract and may be reduced by amounts on deposit with the applicable broker or counterparty to the derivatives transaction. In certain circumstances, the Fund may enter into an offsetting position rather than segregating or designating liquid assets (e.g., the Fund may cover a written put option with a purchased put option with the same or higher exercise price). Although the Subadviser will attempt to ensure that the Fund has sufficient liquid assets to cover its obligations under its derivatives contracts, it is possible that the Fund’s liquid assets may be insufficient to support such obligations under its derivatives positions. The Fund may modify its asset segregation policies from time to time.

**Futures Contracts**

Futures transactions involve the Fund’s buying or selling futures contracts. A futures contract is an agreement between two parties to buy and sell a particular security, commodity, currency or other asset, or group or index of securities, commodities, currencies or other assets, for a specified price on a specified future date. A futures contract creates an obligation by the seller to deliver and the buyer to take delivery of the type of instrument or cash (depending on whether the contract calls for physical delivery or cash settlement) at the time and in the amount specified in the contract. In the case of futures on an index, the seller and buyer agree to settle in cash, at a future date, based on the difference in value of the contract between the date it is opened and the settlement date. The value of each contract is equal to the value of the index from time to time multiplied by a specified dollar amount. For example, S&P 500® Index futures may trade in contracts with a value equal to $250 multiplied by price of the S&P 500® Index.

When a trader, such as the Fund, enters into a futures contract, it is required to deposit with (or for the benefit of) its broker as “initial margin” an amount of cash or short-term, high-quality/liquid securities (such as U.S. Treasury bills or high-quality tax-exempt bonds acceptable to the broker) equal to approximately 2% to 5% of the delivery or settlement price of the contract (depending on applicable exchange rules). Initial margin is held to secure the performance of the holder of the futures contract. As the value of the contract changes, the value of futures contract positions increases or declines. At the end of each trading day, the amount of such increase and decline is received and paid respectively by and to the holders of these positions. The amount received or paid is known as “variation margin.”

The gain or loss on a futures position is equal to the net variation margin received or paid over the time the position is held, plus or minus the amount received or paid when the position is closed, minus brokerage commissions and other transaction costs. Should the value of the assets in the margin account drop below the minimum amount required to be maintained, or “maintenance margin,” the Fund will be required to deposit additional assets to the account.
Although many futures contracts call for the delivery (or acceptance) of the specified instrument, futures are usually closed out before the settlement date through the purchase (or sale) of an offsetting contract. If the price of the sale of the futures contract by the Fund is less than the price of the offsetting purchase, the Fund will realize a loss. A futures sale is closed by purchasing a futures contract for the same aggregate amount of the specific type of financial instrument or commodity and with the same delivery date. Similarly, a futures purchase is closed by the purchaser selling an offsetting futures contract.

Futures contract prices, and the prices of the related contracts in which the Fund may trade, may be highly volatile. Such prices are influenced by, among other things: changing supply and demand relationships; government trade, fiscal, monetary and exchange control programs and policies; national and international political and economic events; and changes in interest rates. In addition, governments from time to time intervene, directly and by regulation, in these markets, with the specific intention of influencing such prices. The effect of such intervention is often heightened by a group of governments acting in concert.

Furthermore, the low margin deposits normally required in futures trading permit an extremely high degree of leverage. Accordingly, a relatively small price movement in a futures contract can result in immediate and substantial losses to the investor. As an added risk in these volatile and highly leveraged markets, it is not always possible to liquidate futures positions to prevent further losses or recognize unrealized gains. Illiquidity can arise due to daily price limits taking effect or to market disruptions. Futures positions may be illiquid because certain commodity exchanges limit fluctuations in certain futures contract prices during a single day by regulations referred to as “daily price fluctuation limits” or “daily limits.” Under such daily limits, during a single trading day no trades may be executed at prices beyond the daily limits. Once the price of a particular futures contract has increased or decreased by an amount equal to the daily limit, positions in that contract can neither be taken nor liquidated unless traders are willing to effect trades at or within the limit. Futures prices have occasionally moved beyond the daily limits for several consecutive days with little or no trading. The potential inability to liquidate futures positions creates the possibility of the Fund being unable to control its losses. If the Fund were to borrow money to use for trading purposes, the effects of such leverage would be magnified. Cash posted as margin in connection with the Fund’s futures contracts will not be available to the Fund for investment or other purposes.

Funds that invest in futures contracts may be subject to risks related to rolling. When investing in futures contracts, a Fund will generally seek to “roll” its futures positions rather than hold them through expiration. In some circumstances, the prices of futures contracts with near-term expirations are lower than the prices of similar futures contracts with longer-term expirations, resulting in a cost to “roll” the futures contracts. The actual realization of a potential roll cost will depend on the difference in prices of futures contracts with near- and longer-term expirations, and the rolling of futures positions may result in losses to a Fund.

Indexed Futures Contracts

In the case of futures on an index, the seller and buyer agree to settle in cash, at a future date, based on the difference in value of the contract between the date it is opened and the settlement date. The value of each contract is equal to the value of the index from time to time multiplied by a specified dollar amount. For example, S&P 500® Index futures may trade in contracts with a value equal to $250 multiplied by the price of the S&P 500® Index. The price of index futures may not correlate perfectly with movement in the relevant index due to certain market distortions. One such distortion stems from the fact that all participants in the futures market are subject to margin deposit and maintenance requirements. Rather than meeting additional margin deposit requirements, investors may close futures contracts through offsetting transactions, which could distort the normal relationship between the index and futures markets. Another market distortion results from the deposit requirements in the futures market being less onerous than margin requirements in the securities market, and as a result the futures market may attract more speculators than does the securities market. A third distortion is caused by the fact that trading hours for foreign stock index futures may not correspond perfectly to hours of trading on the foreign exchange to which a particular foreign stock index futures contract relates. This may result in a disparity between the price of index futures and the value of the relevant index due to the lack of continuous arbitrage between the index futures price and the value of the underlying index.
Finally, hedging transactions using stock indices involve the risk that movements in the price of the index may not correlate with price movements of the particular portfolio securities being hedged.

**Options**

Options transactions may involve the Fund’s buying or writing (selling) options on securities, futures contracts, securities indices (including futures on securities indices) or currencies. The Fund may engage in these transactions either to enhance investment return or to hedge against changes in the value of other assets that it owns or intends to acquire. Options can generally be classified as either “call” or “put” options. There are two parties to a typical options transaction: the “writer” (seller) and the “buyer.” A call option gives the buyer the right to buy a security or other asset (such as an amount of currency or a futures contract) from, and a put option gives the buyer the right to sell a security or other asset to, the option writer at a specified price, on or before a specified date. The buyer of an option pays a premium when purchasing the option, which reduces the return (by the amount of such premium) on the underlying security or other asset if the option is exercised, and results in a loss (equal to the amount of such premium) if the option expires unexercised. The writer of an option receives a premium from writing an option, which may increase its return if the option expires or is closed out at a profit. An “American-style” option allows exercise of the option at any time during the term of the option. A “European-style” option allows an option to be exercised only at a specific time or times, such as the end of its term. Options may be traded on or off an established securities or options exchange.

If the holder (writer) of an option wishes to terminate its position, it may seek to effect a closing sale transaction by selling (buying) an option identical to the option previously purchased. The effect of the purchase is that the previous option position will be canceled. The Fund will realize a profit from closing out an option if the price received for selling the offsetting position is more than the premium paid to purchase the option; the Fund will realize a loss from closing out an option transaction if the price received for selling the offsetting option is less than the premium paid to purchase the option. Since premiums on options having an exercise price close to the value of the underlying securities or futures contracts usually have a time value component (i.e., a value that diminishes as the time within which the option can be exercised grows shorter), the value of an options contract may change as a result of the lapse of time even though the value of the futures contract or security underlying the option (and of the security or other asset deliverable under the futures contract) has not changed. As an alternative to purchasing call and put options on index futures, the Fund may purchase or sell call or put options on the underlying indices themselves. Such options would be used in a manner similar to the use of options on index futures.

**Options on Indices**

The Fund may transact in options on indices (“index options”). Put and call index options are similar to puts and calls on securities or futures contracts except that all settlements are in cash and gain or loss at expiration depends on changes in the index in question rather than on price movements in individual securities or futures contracts. When the Fund writes an index call option, it receives a premium and undertakes the obligation that, prior to the expiration date (or, upon the expiration date for European-style options), the purchaser of the call, upon exercise of the call, will receive from the Fund an amount of cash if the exercise settlement value of the relevant index is greater than the exercise price of the call. The manner of determining “exercise settlement value” for a particular option series is fixed by the options market on which the series is traded. S&P 500® Index options, for example, have a settlement value that is calculated using the opening sales price in the primary market of each component security on the last business day (usually a Friday) before the expiration date. The amount of cash is equal to the difference between the exercise settlement value of the index and the exercise price of the call times a specified multiple (“multiplier”). When the Fund buys an index call option, it pays a premium and has the same rights as to such call as are indicated above. When the Fund buys an index put option, it pays a premium and has the right, prior to the expiration date (or upon the expiration date for European-style options), to collect, upon the Fund’s exercise of the put, an amount of cash equal to the difference between the exercise price of the option and the exercise settlement value of the index, times a multiplier, similar to that described above for calls, if the exercise settlement value is less than the exercise price. When the Fund writes an index put option, it receives a premium and the purchaser of the put has the right, prior to the expiration date, to require the Fund to deliver to it an amount of cash equal to the difference between the exercise settlement value of the index and exercise price times the multiplier if the closing level is less than the exercise price.
**Exchange-Traded and Over-the-Counter Options**

The Fund may purchase or write both exchange-traded and OTC options. OTC options differ from exchange-traded options in that they are two-party contracts, with price and other terms negotiated between buyer and seller, and generally do not have as much market liquidity as exchange-traded options.

An exchange-traded option may be closed out before its scheduled maturity only on an exchange that generally provides a liquid secondary market for an option of the same series. If a liquid secondary market for an exchange-traded option does not exist, it might not be possible to effect a closing transaction with respect to a particular option. Reasons for the absence of a liquid secondary market on an exchange include the following: (i) there may be insufficient trading interest in certain options; (ii) restrictions may be imposed by an exchange on opening transactions or closing transactions or both; (iii) trading halts, suspensions or other restrictions may be imposed with respect to particular classes or series of options or underlying securities; (iv) unusual or unforeseen circumstances may interrupt normal operations on an exchange; (v) the facilities of an exchange or the Options Clearing Corporation (“OCC”) or other clearing organization may not at all times be adequate to handle current trading volume; or (vi) one or more exchanges could, for economic or other reasons, decide or be compelled at some future date to discontinue the trading of options (or a particular class or series of options), in which event the secondary market on that exchange (or in that class or series of options) would cease to exist, although outstanding options on that exchange that had been issued by the OCC as a result of trades on that exchange would continue to be exercisable in accordance with their terms.

An OTC option (an option not traded on an established exchange) may be closed out before its scheduled maturity only by agreement with the other party to the original option transaction. With OTC options, the Fund is at risk that the other party to the transaction will default on its obligations or will not permit the Fund to terminate the transaction before its scheduled maturity. While the Fund will seek to enter into OTC options only with dealers who agree to or are expected to be capable of entering into closing transactions with the Fund, there can be no assurance that the Fund will be able to liquidate an OTC option at a favorable price at any time prior to its expiration. OTC options are not subject to the protections afforded purchasers of listed options by the OCC or other clearing organizations.

**Swap Transactions**

The Fund may enter into a variety of swap agreements, including, but not limited to, interest rate, index, commodity, equity-linked, credit default, credit-linked and currency exchange swaps. Depending on the structure of the swap agreement, the Fund may enter into swap transactions to preserve a return or spread on a particular investment or portion of its portfolio, to gain exposure to one or more securities, currencies, commodities or interest rates, to protect against or attempt to take advantage of currency fluctuations, to protect against any increase in the price of securities that the Fund anticipates purchasing at a later date, to efficiently gain exposure to certain markets to add economic leverage to the Fund’s portfolio or to shift the Fund’s investment exposure from one type of investment to another.

Swap agreements are two-party contracts entered into primarily by institutional investors for periods ranging from a few weeks to a number of years. Swap agreements are individually negotiated and structured to include exposure to a variety of types of investments or market factors. In a standard “swap” transaction, two parties agree to exchange the returns (or differentials in rates of return) earned or realized on particular predetermined investments or instruments, which may be adjusted for an interest factor. The gross returns to be exchanged or “swapped” between the parties generally are calculated with respect to a “notional amount,” such as the return on or increase in value of a particular dollar amount invested at a particular interest rate or in a “basket” of securities representing a particular index. In a typical interest rate swap, for example, one party agrees to make regular payments equal to a floating interest rate times a “notional principal amount,” in return for payments equal to a fixed rate times the same amount, for the term of the swap agreement. The “notional principal amount” of a swap transaction is the agreed-upon basis for calculating the payments that the parties agree to exchange (i.e., the return on or increase in value of a particular dollar amount invested at a particular interest rate) in a particular foreign currency or commodity or in a “basket” of securities. Under most swap agreements, payments by the parties will be exchanged on a “net basis,” and a party will receive or pay, as the case may be, only the net amount of the two payments.
Swap agreements are sophisticated financial instruments that typically involve a small investment of cash relative to the magnitude of risks assumed. Swaps can be highly volatile and may have a considerable impact on the Fund’s performance, as the potential gain or loss on any swap transaction is not subject to any fixed limit. The Fund’s successful use of swap agreements will depend on the Subadviser’s ability to predict correctly whether certain types of investments are likely to produce greater returns than other investments. Because swaps are two-party contracts that may be subject to contractual restrictions on transferability and termination and because they may have terms of greater than seven days, swap agreements may be considered to be illiquid. If a swap is not liquid, it may not be possible to initiate a transaction or liquidate a position at an advantageous time or price, which may result in significant losses. The Fund may also suffer losses if it is unable to terminate (or terminate at the time and price desired) outstanding swap agreements (either by assignment or other disposition) or reduce its exposure through offsetting transactions.

The Fund bears the risk of loss of the amount expected to be received under a swap agreement in the event of the default or bankruptcy of a swap agreement counterparty. When a counterparty’s obligations are not fully secured by collateral, then the Fund is essentially an unsecured creditor of the counterparty. If a counterparty’s credit becomes significantly impaired, multiple requests for collateral posting in a short period of time could increase the risk that a Fund may not receive adequate collateral or that the counterparty may default. If the counterparty defaults, the Fund will have contractual remedies, but there is no assurance that a counterparty will be able to meet its obligations pursuant to such contracts or that, in the event of default, the Fund will succeed in enforcing contractual remedies. Credit/counterparty risk still exists even if a counterparty’s obligations are secured by collateral because the Fund’s interest in collateral may not be perfected or additional collateral may not be promptly posted as required. Credit/counterparty risk also may be more pronounced if a counterparty’s obligations exceed the amount of collateral held by the Fund (if any), the Fund is unable to exercise its interest in collateral upon default by the counterparty, or the termination value of the instrument varies significantly from the marked-to-market value of the instrument.

Credit/counterparty risk with respect to derivatives is being affected by new rules and regulations affecting the derivatives market. Some derivatives transactions are required to be centrally cleared, and a party to a cleared derivatives transaction is subject to the credit/counterparty risk of the clearing house and the clearing member through which it holds its cleared position, rather than the credit/counterparty risk of its original counterparty to the derivative transaction. Credit/counterparty risk of market participants with respect to derivatives that are centrally cleared is concentrated in a few clearing houses, and it is not clear how an insolvency proceeding of a clearing house would be conducted and what impact an insolvency of a clearing house would have on the financial system. A clearing member is obligated by contract and by applicable regulation to segregate all funds received from customers with respect to cleared derivatives transactions from the clearing member’s proprietary assets. However, all funds and other property received by a clearing broker from its customers generally are held by the clearing broker on a commingled basis in an omnibus account, and the clearing member may invest those funds in certain instruments permitted under the applicable regulations. The assets of the Fund might not be fully protected in the event of the bankruptcy of the Fund’s clearing member, because the Fund would be limited to recovering only a pro rata share of all available funds segregated on behalf of the clearing broker’s customers for a relevant account class. Also, the clearing member is required to transfer to the clearing organization the amount of margin required by the clearing organization for cleared derivatives, which amounts generally are held in an omnibus account at the clearing organization for all customers of the clearing member. Regulations promulgated by the CFTC require that the clearing member notify the clearing house of the amount of initial margin provided by the clearing member to the clearing organization that is attributable to each customer. However, if the clearing member does not provide accurate reporting, the Fund is subject to the risk that a clearing organization will use the Fund’s assets held in an omnibus account at the clearing organization to satisfy payment obligations of a defaulting customer of the clearing member to the clearing organization. In addition, clearing members generally provide to the clearing organization the net amount of variation margin required for cleared swaps for all of its customers in the aggregate, rather than the gross amount of each customer. The Fund is therefore subject to the risk that a clearing organization will not make variation margin payments owed to the Fund if another customer of the clearing member has suffered a loss and is in default, and the risk that the Fund will be required to provide additional variation margin to the clearing house before the clearing house will move the Fund’s cleared derivatives transactions to another clearing member. In addition, if a clearing member does not comply with the applicable regulations or its agreement with the Fund, or in the event of fraud or misappropriation of customer assets by a clearing member, the Fund could have only an unsecured creditor claim in an insolvency of the clearing member with respect to the margin held by the clearing member.
Additionally, U.S. regulators, the European Union and certain other jurisdictions have adopted minimum margin and capital requirements for uncleared OTC derivatives transactions. These rules impose minimum margin requirements on derivatives transactions between the Fund and its swap counterparties and may increase the amount of margin the Fund is required to provide. They also impose regulatory requirements on the timing of transferring margin. They also effectively require changes to typical derivatives margin documentation. Variation margin requirements became effective in 2017 and initial margin requirements are expected to become effective with respect to certain funds by 2020.

The Fund may also enter into swaptions. The Fund may engage in swaptions for hedging purposes or to manage and mitigate credit and interest rate risk. The Fund may write (sell) and purchase put and call swaptions. The use of swaptions involves risks, including, among others, (i) imperfect correlation between movements of the price of the swaptions and the price of the securities, indices or other assets serving as reference instruments for the swaption, reducing the effectiveness of the instrument for hedging or investment purposes, (ii) the absence of a liquid market to sell a swaption, which could result in difficulty closing a position, (iii) the exacerbation of losses incurred due to changes in the market value of the securities to which they relate, and (iv) credit/counterparty risk.

**Credit Default Swaps**

The Fund may enter into credit default swap agreements, which may have as reference obligations one or more debt securities or an index of such securities. In a credit default swap, one party (the “protection buyer”) is obligated to pay the other party (the “protection seller”) a stream of payments over the term of the contract, provided that no credit event, such as a default or a downgrade in credit rating, occurs on the reference obligation. If a credit event occurs, the protection seller must generally pay the protection buyer the “par value” (the agreed-upon notional value) of the referenced debt obligation in exchange for an equal face amount of deliverable reference obligations or a specified amount of cash, depending upon the terms of the swap.

The Fund may be either the protection buyer or protection seller in a credit default swap. If the Fund is a protection buyer, such Fund would pay the counterparty a periodic stream of payments over the term of the contract and would not recover any of those payments if no credit event were to occur. However, if a credit event occurs, the Fund that is a protection buyer has the right to deliver the referenced debt obligations or a specified amount of cash, depending on the terms of the swap, and receive the par value of such debt obligations from the counterparty protection seller. As a protection seller, the Fund would receive fixed payments throughout the term of the contract if no credit event occurs. If a credit event occurs, however, the value of the obligation received by the Fund (e.g., bonds which defaulted), plus the periodic payments previously received, may be less than the par value of the obligation, or cash received, resulting in a loss to the protection seller. Furthermore, the Fund that is a protection seller would effectively add leverage to its portfolio because such Fund will have investment exposure to the notional amount of the swap.

Credit default swap agreements are subject to greater risk than a direct investment in the reference obligation. Like all swap agreements, credit default swaps are subject to liquidity, credit and counterparty risks. The notional value of credit default swaps with respect to a particular investment is often larger than the total par value of such investment outstanding and, in event of a default, there may be difficulties in making the required deliveries of the reference investments, possibly delaying payments.

The Fund generally may exit its obligations under a credit default swap only by terminating the contract and paying applicable breakage fees, or by entering into an offsetting credit default swap position, which may cause the Fund to incur losses.

**Investment Pools of Swap Contracts**

The Fund may invest in publicly or privately issued interests in investment pools whose underlying assets are credit default, credit-linked, interest rate, currency exchange, equity-linked or other types of swap contracts and related underlying securities or securities loan agreements. The pools’ investment results may be designed to correspond generally to the performance of a specified securities index or “basket” of securities, or sometimes a single security.
These types of pools are often used to gain exposure to multiple securities with less of an investment than would be required to invest directly in the individual securities. They may also be used to gain exposure to foreign securities markets without investing in the foreign securities themselves and/or the relevant foreign market. To the extent that the Fund invests in pools of swap contracts and related underlying securities or securities loan agreements whose performance corresponds to the performance of a foreign securities index or one or more of foreign securities, investing in such pools will involve risks similar to the risks of investing in foreign securities. See the section “Foreign Securities” below. In addition to the risks associated with investing in swaps generally, an investing Fund bears the risks and costs generally associated with investing in pooled investment vehicles, such as paying the fees and expenses of the pool and the risk that the pool or the operator of the pool may default on its obligations to the holder of interests in the pool, such as the Fund. Interests in privately offered investment pools of swap contracts may be considered illiquid and, except to the extent that such interests are deemed liquid under the Fund’s policies, subject to the Fund’s restriction on investments in illiquid securities.

Swap Execution Facilities (“SEF”)

Certain derivatives contracts are required to be executed through SEFs. A SEF is a trading platform where multiple market participants can execute derivatives by accepting bids and offers made by multiple other participants in the platform. Such requirements may make it more difficult and costly for investment funds, such as the Fund, to enter into highly tailored or customized transactions. Trading swaps on a SEF may offer certain advantages over traditional bilateral OTC trading, such as ease of execution, price transparency, increased liquidity and/or favorable pricing. Execution through a SEF is not, however, without additional costs and risks, as parties are required to comply with SEF and CFTC rules and regulations, including disclosure and recordkeeping obligations, and SEF rights of inspection, among others. SEFs typically charge fees, and if the Fund executes derivatives on a SEF through a broker intermediary, the intermediary may impose fees as well. The Fund also may be required to indemnify a SEF, or a broker intermediary who executes swaps on a SEF on the Fund’s behalf, against any losses or costs that may be incurred as a result of the Fund’s transactions on the SEF. In addition, the Fund may be subject to execution risk if it enters into a derivatives transaction that is required to be cleared, and no clearing member is willing to clear the transaction on the Fund’s behalf. In that case, the transaction might have to be terminated, and the Fund could lose some or all of the benefit of any increase in the value of the transaction after the time of the trade. Similar “trade execution” regulations are being implemented in the European Union.

Structured Notes

The Fund may invest in a broad category of instruments known as “structured notes.” These instruments are debt obligations issued by industrial corporations, financial institutions or governmental or international agencies. Traditional debt obligations typically obligate the issuer to repay the principal plus a specified rate of interest. Structured notes, by contrast, obligate the issuer to pay amounts of principal or interest that are determined by reference to changes in some external factor or factors, or the principal and interest rate may vary from the stated rate because of changes in these factors. For example, the issuer’s obligations could be determined by reference to changes in the value of a commodity (such as gold or oil) or commodity index, a foreign currency, an index of securities (such as the S&P 500® Index) or an interest rate (such as the U.S. Treasury bill rate). In some cases, the issuer’s obligations are determined by reference to changes over time in the difference (or “spread”) between two or more external factors (such as the U.S. prime lending rate and the total return of the stock market in a particular country, as measured by a stock index). In some cases, the issuer’s obligations may fluctuate inversely with changes in an external factor or factors (for example, if the U.S. prime lending rate goes up, the issuer’s interest payment obligations are reduced). In some cases, the issuer’s obligations may be determined by some multiple of the change in an external factor or factors (for example, three times the change in the U.S. Treasury bill rate). In some cases, the issuer’s obligations remain fixed (as with a traditional debt instrument) so long as an external factor or factors do not change by more than the specified amount (for example, if the value of a stock index does not exceed some specified maximum), but if the external factor or factors change by more than the specified amount, the issuer’s obligations may be sharply reduced.

Structured notes include, but are not limited to, equity-linked notes. An equity-linked note is a note whose performance is tied to a single stock, a basket of stocks, or a stock index. Equity-linked notes combine the principal protection normally associated with fixed-income securities with the potential for capital appreciation normally associated with equity securities. Upon the maturity of the note, the holder generally receives a return of principal based on the capital appreciation of the linked securities. Depending on the terms of the note, equity-linked notes may also have a “cap”
or “floor” on the principal amount to be repaid to holders, irrespective of the performance of the linked securities. For example, a note may guarantee the repayment of the original principal amount invested (even if the linked securities have negative performance during the note’s term), but may cap the maximum payment at maturity at a certain percentage of the issuance price or the return of the linked securities. Alternatively, the note may not guarantee a full return on the original principal, but may offer a greater participation in any capital appreciation of the linked securities. The terms of an equity-linked note may also provide for periodic interest payments at either a fixed or floating rate.

Structured notes can serve many different purposes in the management of the Fund. For example, they can be used to increase the Fund’s exposure to changes in the value of assets that the Fund would not ordinarily purchase directly (such as commodities or stocks traded in a market that is not open to U.S. investors). They can also be used to hedge the risks associated with other investments the Fund holds. For example, if a structured note has an interest rate that fluctuates inversely with general changes in a country’s stock market index, the value of the structured note would generally move in the opposite direction to the value of holdings of stocks in that market, thus moderating the effect of stock market movements on the value of the Fund’s portfolio as a whole.

Structured notes involve special risks. As with any debt obligation, structured notes involve the risk that the issuer will become insolvent or otherwise default on its payment obligations. This risk is in addition to the risk that the issuer’s obligations (and thus the value of the Fund’s investment) will be reduced because of adverse changes in the external factor or factors to which the obligations are linked. The value of structured notes will in many cases be more volatile (that is, will change more rapidly or severely) than the value of traditional debt instruments. Volatility will be especially high if the issuer’s obligations are determined by reference to some multiple of the change in the external factor or factors. Many structured notes have limited or no liquidity, so that the Fund would be unable to dispose of the investment prior to maturity. As with all investments, successful use of structured notes depends in significant part on the accuracy of the Subadviser’s analysis of the issuer’s creditworthiness and financial prospects, and of the Subadviser’s forecast as to changes in relevant economic and financial market conditions and factors. In instances where the issuer of a structured note is a foreign entity, the usual risks associated with investments in foreign securities (described below) apply. Structured notes may be considered derivative securities.

The Fund’s use of commodity-linked structured notes will potentially be limited by the Fund’s intention to qualify as a RIC, and will potentially bear on the Fund’s ability to so qualify. The tax treatment of certain commodity-linked instruments including structured notes in which the Fund might invest is not certain, in particular with respect to whether income or gains from such instruments constitute qualifying income to a RIC. If the Fund were to treat income or gain from a particular instrument as qualifying income and the income or gain were later determined not to constitute qualifying income and, together with any other non-qualifying income, caused the Fund’s non-qualifying income to exceed 10% of its gross income in any taxable year, the Fund would fail to qualify as a RIC unless it is eligible to and does pay a tax at the Fund level.

Credit/Counterparty Risk

The Fund will be exposed to the credit/counterparty risk of the counterparties with which, or the brokers, dealers and exchanges through which, it deals, whether it engages in exchange traded or off-exchange transactions. Transactions entered into by the Fund may be executed on various U.S. and non-U.S. exchanges, and may be cleared and settled through various clearing houses, custodians, depositories and prime brokers throughout the world. There can be no assurance that a failure by any such entity will not lead to a loss to the Fund. To the extent the Fund engages in cleared derivatives transactions, it will be subject to the credit risk of the clearing house and the clearing member through which it holds its cleared position. If the Fund engages in cleared futures transactions, it will also be exposed to the credit risk of its futures commission merchant (“FCM”). If the Fund’s FCM becomes bankrupt or insolvent, or otherwise defaults on its obligations to the Fund, the Fund may not receive all amounts owed to it in respect of its trading, even if the clearing house fully discharges all of its obligations. The Commodity Exchange Act (the “CEA”) requires a FCM to segregate all funds received from its customers with respect to regulated futures transactions from such FCM’s proprietary funds. If a FCM were not to do so to the full extent required by law, the assets of an account might not be fully protected in the event of the bankruptcy of a FCM. Furthermore, in the event of a FCM’s bankruptcy, the Fund would be limited to recovering only a pro rata share of all available funds segregated on behalf of a FCM’s combined customer accounts, even if certain property held by a FCM is specifically traceable to the Fund.
(for example, U.S. Treasury bills deposited by the Fund). It is possible that a Fund would be unable to recover from the FCM’s estate the full amount of its funds on deposit with such FCM and owing to the Fund. Such situations could arise due to various factors, or a combination of factors, including inadequate FCM capitalization, inadequate controls on customer trading and inadequate customer capital. In addition, in the event of the bankruptcy or insolvency of a clearing house, the Fund might experience a loss of funds deposited through its FCM as margin with the clearing house, a loss of unrealized profits on its open positions and the loss of funds owed to it as realized profits on closed positions. Such a bankruptcy or insolvency might also cause a substantial delay before the Fund could obtain the return of funds owed to it by a FCM who is a member of such clearing house.

The Fund may also engage in bilateral (OTC) derivative transactions, which are not centrally cleared. Because bilateral derivative and other transactions are traded between counterparties based on contractual relationships, the Fund is subject to the risk that a counterparty will not perform its obligations under the related contracts. Although the Fund intends to enter into transactions only with counterparties which the Advisor believes to be creditworthy, there can be no assurance that a counterparty will not default and that the Fund will not sustain a loss on a transaction as a result. In situations where the Fund is required to post margin or other collateral with a counterparty, the counterparty may fail to segregate the collateral or may commingle the collateral with the counterparty’s own assets. As a result, in the event of the counterparty’s bankruptcy or insolvency, the Fund’s collateral may be subject to conflicting claims of the counterparty’s creditors, and the Fund may be exposed to the risk of a court treating the Fund as a general unsecured creditor of the counterparty, rather than as the owner of the collateral.

The Fund is subject to the risk that issuers of the instruments in which it invests and trades may default on their obligations under those instruments, and that certain events may occur that have an immediate and significant adverse effect on the value of those instruments and any derivatives whose value is based on such instruments. There can be no assurance that an issuer of an instrument in which the Fund invests will not default, or that an event that has an immediate and significant adverse effect on the value of an instrument will not occur, and that the Fund will not sustain a loss on a transaction as a result.

As described above, in the event of a counterparty’s (or its affiliate’s) insolvency, a Fund’s ability to exercise remedies could be stayed or eliminated under new special resolution regimes adopted in the United States, the European Union and various other jurisdictions. Such regimes provide government authorities with broad authority to intervene when a financial institution is experiencing financial difficulty and may prohibit the Fund from exercising termination rights based on the financial institution’s insolvency. Transactions entered into by a Fund may be executed on various U.S. and non-U.S. exchanges, and may be cleared and settled through various clearing houses, custodians, depositories and prime brokers throughout the world. Although the Fund attempt to execute, clear and settle the transactions through entities the Advisor believes to be sound, there can be no assurance that a failure by any such entity will not lead to a loss to a Fund.

Certain Additional Risks of Derivative Instruments

As described in the Prospectus, the Fund intends to use derivative instruments, including several of the instruments described above, to seek to enhance investment returns as well as for risk management purposes. Although the Subadviser may seek to use these transactions to achieve the Fund’s investment goals, no assurance can be given that the use of these transactions will achieve this result. Any or all of these investment techniques may be used at any time. The ability of the Fund to utilize these derivative instruments successfully will depend on the Subadviser’s ability to predict pertinent market movements, which cannot be assured. Furthermore, the Fund’s use of certain derivatives may in some cases involve forms of financial leverage, which involves risk and may increase the volatility of the Fund’s NAV. Leveraging may cause the Fund to liquidate portfolio positions to satisfy its obligations or to meet segregation requirements when it may not be advantageous to do so. To the extent that the Fund is not able to close out a leveraged position because of market illiquidity, its liquidity may be impaired to the extent that it has a substantial portion of liquid assets segregated or earmarked to cover obligations. The Fund will comply with applicable regulatory requirements when implementing these strategies, techniques and instruments. Use of derivatives for other than hedging purposes may be considered a speculative activity, involving greater risks than are involved in hedging. A short exposure through a derivative may present additional risks. If the value of the asset, asset class or index on which the Fund has obtained a short exposure increases, the Fund will incur a loss. Moreover, the potential loss from a short exposure is theoretically unlimited.
The value of some derivative instruments in which the Fund invests may be particularly sensitive to changes in prevailing interest rates or other economic factors and the ability of the Fund to successfully utilize these instruments may depend in part upon the ability of the Subadviser to forecast interest rates and other economic factors correctly. If the Subadviser incorrectly forecasts such factors and has taken positions in derivative instruments contrary to prevailing market trends, the Fund could be exposed to the risk of loss. If the Subadviser incorrectly forecasts interest rates, market values or other economic factors in using a derivatives strategy for the Fund, the Fund might have been in a better position if it had not entered into the transaction at all. Also, suitable derivative transactions may not be available in all circumstances. The use of these strategies involves certain special risks, including a possible imperfect correlation, or even no correlation, between price movements of derivative instruments and price movements of related investments. While some strategies involving derivative instruments can reduce the risk of loss, they can also reduce the opportunity for gain or even result in losses by offsetting favorable price movements in related investments or otherwise, due to the possible inability of the Fund to purchase or sell a portfolio security at a time that otherwise would be favorable or the possible need to sell a portfolio security at a disadvantageous time because the Fund is required to maintain asset coverage or offsetting positions in connection with transactions in derivative instruments, and the possible inability of the Fund to close out or to liquidate its derivatives positions. In addition, the Fund’s use of such instruments may cause the Fund to realize higher amounts of short-term capital gains (generally taxed at ordinary income tax rates) than if it had not used such instruments. To the extent that the Fund gains exposure to an asset class using derivative instruments backed by a collateral portfolio of other securities, changes in the value of those other securities may result in greater or lesser exposure to that asset class than would have resulted from a direct investment in securities comprising that asset class.

Although the Subadviser may seek to use these transactions to achieve the Fund’s investment goals, no assurance can be given that the use of derivatives transactions will achieve this result. One risk arises because of the imperfect correlation between movements in the price of derivatives contracts and movements in the price of the securities, indices or other assets serving as reference instruments for the derivative. The Fund’s derivative strategies will not be fully effective unless the Fund can compensate for such imperfect correlation. There is no assurance that the Fund will be able to effect such compensation. For example, the correlation between the price movement of the derivatives contract and the hedged security may be distorted due to differences in the nature of the relevant markets. If the price of the futures contract moves more than the price of the hedged security, the Fund would experience either a loss or a gain on the derivative that is not completely offset by movements in the price of the hedged securities. For example, in an attempt to compensate for imperfect price movement correlations, the Fund may purchase or sell futures contracts in a greater dollar amount than the hedged securities if the price movement volatility of the hedged securities is historically greater than the volatility of the futures contract. Conversely, the Fund may purchase or sell futures contracts in a smaller dollar amount than the hedged securities if the volatility of the price of hedged securities is historically less than that of the futures contracts. The use of derivatives for other than hedging purposes may be considered a speculative activity, and involves greater risks than are involved in hedging. With respect to certain derivative transactions (e.g. short positions in which the Fund does not hold the instrument to which the short position relates), the potential risk of loss to the Fund is theoretically unlimited.

The price of index futures may not correlate perfectly with movement in the relevant index due to certain market distortions. One such distortion stems from the fact that all participants in the futures market are subject to margin deposit and maintenance requirements. Rather than meeting additional margin deposit requirements, investors may close futures contracts through offsetting transactions, which could distort the normal relationship between the index and futures markets. Another market distortion results from the deposit requirements in the futures market being less onerous than margin requirements in the securities market, and as a result the futures market may attract more speculators than does the securities market. A third distortion is caused by the fact that trading hours for foreign stock index futures may not correspond perfectly to hours of trading on the foreign exchange to which a particular foreign stock index futures contract relates. This may result in a disparity between the price of index futures and the value of the relevant index due to the lack of continuous arbitrage between the index futures price and the value of the underlying index. Finally, hedging transactions using stock indices involve the risk that movements in the price of the index may not correlate with price movements of the particular portfolio securities being hedged.

Price movement correlation in derivative transactions also may be distorted by the illiquidity of the derivatives markets and the participation of speculators in such markets. If an insufficient number of contracts are traded, commercial
users may not deal in derivatives because they do not want to assume the risk that they may not be able to close out their positions within a reasonable amount of time. In such instances, derivatives market prices may be driven by different forces than those driving the market in the underlying securities, and price spreads between these markets may widen. The participation of speculators in the market enhances its liquidity. Nonetheless, the presence of speculators may create temporary price distortions unrelated to the market in the underlying securities.

Positions in futures contracts and options on futures contracts may be established or closed out only on an exchange or board of trade. There is no assurance that a liquid market on an exchange or board of trade will exist for any particular contract or at any particular time. The liquidity of markets in futures contracts and options on futures contracts may be adversely affected by “daily price fluctuation limits” established by commodity exchanges that limit the amount of fluctuation in a future or options price during a single trading day. Once the daily limit has been reached in a contract, no trades may be entered into at a price beyond the limit, which may prevent the liquidation of open futures or options positions. Prices have in the past exceeded the daily limit on a number of consecutive trading days. If there is not a liquid market at a particular time, it may not be possible to close a futures or options position at such time, and, in the event of adverse price movements, the Fund would continue to be required to make daily cash payments of variation margin. However, if futures or options are used to hedge portfolio securities, an increase in the price of the securities, if any, may partially or completely offset losses on the futures contract.

Income earned by the Fund from its options activities generally will be treated as capital gain and, if not offset by net recognized capital losses incurred by the Fund, will be distributed to shareholders in taxable distributions. Although gain from options transactions may hedge against a decline in the value of the Fund’s portfolio securities, that gain, to the extent not offset by losses, will be distributed in light of certain tax considerations and will constitute a distribution of that portion of the value preserved against decline.

The value of the Fund’s derivative instruments may fluctuate based on a variety of market and economic factors. In some cases, the fluctuations may offset (or be offset by) changes in the value of securities or derivatives held in the Fund’s portfolio. All transactions in derivatives involve the possible risk of loss to the Fund of all or a significant part of the value of its investment. In some cases, the risk of loss may exceed the amount of the Fund’s investment. When the Fund writes a call option or sells a futures contract without holding the underlying securities, its potential loss is unlimited.

The risks of the Fund’s use of index warrants generally are similar to those relating to its use of index options. Unlike most index options, however, index warrants are issued in limited amounts and are not obligations of a regulated clearing agency, but are backed only by the credit of the bank or other institution which issues the warrant. Also, index warrants generally have longer terms than index options. Although the Fund will normally invest only in exchange-listed warrants, index warrants are not likely to be as liquid as certain index options backed by a recognized clearing agency. In addition, the terms of index warrants may limit the Fund’s ability to exercise the warrants at such time, or in such quantities, as the Fund would otherwise wish to do.

The successful use of derivatives will depend in part on the Subadviser’s ability to forecast securities market, currency or other financial market movements correctly. For example, the Fund’s ability to hedge against adverse changes in the value of securities held in its portfolio through options and futures also depends on the degree of correlation between changes in the value of futures or options positions and changes in the values of the portfolio securities. The successful use of certain other derivatives also depends on the availability of a liquid secondary market to enable the Fund to close its positions on a timely basis. There can be no assurance that such a market will exist at any particular time. Furthermore, the Fund’s use of certain derivatives may in some cases involve forms of financial leverage, which involves risk and may increase the volatility of the Fund’s NAV. Leveraging may cause the Fund to liquidate portfolio positions to satisfy its obligations or to meet segregation requirements when it may not be advantageous to do so. To the extent the Fund is not able to close out a leveraged position because of market illiquidity, its liquidity may be impaired to the extent that it has a substantial portion of liquid assets segregated or earmarked to cover obligations.

In the case of OTC options, the Fund is at risk that the other party to the transaction will default on its obligations, or will not permit the Fund to terminate the transaction before its scheduled maturity.

The derivatives markets of some foreign countries are small compared to those of the United States and consequently are characterized in some cases by less liquidity than U.S. markets. In addition, derivatives that are traded on foreign
exchanges may not be regulated as effectively as similar transactions in the United States, may not involve a clearing mechanism and related guarantees, may be subject to less detailed reporting requirements and regulatory controls, and are subject to the risk of governmental actions affecting trading in, or the prices of, foreign securities. The value of such positions also could be adversely affected by (i) other complex foreign political, legal and economic factors, (ii) lesser availability than in the United States of data on which to make trading decisions, (iii) delays in the Fund’s ability to act upon economic events occurring in foreign markets during non-business hours in the United States, (iv) the imposition of different exercise and settlement terms and procedures and margin requirements than in the United States, and (v) lesser trading volume. Furthermore, investments in derivatives markets outside of the United States are subject to many of the same risks as other foreign investments. See the section “Foreign Securities” below.

**Risk of Government Regulation of Derivatives**

It is possible that government regulation of various types of derivative instruments, including futures and swap agreements, may limit or prevent the Fund from using such instruments as part of its investment strategy, and could ultimately prevent the Fund from being able to achieve its investment goals. It is impossible to fully predict the effects of legislation and regulation in this area, but the effects could be substantial and adverse. It is possible that legislative and regulatory activity could limit or completely restrict the ability of the Fund to use these instruments as a part of its investment strategy, increase the costs of using these instruments or make them less effective. Limits or restrictions applicable to the counterparties with which the Fund engages in derivative transactions could also prevent the Fund from using these instruments or affect the pricing or other factors relating to these instruments, or may change the availability of certain investments.

There is a possibility of future regulatory changes altering, perhaps to a material extent, the nature of an investment in the Fund or the ability of the Fund to continue to implement its investment strategies. In particular, the Dodd-Frank Act, which was signed into law on July 21, 2010, has and will continue to change the way in which the U.S. financial system is supervised and regulated. Title VII of the Dodd-Frank Act sets forth a legislative framework for OTC derivatives, such as swaps, in which the Fund may invest. Title VII of the Dodd-Frank Act has caused broad changes to the OTC derivatives market and grants significant authority to the SEC and the CFTC to regulate OTC derivatives and market participants. Pursuant to such authority, rules have been enacted that currently require clearing of many OTC derivatives transactions and may require clearing of additional OTC derivatives transactions in the future and that impose minimum margin and capital requirements for uncleared OTC derivatives transactions. Similar regulations are being adopted in other jurisdictions around the world.

These and other new rules and regulations could, among other things, further restrict the Fund’s ability to engage in, or increase the cost to the Fund of, derivatives transactions, for example, by making some types of derivatives no longer available to the Fund or otherwise limiting liquidity. The implementation of the clearing requirement generally has increased the costs of derivatives transactions for the Fund, since the Fund has to pay fees to its clearing members and is typically required to post more margin for cleared derivatives than it has historically posted for bilateral derivatives. The costs of derivatives transactions are expected to increase further as clearing members raise their fees to cover the costs of additional capital requirements and other regulatory changes applicable to the clearing members. These rules and regulations are new and evolving, so their potential impact on the Fund and the financial system are not yet known.

While the new rules and regulations and central clearing of some derivatives transactions are designed to reduce systemic risk (i.e., the risk that the interdependence of large derivatives dealers could cause them to suffer liquidity, solvency or other challenges simultaneously), there is no assurance that they will achieve that result, and in the meantime, as noted above, central clearing and related requirements expose the Fund to new kinds of costs and risks. The futures markets are subject to comprehensive statutes, regulations, and margin requirements. The SEC, CFTC and the exchanges are authorized to take extraordinary actions in the event of a market emergency, including, for example, the implementation or reduction of speculative position limits, the implementation of higher margin requirements, the establishment of daily price limits and the suspension of trading.

In addition, the SEC has issued a proposed rule under the 1940 Act providing for the regulation of registered investment companies’ use of derivatives and certain related instruments. The ultimate impact, if any, and the timing
of possible regulation remains unclear, but the proposed rule, if adopted, could, among other things, restrict the Fund’s ability to engage in derivatives transactions and/or increase the costs of such derivatives transactions such that the Fund may be unable to implement its investment strategy.

*Additional Risk Factors in Cleared Derivatives Transactions:*

Under recently adopted rules and regulations, transactions in some types of swaps (including interest rate swaps and credit default index swaps on North American and European indices) are required to be centrally cleared. In a cleared derivatives transaction, the Fund’s counterparty is a clearing house, rather than a bank or broker. Since the Fund is not a member of a clearing house and only members of a clearing house can participate directly in the clearing house, the Fund will hold cleared derivatives through accounts at clearing members. In cleared derivatives transactions, the Fund will make payments (including margin payments) to and receive payments from a clearing house through their accounts at clearing members. Clearing members guarantee performance of their clients’ obligations to the clearing house.

In some ways, centrally cleared derivative arrangements are less favorable to the Fund than bilateral arrangements. For example, the Fund may be required to provide greater amounts of margin for cleared derivatives transactions than for bilateral derivatives transactions. Also, in contrast to bilateral derivatives transactions, following a period of notice to the Fund, a clearing member generally can require termination of existing cleared derivatives transactions at any time or increases in margin requirements above the margin that the clearing member required at the beginning of a transaction. Clearing houses also have broad rights to increase margin requirements for existing transactions or to terminate transactions at any time. Any increase in margin requirements or termination by the clearing member or the clearing house could interfere with the ability of the Fund to pursue its investment strategy. Further, any increase in margin requirements by a clearing member could also expose the Fund to greater credit risk to its clearing member, because margin for cleared derivatives transactions in excess of clearing house margin requirements typically is held by the clearing member. Also, the Fund is subject to risk if it enters into a derivatives transaction that is required to be cleared (or that the Subadviser expects to be cleared), and no clearing member is willing or able to clear the transaction on the Fund’s behalf. While the documentation in place between the Fund and its clearing members generally provides that the clearing members will accept for clearing all transactions submitted for clearing that are within credit limits (specified in advance) for the Fund, the Fund is still subject to the risk that no clearing member will be willing or able to clear a transaction. In those cases, the transaction might have to be terminated, and the Fund could lose some or all of the benefit of the transaction, including loss of an increase in the value of the transaction and/or loss of hedging protection offered by the transaction. In addition, the documentation governing the relationship between the Fund and the clearing members is developed by the clearing members and generally is less favorable to the Fund than typical bilateral derivatives documentation. For example, this documentation generally includes a one-way indemnity by the Fund in favor of the clearing member, indemnifying the clearing member against losses it incurs in connection with acting as the Fund’s clearing member, and the documentation typically does not give the Fund any rights to exercise remedies if the clearing member defaults or becomes insolvent.

Some types of cleared derivatives are required to be executed on an exchange or on a SEF. A SEF is a trading platform where multiple market participants can execute derivatives by accepting bids and offers made by multiple other participants in the platform. While this execution requirement is designed to increase transparency and liquidity in the cleared derivatives market, trading on a SEF can create additional costs and risks for the Fund. For example, SEFs typically charge fees, and if the Fund executes derivatives on a SEF through a broker intermediary, the intermediary may impose fees as well. Also, the Fund may indemnify a SEF, or a broker intermediary who executes cleared derivatives on a SEF on the Fund’s behalf, against any losses or costs that may be incurred as a result of the Fund’s transactions on the SEF. See the subsection “Swap Execution Facilities” above for additional information.

*Other Derivatives: Future Developments*

The above discussion relates to the Fund’s proposed use of certain types of derivatives currently available. However, the Fund is not limited to the transactions described above. In addition, the relevant markets and related regulations are constantly changing and, in the future, the Fund may use derivatives not currently available or widely in use.
CFTC Regulation

As of the date of this Statement, the Adviser has claimed an exclusion from the definition of commodity pool operator (a “CPO”) under the CEA pursuant to Rule 4.5 under the CEA (the “exclusion”) promulgated by the CFTC with respect to its operation of the Fund. Accordingly, the Adviser (with respect to the Fund) is not subject to registration or regulation as a CPO under the CEA. To remain eligible for the exclusion, the Fund will be limited in its ability to use certain financial instruments regulated under the CEA (“commodity interests”), including futures and options on futures and certain swaps transactions. In the event that the Fund’s investments in commodity interests are not within the thresholds set forth in the exclusion, the Adviser may be required to register as a CPO and/or “commodity trading advisor” with the CFTC with respect to the Fund. The Adviser’s eligibility to claim the exclusion with respect to the Fund will be based upon, among other things, the level and scope of the Fund’s investment in commodity interests, the purposes of such investments and the manner in which the Fund holds out its use of commodity interests. The Fund’s ability to invest in commodity interests (including, but not limited to, futures and swaps on broad-based securities indexes and interest rates) is limited by the Adviser’s intention to operate the Fund in a manner that would permit the Adviser to continue to claim the exclusion under Rule 4.5, which may adversely affect the Fund’s total return. In the event the Adviser becomes unable to rely on the exclusion in Rule 4.5 and is required to register with the CFTC as a CPO with respect to the Fund, the Fund’s expenses may increase, adversely affecting the Fund’s total return.

Fixed-Income Securities

The Fund may invest in fixed-income securities. Fixed-income securities pay a specified rate of interest or dividends, or a rate that is adjusted periodically by reference to some specified index or market rate. Fixed-income securities include securities issued by federal, state, local and foreign governments and related agencies, and by a wide range of private or corporate issuers. Fixed-income securities include, among others, bonds, debentures, notes, bills and commercial paper. Because interest rates vary, it is impossible to predict the income of the Fund for any particular period. In addition, the prices of fixed-income securities generally vary inversely with changes in interest rates. Prices of fixed-income securities may also be affected by items related to a particular issue or to the debt markets generally. The NAV of the Fund’s shares will vary as a result of changes in the value of the securities in the Fund’s portfolio.

Investment Grade Fixed-Income Securities

To be considered investment grade quality, at least one of the three major rating agencies (Moody’s Investors Service, Inc. (“Moody’s”), Fitch Investor Services, Inc. (“Fitch”) or S&P Global Ratings (“S&P”)) must have rated the security in one of its respective top four rating categories at the time the Fund acquires the security or, if the security is unrated, Loomis Sayles must have determined it to be of comparable quality.

Below Investment Grade Fixed-Income Securities

Below investment grade fixed-income securities (commonly referred to as “junk bonds”) are rated below investment grade quality. To be considered below investment grade quality, none of the three major rating agencies (Fitch, Moody’s and S&P) must have rated the security in one of its respective top four rating categories at the time the Fund acquires the security or, if the security is unrated, Loomis Sayles must have determined it to be of comparable quality.

Below investment grade fixed income securities are subject to greater credit/counterparty risk and market risk than higher-quality fixed-income securities. Below investment grade fixed-income securities are considered predominantly speculative with respect to the ability of the issuer to make timely principal and interest payments. If the Fund invests in below investment grade fixed-income securities, the Fund’s achievement of its objective may be more dependent on Loomis Sayles’ own credit analysis than is the case with funds that invest in higher-quality fixed-income securities. The market for below investment grade fixed-income securities may be more severely affected than some other financial markets by economic recession or substantial interest rate increases, by changing public perceptions of this market, or by legislation that limits the ability of certain categories of financial institutions to invest in these securities. In addition, the secondary market may be less liquid for below investment grade fixed-income securities. This lack
of liquidity at certain times may affect the values of these securities and may make the evaluation and sale of these securities more difficult. Below investment grade fixed-income securities may be in poor standing or in default and typically have speculative characteristics.

For more information about the ratings services’ descriptions of the various ratings categories, see Appendix A. The Fund may continue to hold fixed-income securities that are downgraded in quality subsequent to their purchase if Loomis Sayles believes it would be advantageous to do so.

**Foreign Investment Companies**

Some of the countries in which the Fund may invest may not permit, or may place economic restrictions on, direct investment by outside investors. Investments in such countries may only be permitted through foreign government-approved or authorized investment vehicles, which may include other investment companies. The Fund may also invest in registered or unregistered closed-end investment companies that invest in foreign securities. Investing through such vehicles may involve frequent or layered fees or expenses and may also be subject to limitation under the 1940 Act or to special tax rules under the Code. If the Fund invests in investment companies, shareholders will bear not only their proportionate share of the Fund’s expenses (including operating expenses and the fees of the Fund’s Subadviser), but also, indirectly, the similar expenses of the underlying investment companies.

**Foreign Securities**

The Fund may invest in foreign securities. Foreign securities may include, among other things, securities of issuers organized or headquartered outside the U.S. as well as obligations of supranational entities. The Fund may define “foreign securities” differently from other Natixis and Loomis Sayles Funds and the examples described in this section should not be considered a definition of “Foreign securities”. In addition to the risks associated with investing in securities generally, such investments present additional risks not typically associated with investments in comparable securities of U.S. issuers. Investments in emerging markets may be subject to these risks to a greater extent than those in more developed markets, as described more fully under the section “Emerging Markets.”

There may be less information publicly available about a foreign corporate or government issuer than about a U.S. issuer, and foreign corporate issuers are not generally subject to accounting, auditing and financial reporting standards and practices comparable to those in the United States. The securities of some foreign issuers are less liquid and at times more volatile than securities of comparable U.S. issuers. Foreign brokerage commissions and securities custody costs are often higher than those in the United States, and judgments against foreign entities may be more difficult to obtain and enforce. With respect to certain foreign countries, there is a possibility of governmental expropriation of assets, confiscatory taxation, political or financial instability and diplomatic developments that could affect the value of investments in those countries. If the Fund’s portfolio is over-weighted in a certain geographic region, any negative development affecting that region will have a greater impact on the Fund than a fund that is not over-weighted in that region. The receipt of interest on foreign government securities may depend on the availability of tax or other revenues to satisfy the issuer’s obligations.

Since most foreign securities are denominated in foreign currencies or traded primarily in securities markets in which settlements are made in foreign currencies, the value of these investments and the net investment income available for distribution to shareholders of the Fund may be affected favorably or unfavorably by changes in currency exchange rates or exchange control regulations. To the extent a Fund may purchase securities denominated in foreign currencies, a change in the value of any such currency against the U.S. dollar will result in a change in the U.S. dollar value of the Fund’s assets and the Fund’s income available for distribution. The 2008 global economic crisis has caused many European countries to experience serious fiscal difficulties, including bankruptcy, public budget deficits, recession, sovereign default, restructuring of government debt, credit rating downgrades and an overall weakening of the banking and financial sectors. In addition, some European economies may depend on others for assistance, and the inability of such economies to achieve the reforms or objectives upon which that assistance is conditioned may result in deeper and/or longer financial downturns among the eurozone nations. Recent events in the eurozone have called into question the long-term viability of the euro as a shared currency among the eurozone nations. Moreover, strict fiscal and monetary controls imposed by the European Economic and Monetary Union as well as any other requirements it may impose on member countries may significantly impact such countries and limit them from implementing their own economic policies to some degree. As the result of economic, political, regulatory or other actions taken in
response to this crisis, including any discontinuation of the euro as the shared currency among the eurozone nations or the implementation of capital controls or the restructuring of financial institutions, the Fund’s euro-denominated investments may become difficult to value, the Fund may be unable to dispose of investments or repatriate investment proceeds, the Fund’s ability to operate its strategy in connection with euro-denominated securities may be significantly impaired and the value of the Fund’s euro-denominated investments may decline significantly and unpredictably.

In June 2016, the United Kingdom approved a referendum to leave the European Union (commonly known as “Brexit”). On March 29, 2017, the United Kingdom formally notified the European Council of its intention to leave the European Union; as a result, the United Kingdom will remain a member state, subject to European Union law with privileges to provide services under the single market directives, for at least two years from that date. However, there is a significant degree of uncertainty about how negotiations relating to the UK’s withdrawal and new trade agreements will be conducted, as well as the potential consequences and precise timeframe for Brexit. Given the size and importance of the United Kingdom’s economy, uncertainty about its legal, political, and economic relationship with the remaining member states of the European Union may continue to be a source of instability. Moreover, other countries may seek to withdraw from the European Union and/or abandon the euro, the common currency of the European Union. The ultimate effects of these events and other socio-political or geopolitical issues are not known but could profoundly affect global economies and markets. Whether or not a Fund invests in securities of issuers located in Europe or with significant exposure to European issuers or countries, these events could negatively affect the value and liquidity of the Fund’s investments.

Although the Fund’s income may be received or realized in foreign currencies, the Fund will be required to compute and distribute its income in U.S. dollars. Therefore, if the value of a currency relative to the U.S. dollar declines after the Fund’s income has been earned in that currency, translated into U.S. dollars and declared as a dividend, but before payment of such dividend, the Fund could be required to liquidate portfolio securities to pay such dividend. Similarly, if the value of a currency relative to the U.S. dollar declines between the time the Fund incurs expenses or other obligations in U.S. dollars and the time such expenses or obligations are paid, the amount of such currency required to be converted into U.S. dollars in order to pay such expenses in U.S. dollars will be greater than the equivalent amount in such currency of such expenses at the time they were incurred. Compliance with foreign tax laws may reduce the Fund’s net income available for distribution to shareholders.

Emerging Markets

Investments in foreign securities may include investments in emerging or developing countries, whose economies or
securities markets are not yet highly developed. The same or similar risks are seen in investments in companies that are located in developed markets but derive substantial revenues from emerging markets. The risks associated with investing in foreign securities are often heightened for investments in emerging market countries. These heightened risks include (i) greater risks of expropriation, confiscatory taxation, nationalization, and less social, political and economic stability; (ii) the small size of the markets for securities of emerging market issuers and the oftentimes low or nonexistent volume of trading, resulting in lack of liquidity and in price volatility; (iii) certain national policies that may restrict the Fund’s investment opportunities, including restrictions on investing in issuers or industries deemed sensitive to relevant national interests or currency transfer restrictions; (iv) an economy’s dependence on revenues from particular commodities or on international aid or development assistance; (v) the absence of developed legal structures governing private or foreign investment and private property and/or less developed custodial and deposit systems and delays and disruptions in securities settlement procedures; and (vi) risks associated with the imposition of sanctions by the U.S. government. The Fund’s purchase and sale of portfolio securities in certain emerging market countries may be constrained by limitations as to daily changes in the prices of listed securities, periodic trading or settlement volume and/or limitations on aggregate holdings of foreign investors. In certain cases, such limitations may be computed based upon the aggregate trading by or holdings of the Fund, the Subadviser and its affiliates, and its respective clients and other service providers. The Fund may not be able to sell securities in circumstances where price, trading or settlement volume limitations have been reached. These limitations may have a negative impact on the Fund’s performance and may adversely affect the liquidity of the Fund’s investment to the extent that it invests in certain emerging market countries. In addition, some emerging market countries may have fixed or managed currencies that are not free-floating against the U.S. dollar. Further, certain emerging market countries’ currencies may not be internationally traded. Certain of these currencies have experienced a steady devaluation relative to the U.S. dollar. If the Fund does not hedge the U.S. dollar value of securities it owns denominated in currencies that are devalued, the Fund’s NAV will be adversely affected. Many emerging market countries have experienced substantial, and in some periods extremely high, rates of inflation for many years. Inflation and rapid fluctuations in inflation rates have had and may continue to have adverse effects on the economies and securities markets of certain of these countries. In determining whether to invest in securities of foreign issuers, Loomis Sayles may consider the likely effects of foreign taxes on the net yield available to the Fund and its shareholders. Compliance with foreign tax laws may reduce the Fund’s net income available for distribution to shareholders.

Supranational Entities

The Fund may invest in securities issued by supranational entities, such as the International Bank for Reconstruction and Development (commonly called the “World Bank”), the Asian Development Bank and the Inter-American Development Bank. The governmental members of these supranational entities are “stockholders” that typically make capital contributions to support or promote such entities’ economic reconstruction or development activities and may be committed to make additional capital contributions if the entity is unable to repay its borrowings. A supranational entity’s lending activities may be limited to a percentage of its total capital, reserves and net income. There can be no assurance that the constituent governments will be able or willing to honor their commitments to those entities, with the result that the entity may be unable to pay interest or repay principal on its debt securities, and the Fund may lose money on such investments. Obligations of supranational entities that are denominated in foreign currencies will also be subject to the risks associated with investments in foreign currencies, as described in the sections “Foreign Securities.”

Illiquid Securities

The Fund may purchase illiquid securities. Illiquid securities are those that are not readily resalable. Securities whose disposition is restricted by federal securities laws may be considered illiquid. Securities generally will be considered “illiquid” if the Fund reasonably expects the security cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the security. Investment in illiquid securities involves the risk that the Fund may be unable to sell such a security at the desired time or at the price at which the Fund values the security. Also, the Fund may incur expenses, losses or delays in the process of registering restricted securities prior to resale.
As required by the liquidity risk management rule adopted by the SEC, the Fund has adopted a liquidity risk management program and appointed an administrator to administer the program. The impact the rule will have on the Fund, and on the asset management industry in general, is not yet fully known, but the rule could impact the Fund’s performance and its ability to achieve its investment objectives(s).

**Inflation-Linked and Inflation-Indexed Securities**

The Fund may invest in inflation-linked and -indexed securities. Inflation-linked and -indexed securities are fixed-income securities whose principal values are adjusted periodically according to the rate of inflation. These securities generally have maturities of ten or thirty years and interest is payable semiannually. The principal amount of these securities increases with increases in the price index used as a reference value for the securities. In addition, the amounts payable as coupon interest payments increase when the price index increases because the interest amount is calculated by multiplying the principal amount (as adjusted) by a fixed coupon rate.

Although inflation-linked and -indexed securities protect their holders from long-term inflationary trends, short-term increases in inflation may result in a decline in value. The values of inflation-linked and -indexed securities generally fluctuate in response to changes to real interest rates, which are in turn tied to the relationship between nominal interest rates and the rate of inflation. If inflation were to rise at a rate faster than nominal interest rates, real interest rates might decline, leading to an increase in value of the inflation-linked and -indexed securities. In contrast, if nominal interest rates increased at a faster rate than inflation, real interest rates might rise, leading to a decrease in the value of inflation-linked and -indexed securities. If inflation is lower than expected during a period in which the Fund holds inflation-linked or -indexed securities, the Fund may earn less on such securities than on a conventional security. If interest rates rise due to reasons other than inflation (for example, due to changes in currency exchange rates), investors in inflation-linked and -indexed securities may not be protected to the extent that the increase is not reflected in the price index used as a reference for the securities. There can be no assurance that the price index used for an inflation-linked or -indexed security will accurately measure the real rate of inflation in the prices of goods and services. Inflation-linked and -indexed securities include Treasury Inflation-Protected Securities issued by the U.S. government (see the section “U.S. Government Securities” for additional information), but also may include securities issued by state, local and non-U.S. governments and corporations and supranational entities.

The Fund’s investments in inflation-linked and -indexed securities can cause the Fund to accrue income for U.S. federal income tax purposes without a corresponding receipt of cash; and the Fund may be required to dispose of portfolio securities (including when not otherwise advantageous to do so) in order to obtain sufficient cash to meet its distribution requirements for eligibility to be treated as a regulated investment company (“RIC”) under the Code.

**Investment Companies**

The Fund may invest in other investment companies. Investment companies, including ETFs are essentially pools of securities. Investing in other investment companies involves substantially the same risks as investing directly in the underlying securities, but may involve additional expenses at the investment company level, such as investment advisory fees and operating expenses. In some cases, investing in an investment company may involve the payment of a premium over the value of the assets held in that investment company’s portfolio. In other circumstances, the market value of an investment company’s shares may be less than the NAV per share of the investment company. As an investor in another investment company, the Fund will bear its ratable share of the investment company’s expenses, including advisory fees, and the Fund’s shareholders will bear such expenses indirectly, in addition to similar fees and expenses of the Fund. The Fund may also be exposed to the risks associated with the underlying investment company’s investments.

Despite the possibility of greater fees and expenses, investment in other investment companies may be attractive nonetheless for several reasons, especially in connection with foreign investments. Because of restrictions on direct investment by U.S. entities in certain countries, investing indirectly in such countries (by purchasing shares of another fund that is permitted to invest in such countries) may be the most practical and efficient way for the Fund to invest in such countries. In other cases, when the Subadviser desires to make only a relatively small investment in a particular
country, investing through another fund that holds a diversified portfolio in that country may be more effective than investing directly in issuers in that country. In addition, it may be efficient for the Fund to gain exposure to particular market segments by investing in shares of one or more investment companies.

ETFs

The Fund may invest in shares of ETFs. An ETF is an investment company that is generally registered under the 1940 Act that holds a portfolio of securities designed to track the performance of a particular index. The ETF may be actively managed. ETFs sell and redeem their shares at NAV in large blocks (typically 50,000 of its shares or more) called “creation units.” Shares representing fractional interests in these creation units are listed for trading on national securities exchanges and can be purchased and sold in the secondary market in lots of any size at any time during the trading day. ETFs sometimes also refer to entities that are not registered under the 1940 Act that invest directly in commodities or other assets (e.g., gold bullion). Investments in ETFs involve certain inherent risks generally associated with investments in a broadly-based portfolio of securities, including risks that the general level of stock prices may decline, thereby adversely affecting the value of each unit of the ETF or other instrument. In addition, an ETF may not fully replicate the performance of its benchmark index because of the temporary unavailability of certain index securities in the secondary market or discrepancies between the ETF and the index with respect to the weighting of securities or number of stocks held.

Limitations on Investments in Other Investment Companies.

Investments in other investment companies are typically subject to limitations prescribed by the 1940 Act. The 1940 Act limitations currently provide, in part, that, unless an exception applies, the Fund may not purchase shares of an investment company if such a purchase would cause the Fund (a) to own in the aggregate more than 3% of the total outstanding voting stock of the investment company; (b) to have more than 5% of its total assets invested in the aggregate in the investment company; or (c) to have more than 10% of its total assets invested in the aggregate in all investment companies. Investments by the Fund may exceed these limitations, however, if permitted by applicable exemptive or regulatory relief; for example, the Fund may invest in excess of the foregoing limitations in an unaffiliated ETF if the ETF has obtained exemptive relief from the SEC and both the ETF and the Fund adhere to the conditions in the exemptive relief.

Investments in Banks

The Fund may invest a portion of its assets in certificates of deposit (certificates representing the obligation of a bank to repay funds deposited with it for a specified period of time), time deposits (non-negotiable deposits maintained in a bank for a specified period of time up to seven days at a stated interest rate), bankers’ acceptances (credit instruments evidencing the obligation of a bank to pay a draft drawn on it by a customer) and other securities and instruments issued by domestic banks, foreign branches of domestic banks, foreign subsidiaries of domestic banks and domestic and foreign branches of foreign banks. Banks are also expected to serve as counterparties on some of the Fund’s derivative contracts.

The Fund also may purchase U.S. dollar-denominated obligations issued by foreign branches of domestic banks or foreign branches of foreign banks (“Eurodollar” obligations) and domestic branches of foreign banks (“Yankee dollar” obligations). Eurodollar and other foreign obligations involve special investment risks, including the possibility that (i) liquidity could be impaired because of future political and economic developments, (ii) the obligations may be less marketable than comparable domestic obligations of domestic issuers, (iii) a foreign jurisdiction might impose withholding or other taxes on interest income payable on those obligations, (iv) deposits may be seized or nationalized, (v) foreign governmental restrictions such as exchange controls may be adopted which might adversely affect the payment of principal and interest on those obligations, (vi) the selection of foreign obligations may be more difficult because there may be less information publicly available concerning foreign issuers, (vii) there may be difficulties in enforcing a judgment against a foreign issuer, or (viii) the accounting, auditing and financial reporting standards, practices and requirements applicable to foreign issuers may differ from those applicable to domestic issuers. In addition, foreign banks are not subject to examination by U.S. government agencies or instrumentalities.
Money Market Instruments

The Fund may invest in money market instruments. Money market instruments are high-quality, short-term securities. The Fund’s money market investments at the time of purchase (other than U.S. government securities as defined below and repurchase agreements relating thereto) generally will be rated at the time of purchase in the two highest short-term rating categories as rated by a major credit agency or, if unrated, will be of comparable quality as determined by the Subadviser. The Fund may invest in instruments of lesser quality and does not have any minimum credit quality restriction. Money market instruments maturing in less than one year may yield less than obligations of comparable quality having longer maturities.

Although changes in interest rates can change the market value of a security, the Fund expects those changes to be minimal with respect to these securities, which may be purchased by the Fund for defensive purposes. The Fund’s money market investments may be issued by U.S. banks, foreign banks (including their U.S. branches) or foreign branches and subsidiaries of U.S. banks. Obligations of foreign banks may be subject to foreign economic, political and legal risks. Such risks include foreign economic and political developments, foreign governmental restrictions that may adversely affect payment of principal and interest on the obligations, foreign withholding and other taxes on interest income, difficulties in obtaining and enforcing a judgment against a foreign obligor, exchange control regulations (including currency blockage) and the expropriation or nationalization of assets or deposits. Foreign branches of U.S. banks and foreign banks are not necessarily subject to the same or similar regulatory requirements that apply to domestic banks. For instance, such branches and banks may not be subject to the types of requirements imposed on domestic banks with respect to mandatory reserves, loan limitations, examinations, accounting, auditing, record keeping and the public availability of information. Obligations of such branches or banks will be purchased only when the Subadviser believes the risks are minimal. The Fund may invest in U.S. government securities that include all securities issued or guaranteed by the U.S. government or its agencies, authorities or instrumentalities (“U.S. government securities”). Some U.S. government securities are backed by the full faith and credit of the United States. U.S. government securities that are not backed by the full faith and credit of the United States are considered riskier than those that are. See the section “U.S. Government Securities” for additional information.

Although the Fund may invest in money market instruments, it is not a money market fund and therefore is not subject to the portfolio quality, maturity and NAV requirements applicable to money market funds. The Fund will not seek to maintain a stable NAV. The Fund also will not be required to comply with the rating restrictions applicable to money market funds, and will not necessarily sell an investment in cases where a security’s rating has been downgraded.

Considerations of liquidity, safety and preservation of capital may preclude the Fund from investing in money market instruments paying the highest available yield at a particular time. In addition, the Fund’s ability to trade money market securities may be constrained by the collateral and asset coverage requirements related to the Fund’s other investments. As a result, the Fund may need to buy or sell money market instruments at inopportune times. In addition, even though money market instruments generally are considered to be high-quality and a low-risk investment, recently a number of issuers of money market and money market-type instruments have experienced financial difficulties, leading in some cases to rating downgrades and decreases in the value of their securities. In addition, during the 2008 global financial downturn, many money market instruments that were thought to be highly liquid became illiquid. If the Fund’s money market instruments become illiquid, the Fund may be unable to satisfy certain of its obligations or may only be able to do so by selling other securities at prices or times that may be disadvantageous to do so.

Mortgage-Related Securities

The Fund may invest in mortgage-related securities, such as Government National Mortgage Association (“GNMA”) or Federal National Mortgage Association (“FNMA”) certificates, which differ from traditional debt securities. Among the major differences are that interest and principal payments are made more frequently, usually monthly, and that principal may be prepaid at any time because the underlying mortgage loans generally may be prepaid at any time. As a result, if the Fund purchases these assets at a premium, a faster-than-expected prepayment rate will tend
sto reduce yield to maturity, and a slower-than-expected prepayment rate may have the opposite effect of increasing yield to maturity. If the Fund purchases mortgage-related securities at a discount, faster-than-expected prepayments will tend to increase, and slower-than-expected prepayments tend to reduce, yield to maturity. Prepayments, and resulting amounts available for reinvestment by the Fund, are likely to be greater during a period of declining interest rates and, as a result, are likely to be reinvested at lower interest rates. Accelerated prepayments on securities purchased at a premium may result in a loss of principal if the premium has not been fully amortized at the time of prepayment. Although these securities will decrease in value as a result of increases in interest rates generally, they are likely to appreciate less than other fixed-income securities when interest rates decline because of the risk of prepayments. In addition, an increase in interest rates would increase the inherent volatility of the Fund by increasing the average life of the Fund’s portfolio securities.

The value of some mortgage-backed or asset-backed securities in which the Fund invests may be particularly sensitive to changes in prevailing interest rates, and the ability of the Fund to successfully utilize these instruments may depend on the ability of the Subadviser to forecast interest rates and other economic factors correctly. These types of securities may also decline in value for reasons associated with the underlying collateral. The risk of non-payment is greater for mortgage-related securities that are backed by mortgage pools that contain “subprime” or “Alt-A” loans (loans made to borrowers with weakened credit histories, less documentation or with a lower capacity to make timely payments on their loans), but a level of risk exists for all loans. Market factors adversely affecting mortgage loan repayments may include a general economic downturn, high unemployment, a general slowdown in the real estate market, a drop in the market prices of real estate or an increase in interest rates resulting in higher mortgage payments by holders of adjustable-rate mortgages. Securities issued by the GNMA and the FNMA and similar issuers may also be exposed to risks described in the section “U.S. Government Securities.”

The Fund also may gain exposure to mortgage-related securities through entering into credit default swaps or other derivative instruments related to this asset class. For example, the Fund may enter into credit default swaps on CMBX, which are indices made up of tranches of commercial mortgage-backed securities, each with different credit ratings. Utilizing CMBX, one can either gain synthetic risk exposure to a portfolio of such securities by “selling protection” or take a short position by “buying protection.” The protection buyer pays a monthly premium to the protection seller, and the seller agrees to cover any principal losses and interest shortfalls of the referenced underlying mortgage-backed securities. Credit default swaps and other derivative instruments related to mortgage-related securities are subject to the risks associated with mortgage-related securities generally, as well as the risks of derivative transactions. See the section “Derivative Instruments.”

**Mortgage Dollar Rolls**

The Fund may enter into mortgage dollar rolls. A dollar roll involves the sale of a security by the Fund and its agreement to repurchase the instrument at a specified time and price, and may be considered a form of borrowing for some purposes. The Fund will designate on its records or segregate with its custodian bank assets determined to be liquid in an amount sufficient to meet its obligations under the transactions. A dollar roll involves potential risks of loss that are different from those related to the securities underlying the transactions. The Fund may be required to purchase securities at a higher price than may otherwise be available on the open market. Since the counterparty in the transaction is required to deliver a similar, but not identical, security to the Fund, the security that the Fund is required to buy under the dollar roll may be worth less than an identical security. There is no assurance that the Fund’s use of the cash that it receives from a dollar roll will provide a return that exceeds borrowing costs.

**Pay-in-Kind Securities**

The Fund may invest in pay-in-kind securities. Pay-in-kind securities pay dividends or interest in the form of additional securities of the issuer, rather than in cash. These securities are usually issued and traded at a discount from their face amounts. The amount of the discount varies depending on various factors, such as the time remaining until maturity of the securities, prevailing interest rates, the liquidity of the security and the perceived credit quality of the issuer. The market prices of pay-in-kind securities generally are more volatile than the market prices of securities that pay interest periodically and are likely to respond to changes in interest rates to a greater degree than are other types of securities having similar maturities and credit quality. The Fund would be required to distribute the income on these instruments as it accrues, even though the Fund would not receive the income on a current basis or in cash.
Thus, such Fund may have to sell other investments, including when it may not be advisable to do so, to make income distributions to its shareholders.

Private Placements

The Fund may invest in securities that are purchased in private placements. While private placements may offer opportunities for investment that are not otherwise available on the open market, these securities may be subject to restrictions on resale as a matter of contract or under federal securities laws. Because there may be relatively few potential purchasers for these securities, especially under adverse market or economic conditions or in the event of adverse changes in the financial condition of the issuer, the Fund could find it more difficult or impossible to sell the securities when the Subadviser believes that it is advisable to do so, or may be able to sell the securities only at prices lower than if the securities were more widely held. At times, it also may be more difficult to determine the fair value of the securities for purposes of computing the Fund’s NAV.

The absence of a trading market can make it difficult to ascertain a market value for illiquid investments such as private placements. Disposing of illiquid investments may involve time-consuming negotiation and legal expenses, and it may be difficult or impossible for the Fund to sell the illiquid securities promptly at an acceptable price. The Fund may have to bear the extra expense of registering the securities for resale and the risk of substantial delay in effecting the registration. In addition, market quotations are typically less readily available (if available at all) for these securities. The judgment of the Subadviser may at times play a greater role in valuing these securities than in the case of unrestricted securities.

The Fund may be deemed to be an underwriter for purposes of the Securities Act when reselling privately issued securities to the public. As such, the Fund may be liable to purchasers of the securities if the registration statement prepared by the issuer, or the prospectus forming a part of the registration statement, is materially inaccurate or misleading.

Privatizations

The Fund may participate in privatizations. In a number of countries around the world, governments have undertaken to sell to investors interests in enterprises that the government has historically owned or controlled. These transactions are known as “privatizations” and may in some cases represent opportunities for significant capital appreciation. In some cases, the ability of U.S. investors, such as the Fund, to participate in privatizations may be limited by local law, and the terms of participation for U.S. investors may be less advantageous than those for local investors. Also, there is no assurance that privatized enterprises will be successful, or that an investment in such an enterprise will retain its value or appreciate in value.

Real Estate Investment Trusts (“REITs”)

The Fund may invest in REITs. REITs are pooled investment vehicles that invest primarily in either real estate or real estate-related loans. REITs involve certain unique risks in addition to those risks associated with investing in the real estate industry in general (such as possible declines in the value of real estate, lack of availability of mortgage funds, or extended vacancies of property). Equity REITs may be affected by changes in the value of the underlying property owned by the REITs, while mortgage REITs may be affected by the quality of any credit extended and changes in interest rates. REITs whose underlying assets are concentrated in properties used by a particular industry, such as health care, are also subject to risks associated with such industry. REITs are dependent upon management skills, are not diversified, and are subject to heavy cash flow dependency, risks of default by borrowers, and self-liquidation. REITs are also subject to the possibilities of failing to qualify for the favorable tax treatment available to REITs under the Code, and failing to maintain their exemptions from registration under the 1940 Act.

REITs (especially mortgage REITs) are also subject to interest rate risks, including prepayment risk. When interest rates decline, the value of a REIT’s investment in fixed rate obligations can be expected to rise. Conversely, when interest rates rise, the value of a REIT’s investment in fixed rate obligations can be expected to decline. If the REIT invests in adjustable rate mortgage loans the interest rates on which are reset periodically, yields on a REIT’s
investments in such loans will gradually align themselves to reflect changes in market interest rates. This causes the value of such investments to fluctuate less dramatically in response to interest rate fluctuations than would investments in fixed rate obligations. REITs may have limited financial resources, may trade less frequently and in a limited volume, and may be subject to more abrupt or erratic price movements than more widely held securities.

The Fund’s investment in a REIT may result in the Fund making distributions that constitute a return of capital to Fund shareholders for U.S. federal income tax purposes. In addition, distributions by the Fund from REITs will not qualify for the corporate dividends-received deduction, or, generally, for treatment as qualified dividend income.

Repurchase Agreements

The Fund may enter into repurchase agreements, by which the Fund purchases a security and obtains a simultaneous commitment from the seller (a bank or, to the extent permitted by the 1940 Act, a recognized securities dealer) to repurchase the security at an agreed-upon price and date (usually seven days or less from the date of original purchase). The resale price is in excess of the purchase price and reflects an agreed-upon market interest rate unrelated to the coupon rate on the purchased security. Repurchase agreements are economically similar to collateralized loans by the Fund. Such transactions afford the Fund the opportunity to earn a return on temporarily available cash at relatively low market/issuer risk. The Fund does not have percentage limitations on how much of their total assets may be invested in repurchase agreements. The Fund typically use repurchase agreements for cash management and temporary defensive purposes. The Fund may invest in a repurchase agreement that does not produce a positive return to the Fund if the Subadviser believes it is appropriate to do so under the circumstances (for example, to help protect the Fund’s uninvested cash against the risk of loss during periods of market turmoil). While the underlying security may be a bill, certificate of indebtedness, note or bond issued by an agency, authority or instrumentality of the U.S. government, the obligation of the seller is not guaranteed by the U.S. government and there is a risk that the seller may fail to repurchase the underlying security. In such event, the Fund would attempt to exercise rights with respect to the underlying security, including possible disposition in the market. However, the Fund may be subject to various delays and risks of loss, including (i) possible declines in the value of the underlying security during the period while the Fund seeks to enforce its rights thereto; (ii) possible reduced levels of income and lack of access to income during this period; and (iii) inability to enforce rights and the expenses involved in the attempted enforcement, for example, against a counterparty undergoing financial distress.

Reverse Repurchase Agreements and Other Borrowings

The Fund may enter into reverse repurchase agreements. In a reverse repurchase agreement the Fund transfers possession of a portfolio instrument to another person, such as a financial institution, broker or dealer, in return for cash, and agrees that on a stipulated date in the future the Fund will repurchase the portfolio instrument by remitting the original consideration plus interest at an agreed-upon rate. The ability to use reverse repurchase agreements may enable, but does not ensure the ability of, the Fund to avoid selling portfolio instruments at a time when a sale may be deemed to be disadvantageous. Reverse repurchase agreements are economically similar to secured borrowings by the Fund.

Dollar Rolls

Dollar rolls are a special type of reverse repurchase agreement in which the portfolio instrument transferred by the Fund is a mortgage-related security. The Fund gives up the cash flows during the transaction period but has use of the cash proceeds.

Rule 144A Securities and Section 4(a)(2) Commercial Paper

The Fund may purchase Rule 144A securities and/or Section 4(a)(2) Commercial Paper. Rule 144A securities are privately offered securities that can be resold only to certain qualified institutional buyers pursuant to Rule 144A under the Securities Act. The Fund may also purchase commercial paper issued under Section 4(a)(2) of the Securities Act or similar debt obligations. Commercial paper is generally considered to be short-term unsecured debt of corporations. Investing in Rule 144A securities and Section 4(a)(2) commercial paper could have the effect of increasing the level of the Fund’s illiquidity to the extent that qualified institutional buyers become, for a time, uninterested in purchasing these securities. Rule 144A securities and Section 4(a)(2) commercial paper are treated as illiquid unless the
Subadviser has determined, under guidelines established by the Board, that the particular issue is liquid. Under the guidelines, the Subadviser considers such factors as: (1) the frequency of the trades and quotes for a security; (2) the number of dealers willing to purchase or sell the security and the number of other potential purchasers; (3) dealer undertakings to make a market in the security; and (4) the nature of the security and the nature of the marketplace trades in the security.

Securities Lending

The Fund may lend a portion of its portfolio securities to brokers, dealers or other financial institutions under contracts calling for the deposit by the borrower with the Fund’s custodian of collateral equal to at least the market value of the securities loaned, marked to market on a daily basis. If the Fund lends portfolio securities, its investment performance will continue to reflect changes in the value of the securities loaned and the Fund will also receive a fee or interest on the collateral, which may include shares of a money market fund subject to any investment restrictions listed in this Statement. These fees or interest are income to the Fund, although the Fund often must share the income with the securities lending agent and/or the borrower. The Fund will continue to benefit from interest or dividends on the securities loaned (although the payment characteristics may change) and may also earn a return from the collateral, which may include shares of a money market fund subject to any investment restrictions listed in this Statement. Under some securities lending arrangements, the Fund may receive a set fee for keeping its securities available for lending. Any voting rights, or rights to consent, relating to securities loaned, pass to the borrower. However, if a material event (as determined by an adviser or subadviser) affecting the investment occurs, the Fund may seek to recall the securities so that the securities may be voted by the Fund, although the adviser or subadviser may not know of such event in time to recall the securities or may be unable to recall the securities in time to vote them. The Fund pays various fees in connection with such loans, including fees to the party arranging the loans, shipping fees and custodian and placement fees approved by the Board or persons acting pursuant to the direction of the Board.

Securities loans must be fully collateralized at all times, but involve some credit/counterparty risk to the Fund if the borrower or the party (if any) guaranteeing the loan should default on its obligation and the Fund is delayed in or prevented from recovering the collateral. In addition, any investment of cash collateral is generally at the sole risk of the Fund. Any income or gains and losses from investing and reinvesting any cash collateral delivered by a borrower pursuant to a loan generally are at the Fund’s risk, and to the extent any such losses reduce the amount of cash below the amount required to be returned to the borrower upon the termination of any loan, the Fund may be required by the securities lending agent to pay or cause to be paid to such borrower an amount equal to such shortfall in cash, possibly requiring it to liquidate other portfolio securities to satisfy its obligations. The Fund did not have any securities lending activity during its most recently completed fiscal year.

Short Sales

The Fund may enter into short sales of securities. To sell a security short, the Fund must borrow that security from a lender, such as a prime broker, and deliver it to the short sale counterparty. If the Fund is unable to borrow the security it wishes to sell short at an advantageous time or price, the Fund’s ability to pursue its short sale strategy may be adversely affected. When closing out a short position, the Fund will have to purchase the security it originally sold short. The Fund will realize a profit from closing out a short position if the price of the security sold short has declined since the short position was opened; the Fund will realize a loss from closing out a short position if the value of the shorted security has risen since the short position was opened. Because there is no upper limit on the price to which a security can rise, short selling exposes the Fund to potentially unlimited losses if it does not hold the security sold short.

While short sales can be used to further the Fund’s investment objective, under certain market conditions, they can increase the volatility of the Fund and decrease the liquidity of the Fund. Under adverse market conditions, the Fund may have difficulty purchasing the securities required to meet its short sale delivery obligations, and may have to sell portfolio securities at a disadvantageous time or price to raise the funds necessary to meet its short sale obligations. If a request to return the borrowed securities occurs at a time when other short sellers of those same securities are receiving similar requests, a “short squeeze” can occur, and the Fund may be forced to replace the borrowed securities with purchases on the open market at a disadvantageous time, potentially at a cost that significantly exceeds the
original short sale proceeds originally received in selling the securities short. It is possible that the value of the Fund’s long positions will decrease at the same time that the value of its short positions increases, which could increase losses to the Fund.

The Fund intends to cover its short sale transactions either by segregating or earmarking liquid assets, such that the segregated/earmarked amount, combined with any amount deposited with a broker as margin, equals the current market value of the securities underlying the short sale or by purchasing the securities underlying the short sale transaction or call options on those securities with a strike price no higher than the price at which the security was sold. Ordinarily, the Fund will incur a fee or pay a premium to borrow securities, may also be required to pay interest and other charges, and will have to repay the lender any dividends or interest that accrue on the security while the loan is outstanding. The amount of the premium, dividends, interest and other expenses the Fund pays in connection with the short sale will decrease the amount of any gain from a short sale and increase the amount of any loss.

Short sales may protect the Fund against the risk of losses in the value of its portfolio securities because any unrealized losses with respect to such portfolio securities should be wholly or partially offset by a corresponding gain in the short position. However, any potential gains in such portfolio securities should be wholly or partially offset by a corresponding loss in the short position. The extent to which such gains or losses are offset will depend on the amount of securities sold short relative to the amount the Fund owns, either directly or indirectly, and, in the case where the Fund owns convertible securities, changes in the conversion premium.

Short sale transactions involve certain risks. If the price of the security sold short increases between the time of the short sale and the time the Fund replaces the borrowed security, the Fund will incur a loss, and if the price declines during this period, the Fund will realize a short-term capital gain. Any realized short-term capital gain will be decreased, and any incurred loss increased, by the amount of transaction costs and any premium, dividend or interest which the Fund may have to pay in connection with such short sale. Certain provisions of the Code may limit the degree to which the Fund is able to enter into short sales. There is no limitation on the amount of the Fund’s assets that, in the aggregate, may be deposited as collateral for the obligation to replace securities borrowed to effect short sales and allocated to segregated accounts in connection with short sales.

**Short-Term Trading**

The Fund may, consistent with its investment objectives, engage in portfolio trading in anticipation of, or in response to, changing economic or market conditions and trends. These policies may result in higher turnover rates in the Fund’s portfolio, which may produce higher transaction costs and the realization of taxable capital gains (including short-term gains, which generally are taxed to individuals at ordinary income rates). Portfolio turnover considerations will not limit the Subadviser’s investment discretion in managing the Fund’s assets. The Fund anticipates that its portfolio turnover rates will vary significantly from time to time depending on the volatility of economic and market conditions.

**Step-Coupon Securities**

The Fund may invest in step-coupon securities. Step-coupon securities trade at a discount from their face value and pay coupon interest. The coupon rate is low for an initial period and then increases to a higher coupon rate thereafter. Market values of these types of securities generally fluctuate in response to changes in interest rates to a greater degree than conventional interest-paying securities of comparable term and quality. Under many market conditions, investments in such securities may be illiquid, making it difficult for the Fund to dispose of them or determine their current value.

**“Stripped” Securities**

The Fund may invest in stripped securities, which are usually structured with two or more classes that receive different proportions of the interest and principal distribution on a pool of U.S. government or foreign government securities or mortgage assets. In some cases, one class will receive all of the interest (the interest-only or “IO” class), while the other class will receive all of the principal (the principal-only or “PO” class). Stripped securities commonly have greater market volatility than other types of fixed-income securities. In the case of stripped mortgage securities, if the underlying mortgage assets experience greater than anticipated prepayments of principal, the Fund may fail to recoup
fully its investments in IOs. Stripped securities may be illiquid. Stripped securities may be considered derivative securities, as discussed in the section “Derivative Instruments.”

**Tax-Exempt Securities**

Funds that invest in certain tax-exempt bonds or certain private activity bonds may not be a desirable investment for “substantial users” of facilities financed by such obligations or bonds or for “related persons” of substantial users. You should contact your financial adviser or attorney for more information if you think you may be a “substantial user” or a “related person” of a substantial user.

There are variations in the quality of Tax-Exempt Securities, both within a particular classification and between classifications, depending on numerous factors (see Appendix A).

The two principal classifications of tax-exempt bonds are general obligation bonds and limited obligation (or revenue) bonds. General obligation bonds are obligations involving the credit of an issuer possessing taxing power and are payable from the issuer’s general unrestricted revenues and not from any particular fund or source. The characteristics and method of enforcement of general obligation bonds vary according to the law applicable to the particular issuer, and payment may be dependent upon an appropriation by the issuer’s legislative body. Limited obligation bonds are payable only from the revenues derived from a particular facility or class of facilities, or in some cases from the proceeds of a special excise or other specific revenue source such as the user of the facility. Tax-exempt private activity bonds are in most cases revenue bonds and generally are not payable from the unrestricted revenues of the issuer. The credit and quality of such bonds are usually directly related to the credit standing of the corporate user of the facilities. Principal and interest on such bonds are the responsibilities of the corporate user (and any guarantor).

The yields on Tax-Exempt Securities are dependent on a variety of factors, including general money market conditions, the financial condition of the issuer, general conditions of the Tax-Exempt Securities market, the size of a particular offering, the maturity of the obligation and the rating of the issue. Further, information about the financial condition of an issuer of tax-exempt bonds may not be as extensive as that made available by corporations whose securities are publicly traded. The ratings of Moody’s and S&P represent their opinions as to the quality of the Tax-Exempt Securities which they undertake to rate. It should be emphasized, however, that ratings are general and are not absolute standards of quality. Consequently, Tax-Exempt Securities with the same maturity, interest rate and rating may have different yields while Tax-Exempt Securities of the same maturity and interest rate with different ratings may have the same yield. Subsequent to its purchase by the Fund, an issue of Tax-Exempt Securities or other investments may cease to be rated or the rating may be reduced below the minimum rating required for purchase by the Fund. Neither event will require the elimination of an investment from the Fund’s portfolio, but the Subadviser will consider such an event as part of its normal, ongoing review of all the Fund’s portfolio securities.

Tax-Exempt Securities are subject to the provisions of bankruptcy, insolvency and other laws affecting the rights and remedies of creditors, such as the federal Bankruptcy Code, and laws, if any, which may be enacted by Congress or the state legislatures extending the time for payment of principal or interest, or both, or imposing other constraints upon enforcement of such obligations. There is also the possibility that as a result of litigation or other conditions, the power or ability of issuers to meet their obligations for the payment of interest and principal on their Tax-Exempt Securities may be materially affected or that their obligations may be found to be invalid and unenforceable. Such litigation or conditions may from time to time have the effect of introducing uncertainties in the market for tax-exempt bonds or certain segments thereof, or materially affecting the credit risk with respect to particular bonds. Adverse economic, legal or political developments might affect all or a substantial portion of the Fund’s Tax-Exempt Securities in the same manner.

From time to time, proposals have been introduced before Congress for the purpose of restricting or eliminating the U.S. federal income tax exemption for interest on debt obligations issued by states and their political subdivisions. In this regard, for bonds issued after December 31, 2017, the tax-advantaged treatment previously available to “tax credit bonds” and “advance refunding bonds” is no longer available. Further similar proposals may well be introduced in the future. If such a proposal were enacted, the availability of Tax-Exempt Securities for investment by the Fund and the
value of such Fund’s portfolios could be materially affected, in which event such Fund would reevaluate its investment objectives and policies and consider changes in their structure or dissolution.

All debt securities, including tax-exempt bonds, are subject to credit and market risk. Generally, for any given change in the level of interest rates, prices for longer maturity issues tend to fluctuate more than prices for shorter maturity issues.

**U.S. Government Securities**

The Fund may invest in some or all of the following U.S. government securities:

- **U.S. Treasury Bills** – Direct obligations of the U.S. Treasury that are issued in maturities of one year or less. No interest is paid on Treasury bills; instead, they are issued at a discount and repaid at full face value when they mature. They are backed by the full faith and credit of the U.S. government.

- **U.S. Treasury Notes and Bonds** – Direct obligations of the U.S. Treasury issued in maturities that vary between one and thirty years, with interest normally payable every six (6) months. These obligations are backed by the full faith and credit of the U.S. government.

- **U.S. Treasury Floating Rate Notes** – Treasury Floating Rate Notes are new instruments authorized by amendments to the U.S. Treasury’s marketable securities auction rules. As with other floating rate securities, at certain intervals the interest payment on a Treasury Floating Rate Note will increase when the applicable index increases, and will decrease when the applicable index decreases. Treasury Floating Rate Notes are a relatively new type of financial instrument. As such, there is no significant trading history of these securities, and there can be no assurance that a liquid market in these securities will develop. Lack of a liquid market may impose the risk of higher transaction costs and the possibility that the Fund may be forced to liquidate positions when it would not be advantageous to do so.

- **Treasury Inflation-Protected Securities (“TIPS”)** – Fixed-income securities whose principal value is periodically adjusted according to the rate of inflation. The interest rate on TIPS is fixed at issuance, but over the life of the bond this interest may be paid on an increasing or decreasing principal value that has been adjusted for inflation. Although repayment of the original bond principal upon maturity is guaranteed, the market value of TIPS is not guaranteed, and will fluctuate.

- **“Ginnie Maes”** - Debt securities issued by a mortgage banker or other mortgagee that represent an interest in a pool of mortgages insured by the Federal Housing Administration or the Rural Housing Service or guaranteed by the Veterans Administration. The GNMA guarantees the timely payment of principal and interest when such payments are due, whether or not these amounts are collected by the issuer of these certificates on the underlying mortgages. It is generally understood that a guarantee by GNMA is backed by the full faith and credit of the United States. Mortgages included in single family or multi-family residential mortgage pools backing an issue of Ginnie Maes have a maximum maturity of 30 years. Scheduled payments of principal and interest are made to the registered holders of Ginnie Maes (such as the Fund) each month. Unscheduled prepayments may be made by homeowners, or as a result of a default. Prepayments are passed through to the registered holder (such as the Fund, which reinvests any prepayments) of Ginnie Maes along with regular monthly payments of principal and interest.

- **“Fannie Maes”** - The FNMA is a government-sponsored corporation owned entirely by private stockholders that purchases residential mortgages from a list of approved seller/servicers, including state and federally chartered savings and loan associations, mutual funds savings banks, commercial banks, credit unions and mortgage banks. Fannie Maes are pass-through securities issued by FNMA that are guaranteed as to timely payment of principal and interest by FNMA, but these obligations are not backed by the full faith and credit of the U.S. government.

- **“Freddie Macs”** - The Federal Home Loan Mortgage Corporation (“FHLMC”) is a corporate instrumentality of the U.S. government. Freddie Macs are participation certificates issued by FHLMC that represent an interest in residential mortgages from FHLMC’s National Portfolio. FHLMC guarantees the timely payment
of interest and ultimate collection of principal, but these obligations are not backed by the full faith and credit of the U.S. government.

U.S. government securities generally do not involve the credit risks associated with investments in other types of fixed-income securities, although, as a result, the yields available from U.S. government securities are generally lower than the yields available from corporate fixed-income securities. Like other debt securities, the values of U.S. government securities change as interest rates fluctuate. Fluctuations in the value of portfolio securities will not affect interest income on existing portfolio securities but will be reflected in the Fund’s NAV. Because the magnitude of these fluctuations generally will be greater at times when the Fund’s average maturity is longer, under certain market conditions the Fund may, for temporary defensive purposes, accept lower current income from short-term investments rather than investing in higher yielding long-term securities. Securities such as those issued by Fannie Mae and Freddie Mac are guaranteed as to the payment of principal and interest by the relevant entity (e.g., FNMA or FHLMC) but have not been backed by the full faith and credit of the U.S. government. Instead, they have been supported only by the discretionary authority of the U.S. government to purchase the agency’s obligations. An event affecting the guaranteeing entity could adversely affect the payment of principal or interest or both on the security, and therefore, these types of securities should be considered to be riskier than U.S. government securities.

S&P downgraded its long-term sovereign credit rating on the United States from “AAA” to “AA+” on August 5, 2011. The downgrade by S&P and other possible downgrades in the future may result in increased volatility or liquidity risk, higher interest rates and lower prices for U.S. government securities and increased costs for all kinds of debt. The value of the Fund’s shares may be adversely affected by S&P’s downgrade or any future downgrades of the U.S. government’s credit rating given that the Fund may invest in U.S. government securities.

In September 2008, the U.S. Treasury Department placed FNMA and FHLMC into conservatorship. The companies remain in conservatorship, and the effect that this conservatorship will have on the companies’ debt and equity securities is unclear. Although the U.S. government has recently provided financial support to FNMA and FHLMC, there can be no assurance that it will support these or other government-sponsored enterprises in the future. In addition, any such government support may benefit the holders of only certain classes of an issuer’s securities.

The values of TIPS generally fluctuate in response to changes in real interest rates, which are in turn tied to the relationship between nominal interest rates and the rate of inflation. If inflation were to rise at a faster rate than nominal interest rates, real interest rates might decline, leading to an increase in value of TIPS. In contrast, if nominal interest rates increased at a faster rate than inflation, real interest rates might rise, leading to a decrease in value of TIPS. If inflation is lower than expected during the period the Fund holds TIPS, the Fund may earn less on the TIPS than on a conventional bond. If interest rates rise due to reasons other than inflation (for example, due to changes in currency exchange rates), investors in TIPS may not be protected to the extent that the increase is not reflected in the bonds’ inflation measure. There can be no assurance that the inflation index for TIPS will accurately measure the real rate of inflation in the prices of goods and services.

See the section “Mortgage-Related Securities” for additional information on these securities.

**When-Issued, Delayed Delivery and Forward Commitment Securities**

To reduce the risk of changes in interest rates and securities prices, the Fund may purchase securities on a forward commitment or when-issued or delayed delivery basis, which means delivery and payment take place a number of days after the date of the commitment to purchase. The payment obligation and the interest rate receivable with respect to such purchases are fixed when the Fund enters into the commitment, but the Fund does not make payment until it receives delivery from the counterparty. The Subadviser will commit to purchase such securities only with the intention of actually acquiring the securities, but the Subadviser may sell these securities before the settlement date if it is deemed advisable.

Securities purchased on a forward commitment or when-issued or delayed delivery basis are subject to changes in value, generally changing in the same way, (i.e., appreciating when interest rates decline and depreciating when interest rates rise), based upon the public’s perception of the creditworthiness of the issuer and changes, real or
volatility than the market prices of securities that pay interest periodically and are likely to respond to changes in interest
security and the perceived credit quality of the issuer. The market prices of zero-coupon securities generally are more
on such factors as the time remaining until maturity of the securities, prevailing interest rates, the liquidity of the
securities are issued and traded at a discount from their face amounts. The amount of the discount varies depending
issuance of the obligations; the holder generally is entitled to receive the par value of the security at maturity. These
holder to any periodic payments of interest either for the entire life of the obligation or for an initial period after the
rates to a greater degree than are other types of securities having similar maturities and credit quality. The Fund’s
The Fund may invest in zero-coupon securities. Zero-coupon securities are debt obligations that do not entitle the
the Fund to accrue income without a corresponding receipt of cash; the Fund may be required to dispose of portfolio securities (including when not otherwise advantageous to do so) in order to obtain sufficient cash to meet its distribution requirements for treatment as a RIC under the Code.

Zero-Coupon Securities

The Fund may invest in zero-coupon securities. Zero-coupon securities are debt obligations that do not entitle the
holder to any periodic payments of interest either for the entire life of the obligation or for an initial period after the
issue of the obligations; the holder generally is entitled to receive the par value of the security at maturity. These
securities are issued and traded at a discount from their face amounts. The amount of the discount varies depending
on such factors as the time remaining until maturity of the securities, prevailing interest rates, the liquidity of the
security and the perceived credit quality of the issuer. The market prices of zero-coupon securities generally are more
volatile than the market prices of securities that pay interest periodically and are likely to respond to changes in interest
rates to a greater degree than are other types of securities having similar maturities and credit quality. The Fund’s
investment in zero-coupon securities will require the Fund to accrue income without a corresponding receipt of cash;
the Fund may be required to dispose of portfolio securities (including when not otherwise advantageous to do so) in order to obtain sufficient cash to meet its distribution requirements for treatment as a RIC under the Code.

Additional Risks

Cybersecurity, Operational and Technology Risk

The Fund, its service providers, and other market participants increasingly depend on complex information technology
and communications systems to conduct business functions. These systems are subject to a number of different threats
or risks that could adversely affect the Fund and its shareholders. These risks include theft, loss, misuse, improper
release, corruption and destruction of, or unauthorized access to, confidential or highly sensitive information relating
to the Fund and its shareholders; and compromises or failures to systems, networks, devices and applications relating
to the operations of the Fund and its service providers. Power outages, natural disasters, equipment malfunctions and
processing errors that threaten these systems, as well as market events that occur at a pace that overloads these systems,
may also disrupt business operations or impact critical data. Cybersecurity and other operational and technology issues
may result in, among other things, financial losses to the Fund and its shareholders; the inability of the Fund to transact
business with its shareholders or to engage in portfolio transactions; delays or mistakes in the calculation of the Fund’s
NAV or other materials provided to shareholders; the inability to process transactions with shareholders or other
parties; violations of privacy and other laws; regulatory fines, penalties and reputational damage; and compliance and
remediation costs, legal fees and other expenses. The Fund’s service providers (including, but not limited to, the
Adviser, Subadviser, the NYSE Arca, market makers, listing exchange, Authorized Participants, administrator,
distributor, transfer agent, and custodian), financial intermediaries, companies in which the Fund invests and parties
with which the Fund engages in portfolio or other transactions also may be adversely impacted by cybersecurity and
other operational and technology risks, resulting in losses to the Fund or its shareholders. Furthermore, as a result of
breaches in cybersecurity or other operational and technology disruptions or failures, an exchange or market may close
or issue trading halts on specific securities or the entire market, which may result in the Fund being, among other
things, unable to buy or sell certain securities or financial instruments or unable to accurately price their investments.
The Fund has developed processes, risk management systems and business continuity plans designed to reduce the
risks associated with cybersecurity and other operational and technology issues. However, there is no guarantee that
those measures will be effective, particularly since the Fund does not directly control the cybersecurity defenses and
operational and technology plans and systems of its service providers, financial intermediaries and companies in which
it invests or with which it does business and there are inherent limitations in systems designed to minimize the risk of
cyber-attacks through the use of technology, processes and controls. Similar types of cybersecurity risks also are
present for issuers of securities in which the Fund invests, which could result in material adverse consequences for
such issuers, and may cause the Fund’s investment in such securities to lose value.
TEMPORARY DEFENSIVE POSITIONS

The Fund has the flexibility to respond promptly to changes in market and economic conditions. In the interest of preserving shareholders’ capital, the Subadviser may employ a temporary defensive strategy if it determines such a strategy to be warranted. Pursuant to such a defensive strategy, the Fund temporarily may hold cash (U.S. dollars, foreign currencies, or multinational currency units) and/or invest up to 100% of its assets in cash, high-quality debt securities or money market instruments of U.S. or foreign issuers. It is impossible to predict whether, when or for how long the Fund will employ temporary defensive strategies. The use of temporary defensive strategies may prevent the Fund from achieving its goal(s).

In addition, pending investment of proceeds from new sales of Fund shares or to meet ordinary daily cash needs, the Fund may temporarily hold cash (U.S. dollars, foreign currencies, or multinational currency units) and may invest any portion of its assets in money market or other short-term high-quality instruments.

PORTFOLIO TURNOVER

The Fund’s portfolio turnover rate for a fiscal year is calculated by dividing the lesser of purchases or sales of portfolio securities for the fiscal year by the monthly average of the value of the portfolio securities owned by the Fund during the fiscal year, in each case excluding securities having maturity dates at acquisition of one year or less. High portfolio turnover involves correspondingly greater brokerage commissions and other transaction costs, which will be borne directly by the Fund, thereby decreasing the Fund’s total return. High portfolio turnover also may give rise to additional taxable income for the Fund’s shareholders, including through the realization of short-term capital gains which are typically taxed to shareholders at ordinary income tax rates, and therefore can result in higher taxes for shareholders that hold their shares in taxable accounts. It is impossible to predict with certainty whether future portfolio turnover rates will be higher or lower than those experienced during past periods. The Fund anticipates that its portfolio turnover rate will vary from time to time depending on the volatility of economic, market and other conditions. The rate of portfolio turnover will not be a limiting factor when the Subadviser believes that portfolio changes are appropriate.

PORTFOLIO HOLDINGS INFORMATION

The Board has adopted a policy regarding the disclosure of information about the Fund’s portfolio holdings. Under the policy, the Fund’s portfolio holdings, which will form the basis for the calculation of NAV, are publicly disseminated each day the Fund is open for business through financial reporting and news services, including publicly accessible Internet web sites. In addition, a basket composition file, which includes the security names and share quantities to deliver in exchange for Creation Units, together with estimates and actual cash components, is publicly disseminated daily prior to the opening of the NYSE Arca via the NSCC, a clearing agency that is registered with the SEC.

Each Business Day (as defined below), the Fund's portfolio holdings information is provided to the Distributor or other agent for dissemination through the facilities of the NSCC and/or other fee-based subscription services to NSCC members and/or subscribers to those other fee-based subscription services, including market makers and Authorized Participants, and to entities that publish and/or analyze such information in connection with the process of purchasing or redeeming Creation Units or trading shares of the Fund in the secondary market or evaluating such potential transactions.

Daily access to information concerning the Fund's portfolio holdings is permitted (i) to certain personnel of those service providers that are involved in portfolio management and providing administrative, operational, risk management, or other support to portfolio management; and (ii) to other personnel of the Adviser, the Subadviser, the Distributor and their affiliates, and the administrator, custodian and fund accountant who deal directly with, or assist in, functions related to investment management, distribution, administration, custody, securities lending and fund accounting, as may be necessary to conduct business in the ordinary course in a manner consistent with federal securities laws and regulations thereunder. In addition, the Fund will disclose on the Fund’s website before commencement of trading on each Business Day the identities and quantities of the securities and other assets held by
the Fund that will form the basis of the Fund’s calculation of its NAV at the end of that Business Day (as defined below). The basket represents one Creation Unit of the Fund.

Portfolio holdings information made available in connection with the creation/redemption process may be provided to other entities that provide services to the Fund in the ordinary course of business after it has been disseminated to the NSCC. From time to time, information concerning portfolio holdings other than portfolio holdings information made available in connection with the creation/redemption process, as discussed above, may be provided to other entities that provide services to the Fund, including rating or ranking organizations, in the ordinary course of business, no earlier than one Business Day (as defined below) following the date of the information. The Fund, Adviser, Subadviser, Custodian and Distributor will not disseminate non-public information concerning the Fund, except: (i) to a party for a legitimate business purpose related to the day-to-day operations of the Fund or (ii) to any other party for a legitimate business or regulatory purpose, upon waiver or exception.

In addition, the Fund discloses its complete portfolio holdings schedule in public filings with the SEC within 70 days of the end of the second and fourth fiscal quarters and within 60 days of the end of the first and third fiscal quarters and will provide such information to shareholders as required by federal securities laws and regulations thereunder. The Fund may, however, voluntarily disclose all or part of its portfolio holdings other than in connection with the creation/redemption process, as discussed above, in advance of required filings with the SEC, provided that such information is made generally available to all shareholders and other interested parties in a manner that is consistent with the above policy for disclosure of portfolio holdings information. Such information may be made available through a publicly-available website or other means that make the information available to all likely interested parties contemporaneously.

The Fund's Chief Compliance Officer (the “CCO”) or the CCO’s delegate may authorize disclosure of portfolio holdings information pursuant to the above policy and procedures. The Board reviews the policy and procedures for disclosure of portfolio holdings information at least annually.

**MANAGEMENT OF THE TRUST**

The Trust is governed by the Board, which is responsible for generally overseeing the conduct of Fund business and for protecting the interests of shareholders. The Trustees meet periodically throughout the year to oversee the Fund’s activities, review contractual arrangements with companies that provide services to the Fund and review the Fund’s performance.

**Trustees and Officers**

The table below provides certain information regarding the Trustees and officers of the Trust. For the purposes of this table and for purposes of this Statement, the term “Independent Trustee” means those Trustees who are not “interested persons,” as defined in the 1940 Act, of the Trust. In certain circumstances, Trustees are also required to have no direct or indirect financial interest in the approval of a matter being voted on in order to be considered “independent” for the purposes of the requisite approval. For the purposes of this Statement, the term “Interested Trustee” means those Trustees who are “interested persons,” as defined in the 1940 Act, of the Trust.

The following table provides information about the members of the Board, including information about their principal occupations during the past five years, information about other directorships held at public companies, and a summary of the experience, qualifications, attributes or skills that led to the conclusion that the Trustee should serve as such. Unless otherwise indicated, the address of all persons below is 888 Boylston Street, Suite 800, Boston, MA 02199.

\(^{1}\) Each officer of the Trust serves for an indefinite term in accordance with the Trust’s current by-laws until the date his or her successor is elected and qualified, or until he or she sooner dies, retires, is removed or becomes disqualified.

\(^{2}\) Each person listed above holds the same position(s) with the Fund Complex. Previous positions during the past five years with Natixis Distribution, L.P., Natixis Advisors, L.P. or Loomis, Sayles & Company, L.P. are omitted if not materially different from a Trustee’s or officer’s current position with such entity.

Qualifications of Trustees

The preceding tables provide an overview of the considerations that led the Board to conclude that each individual serving as a Trustee of the Trust should so serve. The current members of the Board have joined the Board at different
points in time. Generally, no one factor was determinative in the original selection of an individual to join the Board. Among the factors the Board considered when concluding that an individual should serve on the Board were the following: (i) the individual’s knowledge in matters relating to the mutual fund industry; (ii) any experience possessed by the individual as a director or senior officer of other public companies; (iii) the individual’s educational background; (iv) the individual’s reputation for high ethical standards and personal and professional integrity; (v) any specific financial, technical or other expertise possessed by the individual, and the extent to which such expertise would complement the Board’s existing mix of skills and qualifications; (vi) the individual’s perceived ability to contribute to the ongoing functions of the Board, including the individual’s ability and commitment to attend meetings regularly and work collaboratively with other members of the Board; (vii) the individual’s ability to qualify as an Independent Trustee for purposes of applicable regulations; and (viii) such other factors as the Board determined to be relevant in light of the existing composition of the Board and any anticipated vacancies or other transitions. Each Trustee’s professional experience and additional considerations that contributed to the Board’s conclusion that an individual should serve on the Board are summarized in the tables above.

Leadership and Structure of the Board

The Board is led by the Chairperson of the Board, who is an Independent Trustee. The Board currently consists of twelve Trustees, ten of whom are Independent Trustees. The Trustees have delegated significant oversight authority to the three standing committees of the Trust, the Audit Committee, the Contract Review Committee and the Governance Committee, each of which consists solely of Independent Trustees. These committees meet separately and at times jointly, with the joint meetings intended to educate and involve all Independent Trustees in significant committee-level topics. As well as handling matters directly, the committees raise matters to the Board for consideration. In addition to the oversight performed by the committees and the Board, the Chairperson of the Board and the chairpersons of each committee interact frequently with management regarding topics to be considered at Board and committee meetings as well as items arising between meetings. At least once a year the Governance Committee reviews the Board’s governance practices and procedures and recommends appropriate changes to the full Board. The Board believes its leadership structure is appropriate and effective in that it allows for oversight at the committee or board level, as the case may be, while facilitating communications among the Trustees and between the Board and Fund management.

The Contract Review Committee of the Trust consists solely of Trustees who are not employees, officers or directors of Natixis Advisors, the Distributor or their affiliates and considers matters relating to advisory, subadvisory and distribution arrangements and potential conflicts of interest between the Fund’s Adviser, Subadviser and the Trust. During the fiscal year ended December 31, 2018, this committee held five meetings.

The Governance Committee of the Trust consists solely of Trustees who are not employees, officers or directors of Natixis Advisors, the Distributor or their affiliates and considers matters relating to candidates for membership on the Board and Trustee compensation. The Governance Committee makes nominations for Independent Trustee membership on the Board when necessary and considers recommendations from shareholders of the Fund that are submitted in accordance with the procedures by which shareholders may communicate with the Board. Pursuant to those procedures, shareholders must submit a recommendation for nomination in a signed writing addressed to the attention of the Board, c/o Secretary of the Funds, Natixis Advisors, L.P., 888 Boylston Street, Suite 800, Boston, MA 02199. This written communication must (i) be signed by the shareholder, (ii) include the name and address of the shareholder, (iii) identify the name of the Fund to which the communication relates, and (iv) identify the account number, class and number of shares held by the shareholder as of a recent date or the intermediary through which the shares are held. The recommendation must be received in a timely manner (and in any event no later than the date specified for receipt of shareholder proposals in any applicable proxy statement with respect to the Fund). A recommendation for Trustee nomination shall be kept on file and considered by the Board for six (6) months from the date of receipt, after which the recommendation shall be considered stale and discarded. The recommendation must contain sufficient background information concerning the Trustee candidate to enable a proper judgment to be made as to the candidate’s qualifications. During the fiscal year ended December 31, 2018, this committee held four meetings.

The Governance Committee has not established specific, minimum qualifications that must be met by an individual to be recommended for nomination as an Independent Trustee. The Governance Committee however believes that the Board as a whole should reflect a diversity of viewpoints, and will generally consider each nominee’s professional
experience, education, financial expertise, gender, ethnicity, age and other individual qualities and attributes, such considerations will vary based on the Board’s existing composition. The Governance Committee conducts an annual self-assessment and will consider the effectiveness of its diversity policy as part of this process. In evaluating candidates for a position on the Board, the Governance Committee may consider a variety of factors, including (i) the nominee’s reputation for integrity, honesty and adherence to high ethical standards; (ii) the nominee’s educational and professional accomplishments; (iii) the nominee’s demonstrated business acumen, including, but not limited to, knowledge of the mutual fund industry and/or any experience possessed by the nominee as a director or senior officer of a financial services company or a public company; (iv) the nominee’s ability to exercise sound judgment in matters related to the objectives of the Fund; (v) the nominee’s willingness to contribute positively to the decision-making process of the Board and to bring an independent point of view; (vi) the nominee’s commitment to and ability to devote the necessary time and energy to be an effective Independent Trustee; (vii) the nominee’s ability to understand the sometimes conflicting interests of various constituencies of the Fund and to act in the interests of all shareholders; (viii) the absence of conflicts of interests that would impair his or her ability to represent all shareholders and to fulfill director fiduciary responsibilities; (ix) the nominee’s ability to be collegial and compatible with current members of the Board and management of the Fund; (x) any specific financial, technical or other expertise possessed by the nominee, and the extent to which such expertise would complement the Board’s existing mix of skills and qualifications; (xi) the nominee’s ability to qualify as an Independent Trustee for purposes of applicable regulations; and (xii) such other factors as the Committee may request in light of the existing composition of the Board and any anticipated vacancies or other transitions.

The Audit Committee of the Trust consists solely of Independent Trustees and considers matters relating to the scope and results of the Trust’s audits and serves as a forum in which the independent registered public accounting firm can raise any issues or problems identified in an audit with the Board. The Audit Committee also reviews and monitors compliance with stated investment objectives and policies, SEC regulations as well as operational issues relating to the transfer agent, administrator, sub-administrator and custodian. In addition, the Audit Committee implements procedures for receipt, retention and treatment of complaints received by the Fund regarding its accounting, internal accounting controls and the confidential, anonymous submission by officers of the Fund or employees of certain service providers of concerns related to such matters. During the fiscal year ended December 31, 2018, this committee held four meetings.

The current membership of each committee is as follows:

<table>

As Chairperson of the Board, Mr. Drucker is an *ex officio* member of each Committee.

**The Board’s Role in Risk Oversight of the Fund**

The Board’s role is one of oversight of the practices and processes of the Fund and its service providers, rather than active management of the Trust, including in matters relating to risk management. The Board seeks to understand the key risks facing the Fund, including those involving conflicts of interest; how Fund management identifies and monitors these risks on an ongoing basis; how Fund management develops and implements controls to mitigate these risks; and how Fund management tests the effectiveness of those controls. The Board cannot foresee, know, or guard against all risks, nor are the Trustees guarantors against risk.

Periodically, Fund officers provide the full Board with an overview of the enterprise risk assessment program in place at Natixis Advisors and the Distributor, which serve as the administrator of and principal underwriter to the Funds respectively. Fund officers on a quarterly and annual basis also provide the Board (or one of its standing committees) with written and oral reports on regulatory and compliance matters, operational and service provider matters,
organizational developments, product proposals, Fund and internal audit results, and insurance and fidelity bond coverage, along with a discussion of the risks and controls associated with these matters, and periodically make presentations to management on risk issues and industry best practices. Fund service providers, including advisers, subadvisers, transfer agents, the distributor and the custodian, periodically provide Fund management and/or the Board with information about their risk assessment programs and/or the risks arising out of their activities. The scope and frequency of these reports vary. Fund officers also communicate with the Trustees between meetings regarding material exceptions and other items germane to the Board’s risk oversight function.

Pursuant to Rule 38a-1 under the 1940 Act, the Board has appointed a Chief Compliance Officer (“CCO”) who is responsible for administering the Fund’s compliance program, including monitoring and enforcing compliance by the Fund and its service providers with the federal securities laws. The CCO has an active role in daily Fund operations and maintains a working relationship with all relevant advisory, compliance, operations and administration personnel for the Fund’s service providers. On at least a quarterly basis, the CCO reports to the Independent Trustees on significant compliance program developments, including material compliance matters, and on an annual basis, the CCO provides the full Board with a written report that summarizes his review and assessment of the adequacy of the compliance programs of the Fund and its service providers. The CCO also periodically communicates with the Audit Committee members between its scheduled meetings.

**Fund Securities Owned by the Trustees**

As of December 31, 2018, the Trustees had the following ownership in the Fund and in all funds in the Fund Complex:

**Independent Trustees**

**Trustee Fees**

The Trust pays no compensation to its officers or to Trustees who are employees, officers or directors of Natixis Advisors, the Distributor or their affiliates.
The Chairperson of the Board receives a retainer fee at the annual rate of $360,000. The Chairperson does not receive any meeting attendance fees for Board meetings or committee meetings that he attends. Each Trustee who is not an employee, officer or director of Natixis Advisors, the Distributor or their affiliates (other than the Chairperson) receives, in the aggregate, a retainer fee at the annual rate of $190,000. Each Trustee who is not an employee, officer or director of Natixis Advisors, the Distributor or their affiliates also receives a meeting attendance fee of $10,000 for each meeting of the Board that he or she attends in person and $5,000 for each meeting of the Board that he or she attends telephonically. In addition, the Chairperson of the Audit Committee and the Chairperson of the Contract Review Committee each receive an additional retainer fee at an annual rate of $20,000. The Chairperson of the Governance Committee receives an additional retainer fee at an annual rate of $15,000. Each Contract Review Committee and Audit Committee member is compensated $6,000 for each committee meeting that he or she attends in person and $3,000 for each committee meeting that he or she attends telephonically. These fees are allocated among the funds in the Natixis Funds Trusts, the Loomis Sayles Funds Trusts and Natixis ETF Trust based on a formula that takes into account, among other factors, the relative net assets of each mutual fund portfolio. Trustees are reimbursed for travel expenses in connection with attendance at meetings.

During the fiscal year ended December 31, 2018, the Trustees received the amounts set forth in the following table for serving as Trustees of the Trust and for also serving as Trustees of the Natixis Funds Trusts and Loomis Sayles Funds Trusts. The table also sets forth, as applicable, pension or retirement benefits accrued as part of fund expenses, as well as estimated annual retirement benefits:

1 Amounts include payments deferred by Trustees for the fiscal year ended December 31, 2018, with respect to Natixis ETF Trust. The total amount of deferred compensation accrued for Natixis ETF Trust as of December 31, 2018 for the Trustees is as follows: Drucker $182, English $394, Goglia $3,959, Knox $424, Meehan $715, Palermo $1,832, Sirri $397 and Walker $4,653.

2 Total Compensation represents amounts paid during the fiscal year ended December 31, 2018 to a Trustee for serving on the Board of seven (7) trusts with a total of fifty-two (52) funds as of December 31, 2018.

The Trust, the Natixis Funds Trusts and the Loomis Sayles Funds Trusts do not provide pension or retirement benefits to the Trustees, but have adopted a deferred payment arrangement under which each Trustee may elect not to receive fees from the Funds on a current basis but to receive in a subsequent period an amount equal to the value that such fees would have been if they had been invested in the Fund or Funds selected by the Trustee on the normal payment.
date for such fees.

Management Ownership

As of April 1, 2019, the officers and Trustees of the Trust collectively owned less than 1% of the then outstanding shares of the Fund.

Code of Ethics

The Trust, its Adviser and Subadviser and the Distributor each have adopted a code of ethics under Rule 17j-1 of the 1940 Act. These codes of ethics permit the personnel of these entities to invest in securities, including securities that the Fund may purchase or hold. The codes of ethics are on public file with, and are available from the SEC.

Proxy Voting Policies

The Board has adopted Proxy Voting Policy and Guidelines (the “Procedures”) for the voting of proxies for securities held by the Fund. Under the Procedures, decisions regarding the voting of proxies are to be made solely in the interest of the Fund and its shareholders.

Information regarding how the Fund voted proxies related to its portfolio securities during the 12-month period ended June 30, 2018 is available without charge (i) by calling toll-free at 800-458-7452, (ii) through the Fund’s website, im.natixis.com and (iii) on the SEC’s website at www.sec.gov.

Natixis Advisors. Generally, proxy voting responsibilities and authority are delegated to the Fund’s Subadviser.

Loomis Sayles. Under the Procedures, the responsibility for voting proxies generally is delegated to Loomis Sayles, the investment adviser. Decisions regarding the voting of proxies shall be made solely in the interest of a Fund and its shareholders. Loomis Sayles shall exercise its fiduciary responsibilities to vote proxies with respect to a Fund’s investments that are managed by Loomis Sayles in a prudent manner in accordance with the Procedures and the proxy voting policies. Proposals that, in the opinion of Loomis Sayles, are in the best interests of shareholders generally are voted “for” and proposals that, in the judgment of Loomis Sayles, are not in the best interests of shareholders generally are voted “against.” Loomis Sayles is responsible for maintaining certain records and reporting to the Audit Committee of the Trust in connection with the voting of proxies. Upon request for reasonable periodic review as well as annual reporting to the SEC, Loomis Sayles shall make available to the Fund, or Natixis Advisors, the Fund’s administrator, the records and information maintained by Loomis Sayles under the Procedures.

Loomis Sayles uses the services of third parties (“Proxy Voting Service(s)”), to research and administer the vote on proxies for those accounts and funds for which Loom is Sayles has voting authority. One of Loomis Sayles’ Proxy Voting Services, Glass, Lewis & Company (“Glass Lewis”) provides vote recommendations and/or analysis to Loomis Sayles based on Glass Lewis’ own research. Loomis Sayles generally will follow its express policy with input from Glass Lewis unless Loomis Sayles Proxy Committee (the “Proxy Committee”) determines that the client’s best interests are served by voting otherwise.

All issues presented for shareholder vote are subject to the oversight of the Proxy Committee, either directly or by application of this policy. All non-routine issues will generally be considered directly by the Proxy Committee and, when necessary, the investment professionals responsible for an account holding the security, and will be voted in the best investment interests of the Fund. All routine “for” and “against” issues will be voted according to this policy unless special factors require that they be considered by the Proxy Committee and, when necessary, the investment professionals responsible for an account holding the security.

The specific responsibilities of the Proxy Committee include, (1) developing, authorizing, implementing and updating the Procedures, including an annual review of the Procedures, existing voting guidelines and the proxy voting process in general; (2) oversight of the proxy voting process including oversight of the vote on proposals according to the predetermined policies in the voting guidelines, directing the vote on proposals where there is reason not to vote according to the predetermined policies in the voting guidelines or where proposals require special consideration and consultation with the portfolio managers and analysts for the Fund(s) advised by Loomis Sayles holding the security when necessary or appropriate; (3) periodic sampling or engaging an outside party to sample proxy votes to ensure
they comply with the Procedures and are cast in accordance with the Fund’s best interest and (4) engagement and oversight of third-party vendors, such as Proxy Voting Services, including:

(i) determining whether a Proxy Voting Service has the capacity and competency to adequately analyze proxy issues by considering:
   (a) the adequacy and quality of the Proxy Voting Service’s staffing and personnel, and
   (b) the robustness of the Proxy Voting Service’s policies and procedures regarding its ability to ensure that its recommendations are based on current and accurate information and to identify and address any relevant conflicts of interest.

(ii) providing ongoing oversight of Proxy Voting Services to ensure that proxies continue to be voted in the best interests of clients.

(iii) receiving and reviewing updates from Proxy Voting Services regarding relevant business changes or changes to Proxy Voting Services’ conflict policies and procedures, and

(iv) in the event that the Proxy Committee becomes aware that a Proxy Voting Service’s recommendation was based on a material factual error, investigating the error, considering the nature of the error and the related recommendation, and determining whether the Proxy Voting Service has taken reasonable steps to reduce the likelihood of similar errors in the future.

Loomis Sayles has established several policies to ensure that proxy votes are voted in its clients’ best interest and are not affected by any possible conflicts of interest. First, except in certain limited instances, Loomis Sayles votes in accordance with its pre-determined policies set forth in the Procedures. Second, where these Procedures allow for discretion, Loomis Sayles generally will consider the recommendations of Glass Lewis in making its voting decisions. However, if the Proxy Committee determines that Glass Lewis’ recommendation is not in the best interest of its clients, then the Proxy Committee may use its discretion to vote against Glass Lewis’ recommendation, but only after taking the following steps: (1) conducting a review for any material conflict of interest Loomis Sayles may have and, (2) if any material conflict is found to exist, excluding anyone at Loomis Sayles who is subject to that conflict of interest from participating in the voting decision in any way. However, if deemed necessary or appropriate by the Proxy Committee after full prior disclosure of any conflict, that person may provide information, opinions or recommendations on any proposal to the Proxy Committee. In such event the Proxy Committee will make reasonable efforts to obtain and consider, prior to directing any vote information, opinions or recommendations from or about the opposing position on any proposal.

INVESTMENT ADVISORY AND OTHER SERVICES

Information About the Organization and Ownership of the Adviser and Subadviser

Natixis Advisors, is a limited partnership owned by Natixis Investment Managers, L.P. (“Natixis IM-NA”).

Natixis IM-NA is part of Natixis Investment Managers, an international asset management group based in Paris, France, that is in turn owned by Natixis, a French investment banking and financial services firm. Natixis is principally owned by BPCE, France’s second largest banking group. BPCE is owned by banks comprising two autonomous and complementary retail banking networks consisting of the Caisse d’Epargne regional savings banks and the Banque Populaire regional cooperative banks. The registered address of Natixis is 30, avenue Pierre Mendès France, 75013 Paris, France. The registered address of BPCE is 50, avenue Pierre Mendès France, 75013 Paris, France.

The 11 principal subsidiary or affiliated asset management firms of Natixis IM-NA collectively had over $440.6 billion in assets under management or administration as of December 31, 2018.

Loomis, Sayles & Company, L.P. is a limited partnership whose sole general partner, Loomis, Sayles & Company, Inc. is owned by Natixis IM-NA.
A discussion of the factors considered by the Board of Trustees in approving the Fund’s investment advisory and subadvisory contracts will be included in the Fund’s initial shareholder report covering the period in which the approval occurred.

**Advisory and Subadvisory Agreements**

The Fund’s advisory agreement with Natixis Advisors provides that the Adviser will furnish or pay the expenses of the Fund for office space, facilities and equipment, services of executive and other personnel of the Trust and certain administrative services. The Adviser may delegate certain administrative services to its affiliates. The Adviser is responsible for obtaining and evaluating such economic, statistical and financial data and information and performing such additional research as is necessary to manage the Fund’s assets in accordance with its investment objectives and policies.

The Fund pays all expenses not borne by the Adviser or Subadviser including, but not limited to, the charges and expenses of the Fund’s custodian and transfer agent, independent registered public accounting firm, legal counsel for the Fund and the Trust’s Independent Trustees, all brokerage commissions and transfer taxes in connection with portfolio transactions, all taxes and filing fees, litigation and other extraordinary expenses, the fees and expenses for registration or qualification of its shares under federal and state securities laws, all expenses of shareholders’ and Trustees’ meetings, cost of preparing, printing and mailing reports to shareholders, and the compensation of Trustees who are not directors, officers or employees of the Fund’s Adviser, Subadviser or its affiliates, other than affiliated registered investment companies (see the section “Description of the Trust”).

The advisory and subadvisory agreements of the Fund provide that each will continue in effect for two years from its date of execution and thereafter from year to year if its continuance is approved at least annually (i) by the Board of the Trust or by vote of a majority of the outstanding voting securities of the Fund and (ii) by vote of a majority of the Independent Trustees, cast in person at a meeting called for the purpose of voting on such approval. Natixis Advisors and the Trusts have received an exemptive order from the SEC (the “Order”), which permits Natixis Advisors, subject to approval by the Board but without shareholder approval, to hire or terminate, and to modify any existing or future subadvisory agreement with, subadvisers that are not affiliated with Natixis Advisors as well as subadvisers that are indirect or direct wholly-owned subsidiaries of Natixis Advisors or of another company that, indirectly or directly, wholly owns Natixis Advisors. Before any Fund can begin to rely on the exemptions described above, a majority of the shareholders of the Fund must approve the Fund’s ability to rely on the Order. Shareholders of certain Natixis Funds have already approved the Fund’s operation under the manager-of-managers structure contemplated by the Order. If a new subadviser is hired for a Fund, shareholders will receive information about the new subadviser within 90 days of the change.

Each of the advisory and subadvisory agreement may be terminated without penalty by vote of the Board of the Trust or by vote of a majority of the outstanding voting securities of the Fund, upon sixty (60) days’ written notice, or by the Fund’s Adviser upon ninety (90) days’ written notice. The advisory agreement will terminate automatically in the event of its assignment (as defined in the 1940 Act). The subadvisory agreement also may be terminated by the Subadviser upon ninety (90) days’ notice and automatically terminates upon termination of the advisory agreement.

Each of the advisory and subadvisory agreement provides that the Adviser or Subadviser shall not be subject to any liability in connection with the performance of its services thereunder in the absence of willful misfeasance, bad faith, gross negligence or reckless disregard of its obligations and duties.

Natixis Advisors oversees the portfolio management services provided to the Fund by the Subadviser and provides certain administrative services. Subject to the review of the Board, Natixis Advisors monitors the Subadviser to ensure that the Subadviser is managing the Fund’s assets consistently with the Fund’s investment objective and restrictions and applicable laws and guidelines, including, but not limited to, compliance with the diversification requirements set forth in the 1940 Act and Subchapter M of the Code. In addition, Natixis Advisors also provides the Fund with administrative services which include, among other things, day-to-day administration of matters related to the Fund’s existence, maintenance of its records, preparation of reports and assistance in the preparation of the Fund’s registration statement under federal and state laws. In addition, Natixis Advisors does not determine what investments will be purchased or sold for the Fund.
Natixis Advisors may terminate the subadvisory agreement without shareholder approval. In such case, Natixis Advisors will either enter into an agreement with another subadviser to manage the Fund.

In addition to serving as investment subadviser to the Fund, Loomis Sayles also acts as investment adviser to each series of Loomis Sayles Funds I and Loomis Sayles Funds II and certain series of Natixis Funds Trust I and Natixis Funds Trust II, each a registered open-end management investment company. Loomis Sayles also serves as subadviser to a number of other open-end management companies and provides investment advice to numerous other corporate and fiduciary clients.

**Distribution Agreement and Rule 12b-1 Plan**

**Distributor** ALPS serves as the distributor of Creation Units for the Fund on an agency basis. The Distributor’s principal address is 1290 Broadway, Suite 1100, Denver, Colorado 80203. The Fund has entered into a distribution agreement with the Distributor (the “Distribution Agreement”) under which ALPS, as agent, facilitates, in conjunction with the Fund’s Transfer Agent, orders from Authorized Participants to create and redeem shares in Creation Units and transmits such orders to the Fund’s Custodian. The Distributor is a broker-dealer registered under the Securities Exchange Act of 1934, as amended (the “1934 Act”), and a member of the Financial Industry Regulatory Authority (“FINRA”). Under the Distribution Agreement, the Distributor is not obligated to sell a specific number of shares. Shares will be continuously offered for sale by the Fund through the Distributor only in whole Creation Units, as described in the section of this Statement entitled “Creations and Redemptions.” The Distributor does not maintain a secondary market in the Fund’s shares. The Distributor also acts as an agent for the Fund for those activities described within the Distribution Agreement. The Distributor will deliver a prospectus to Authorized Participants purchasing and redeeming Creation Units and will maintain records of both orders placed with it and confirmations of acceptance furnished by it to Authorized Participants. The Distributor has no role in determining the investment policies of the Fund or which securities are to be purchased or sold by the Fund. No compensation is payable by the Fund to ALPS for such distribution services. However, the Adviser has entered into an agreement with ALPS under which it makes payments to ALPS in consideration for its services under the Distribution Agreement. The payments made by the Adviser to ALPS do not represent an additional expense to the Fund or its shareholders.

The Fund has adopted a Rule 12b-1 plan for its shares which, among other things, permit it to pay the Distributor monthly fees out of its net assets for certain distribution and/or service-related activities. Pursuant to Rule 12b-1 under the 1940 Act, the Plan was approved by the shareholders of the Fund, and (together with the Distribution Agreement) by the Board, including a majority of the Independent Trustees.

The Plan was adopted in order to permit the implementation of the Fund’s method of distribution and to compensate servicing agents. Under the Plan, the Fund may pay the Distributor an amount up to 0.25% of the Fund’s average daily net assets in order for the Distributor to compensate certain financial intermediaries that provide distribution and other services with respect to the Fund. No distribution fees are currently charged to the Fund. There are no plans to impose distribution fees, and no distribution fees will be charged for at least a year from the date of this Statement. The Adviser and its affiliates may pay amounts to third parties, including the Distributor, out of their own revenue or other resources, for distribution and other services on behalf of the Fund. In the event that distribution fees are charged in the future, because the Fund will pay these fees out of assets on an ongoing basis, over time distribution fees may cost you more than other types of sales charges and will increase the cost of your investment in the Fund.

Future payments may be made under the Plan without further shareholder approval. Under the Plan, the Trustees would review quarterly a written report of the costs incurred under the Plan and the purposes for which such costs have been incurred.

**Payments to Broker-Dealers and Other Financial Intermediaries**

The Distributor, the Adviser, the Subadviser and their affiliates may, out of their own resources, make additional payments to financial intermediaries who sell shares of the Fund. Such payments and compensation are in addition to any fees paid or reimbursed by the Fund. These payments may include: (i) additional compensation with respect to
the sale and/or servicing of Fund shares, (ii) payments based upon various factors, as described below, and (iii) financial assistance programs to firms who sell or arrange for the sale of Fund shares including, but not limited to, marketing and sales fees, expenses related to advertising or promotional activity and events, and shareholder recordkeeping, sub-transfer agency or miscellaneous administrative services. The payments to financial intermediaries described in this section and elsewhere in this Statement, which may be significant to the financial intermediaries, may create an incentive for a financial intermediary or its representatives to recommend or sell shares of the Fund or particular share class over other mutual funds or share classes. Additionally, these payments may result in the Fund’s inclusion on a sales list, including a preferred or select sales list, or in other sales programs. Investors should contact their financial representative for details about the payment the financial intermediaries may receive.

OTHER ARRANGEMENTS

Administrative Services Natixis Advisors, 888 Boylston Street, Suite 800, Boston, Massachusetts 02199, performs certain accounting and administrative services for the Fund, pursuant to an Administrative Services Agreement dated January 1, 2005, as amended from time to time (the “Administrative Agreement”). Under the Administrative Agreement, Natixis Advisors provides the following services to the Fund: (i) personnel that perform bookkeeping, accounting, internal auditing and financial reporting functions and clerical functions relating to the Fund, (ii) services required in connection with the preparation of registration statements and prospectuses, registration of shares in various states, shareholder reports and notices, proxy solicitation material furnished to shareholders of the Fund or regulatory authorities and reports and questionnaires for SEC compliance, (iii) the various registrations and filings required by various regulatory authorities, and (iv) consultation and legal advice on Fund-related matters. For these services, Natixis Advisors received the following fee from the Fund for the last two fiscal years, as applicable:

*From commencement of operations on December 27, 2017 through December 31, 2017.
¹ Effective October 1, 2018, State Street Bank agreed to reduce the fees it receives from Natixis Advisors for serving as sub-administrator to the Fund. Also, effective October 1, 2018, Natixis Advisors agreed to voluntarily waive fees paid by the Fund in an amount equal to the reduction in sub-administrative fees discussed above. The waiver is in effect through June 30, 2019.

Custodial Arrangements State Street Bank and Trust Company (“State Street Bank”), One Lincoln Street, Boston, Massachusetts 02111, serves as the custodian for the Fund. As such, State Street Bank holds in safekeeping certificated securities and cash belonging to the Fund and, in such capacity, is the registered owner of securities in book-entry form belonging to the Fund. Upon instruction, State Street Bank receives and delivers cash and securities of the Fund in connection with Fund transactions and collects all dividends and other distributions made with respect to Fund portfolio securities. State Street Bank also maintains certain accounts and records of the Fund and calculates the total NAV, total net income and NAV per share of the Fund on a daily basis.

Principal Listing Exchange The shares of the Fund are listed for trading on the NYSE Arca, a national securities exchange.

Transfer Agency Services Pursuant to a contract between the Trust, on behalf of the Fund, and State Street Bank (the “Transfer Agent”), whose principal business address is One Lincoln Street, Boston, Massachusetts 02111, State Street Bank acts as shareholder servicing and transfer agent for the Fund and is responsible for services in connection with the establishment, maintenance and recording of shareholder accounts, and the implementation of investment and redemption arrangements offered in connection with the sale of the Fund’s shares.
Independent Registered Public Accounting Firm  The Fund’s independent registered public accounting firm is PricewaterhouseCoopers LLP, located at 101 Seaport Blvd., Boston, Massachusetts 02210. The independent registered public accounting firm assists in the review of federal and state income tax returns, consults with the Fund as to matters of accounting and federal and state income taxation and will conduct an annual audit of the Fund’s financial statements.

Counsel to the Fund  Ropes & Gray LLP, located at Prudential Tower, 800 Boylston Street, Boston, Massachusetts 02199, serves as counsel to the Fund.

PORTFOLIO MANAGEMENT INFORMATION

Portfolio Managers’ Management of Other Accounts

Material Conflicts of Interest

Conflicts of interest may arise in the allocation of investment opportunities and the allocation of aggregated orders among the Fund and other accounts managed by a portfolio manager. A portfolio manager potentially could give favorable treatment to some accounts for a variety of reasons, including favoring larger accounts, accounts that pay higher fees, accounts that pay performance-based fees, accounts of affiliated companies and accounts in which the portfolio manager has an interest. Such favorable treatment could lead to more favorable investment opportunities or allocations for some accounts. The Adviser and Subadviser have adopted policies and procedures to mitigate the effects of these conflicts. For more information on how the Subadviser allocates investment opportunities between the Fund and its other clients, see the section “Allocation of Investment Opportunity Among the Fund and Other Accounts Managed by the Subadviser” in this Statement. Conflicts of interest also arise to the extent a portfolio manager short sells a stock in one client account but holds that stock long in other accounts, including the Fund, or sells a stock for some accounts while buying the stock for others, which is discussed in the section “Portfolio Transactions and Brokerage.”

Additionally, Natixis LP, an affiliate of Loomis Sayles, may purchase Creation Units through a broker-dealer to “seed” (in whole or in part) the Fund as it is launched, or may purchase shares from other broker-dealers that have previously provided seed capital for the Fund when it was launched or otherwise in secondary market transactions, and because Loomis Sayles may be deemed an affiliate for the Fund, the shares are being registered to permit the resale of these shares from time to time after purchase. The Fund will not receive any of the proceeds from the resale by Loomis Sayles of these shares.
Portfolio Managers’ Compensation

The following describes the structure of, and the method used to determine, the compensation of each of the above-listed portfolio managers as of December 31, 2018.

Loomis Sayles believes that portfolio manager compensation should be driven primarily by the delivery of consistent and superior long-term performance for its clients. Portfolio manager compensation is made up primarily of three main components: base salary, variable compensation and a long-term incentive program. Although portfolio manager compensation is not directly tied to assets under management, a portfolio manager’s base salary and/or variable compensation potential may reflect the amount of assets for which the manager is responsible relative to other portfolio managers. Loomis Sayles also offers a profit sharing plan. Base salary is a fixed amount based on a combination of factors, including industry experience, firm experience, job performance and market considerations. Variable compensation is an incentive-based component and generally represents a significant multiple of base salary. Variable compensation is based on four factors: investment performance, profit growth of the firm, profit growth of the manager’s business unit and personal conduct. Investment performance is the primary component of total variable compensation and generally represents at least 60% of the total. The other three factors are used to determine the remainder of variable compensation, subject to the discretion of the Chief Investment Officer (“CIO”) and senior management. The CIO and senior management evaluate these other factors annually.

While mutual fund performance and asset size do not directly contribute to the compensation calculation, investment performance for fixed-income managers is measured by comparing the performance of Loomis Sayles’ institutional composite (pre-tax and net of fees) in the manager’s style to the performance of an external benchmark and a customized peer group. The external benchmark used for the investment style utilized by the Fund is noted below. The customized peer group is created by Loomis Sayles and is made up of institutional managers in the particular investment style. A manager’s relative performance for the past five years, or seven years for some products, is used to calculate the amount of variable compensation payable due to performance. To ensure consistency, Loomis Sayles analyzes the five- or seven-year performance on a rolling three-year basis. If a manager is responsible for more than one product, the rankings of each product are weighted based on relative revenue size of accounts represented in each product.

Loomis Sayles uses both an external benchmark and a customized peer group as a point of comparison for fixed-income manager performance because it believes they represent an appropriate combination of the competitive fixed-income product universe and the investment styles offered by Loomis Sayles.

<table>
<thead>
<tr>
<th>FUND</th>
<th>MANAGER BENCHMARK</th>
</tr>
</thead>
<tbody>
<tr>
<td>Loomis Sayles ETF</td>
<td>Bloomberg Barclays US Government/Credit 1-3 Year Index</td>
</tr>
</tbody>
</table>

In addition to the compensation described above, portfolio managers may receive additional compensation based on the overall growth of their strategies.

Most mutual funds do not directly contribute to a portfolio manager’s overall compensation because Loomis Sayles uses the performance of the portfolio manager’s institutional accounts compared to an institutional peer group.

However, each fund managed by Loomis Sayles employs strategies endorsed by Loomis Sayles and fits into the product category for the relevant investment style. Loomis Sayles may adjust compensation if there is significant dispersion among the returns of the composite and accounts not included in the composite.

Loomis Sayles has developed and implemented two distinct long-term incentive plans to attract and retain investment talent. The plans supplement existing compensation. The first plan has several important components distinguishing it from traditional equity ownership plans:
• the plan grants units that entitle participants to an annual payment based on a percentage of company earnings above an established threshold;
• upon retirement, a participant will receive a multi-year payout for his or her vested units; and
• participation is contingent upon signing an award agreement, which includes a non-compete covenant.

The second plan is similarly constructed although the participants’ annual participation in company earnings is deferred for two years from the time of award and is only payable if the portfolio manager remains at Loomis Sayles. In this plan, there is no post-retirement payments or non-compete covenants.

Senior management expects that the variable compensation portion of overall compensation will continue to remain the largest source of income for those investment professionals included in the plan(s). The plan(s) was/were initially offered to portfolio managers and over time the scope of eligibility widened to include other key investment professionals. Management has full discretion on what units are issued and to whom.

Portfolio managers also participate in the Loomis Sayles profit sharing plan, in which Loomis Sayles makes a contribution to the retirement plan of each employee based on a percentage of base salary (up to a maximum amount). The portfolio managers may also participate in the Loomis Sayles defined benefit pension plan, which applies to all Loomis Sayles employees who joined the firm prior to May 3, 2003. The defined benefit is based on years of service and base compensation (up to a maximum amount).

Portfolio Managers’ Ownership of Fund Shares

   B. $1 – 10,000               F. $500,001 - $1,000,000
   C. $10,001 - $50,000        G. over $1,000,000
   D. $50,001 - $100,000

There are various reasons why a portfolio manager may not own shares of the Fund he or she manages. One reason is that the Fund’s investment objective and strategies may not match those of the portfolio manager’s personal investment objective. Also, the portfolio manager may invest in other funds or pooled investment vehicles or separate accounts managed by the portfolio manager in a similar style to the Fund. Administrative reasons (such as facilitating compliance with an adviser’s code of ethics) also may explain why a portfolio manager has chosen not to invest in the Fund.

Allocation of Investment Opportunity Among the Fund and Other Accounts Managed by the Subadviser

Loomis Sayles has organized its business into two investment groups: The Fixed Income Group and The Equity Group. The Fixed Income Group and the Equity Group make investment decisions for the funds managed by Loomis Sayles. The groups make investment decisions independently of one another. These groups also have responsibility for the management of other client portfolios. The other investment companies and clients served by Loomis Sayles’ investment platforms sometimes invest in securities in which the funds (or segments thereof) advised or subadvised by Loomis Sayles also invest. If one of these funds and such other clients advised or subadvised by the same investment group of Loomis Sayles desire to buy or sell the same portfolio securities at or about the same time, the respective group allocates purchases and sales, to the extent practicable, on a pro rata basis in proportion to the amount desired to be purchased or sold for each fund or client advised or subadvised by that investment group. It is recognized
that in some cases the practices described in this paragraph could have a detrimental effect on the price or amount of
the securities which each of the funds purchases or sells. In other cases, however, it is believed that these practices
may benefit the relevant Fund.

PORTFOLIO TRANSACTIONS AND BROKERAGE

Subject to procedures adopted by the Board, the Fund’s brokerage transactions may be executed by broker-dealers
that are affiliated with Natixis IM-NA, the Adviser, or the Subadviser. Any such transactions will comply with Rule
17e-1 under the 1940 Act, or other applicable restrictions as permitted by the SEC pursuant to exemptive relief or
otherwise.

Under the 1940 Act, persons affiliated with the Fund are prohibited from dealing with the Trust’s funds as a principal
in the purchase and sale of securities. Since transactions in the OTC market usually involve transactions with dealers
acting as principals for their own accounts, affiliated persons of the Fund may not serve as the Fund’s dealer in
connection with such transactions.

It is expected that the portfolio transactions in fixed-income securities generally will be with issuers or dealers on a
net basis without a stated commission. Securities firms may receive brokerage commissions on transactions involving
options, futures and options on futures and the purchase and sale of underlying securities upon exercise of options.
The brokerage commissions associated with buying and selling options may be proportionately higher than those
associated with general securities transactions.

DESCRIPTION OF THE TRUST

The Declaration of Trust permits the Trustees to issue an unlimited number of full and fractional shares of each series.
Each share of the Fund represents an equal proportionate interest in the Fund with each other share of the Fund and is
entitled to a proportionate interest in the dividends and distributions from the Fund. The Declaration of Trust further
permits the Board to divide the shares of each series into any number of separate classes, each having such rights and
preferences relative to other classes of the same series as the Board may determine. When you invest in the Fund, you
acquire freely transferable shares of beneficial interest that entitle you to receive dividends as determined by the Board
and to cast a vote for each share you own at shareholder meetings. The shares of the Fund do not have any preemptive
rights. Upon termination of the Fund, whether pursuant to liquidation of a Trust or otherwise, shareholders of the Fund
are entitled to share pro rata in the net assets attributable to that class of shares of the Fund available for distribution
to shareholders. The Declaration of Trust also permits the Board to charge shareholders directly for custodial, transfer
agency and servicing expenses.

The assets received by the class of the Fund for the issue or sale of its shares and all income, earnings, profits, losses
and proceeds therefrom, subject only to the rights of the creditors, are allocated to, and constitute the underlying assets
of, that class of the Fund. The underlying assets of the class of the Fund are segregated and are charged with the
expenses with respect to that class of the Fund and with a share of the general expenses of the Fund and Trust. Any
general expenses of the Trust that are not readily identifiable as belonging to a particular class of the Fund are allocated
by or under the direction of the Trustees in such manner as the Trustees determine to be fair and equitable. While the
expenses of the Trust are allocated to the separate books of account of each series of the Trust, certain expenses may
be legally chargeable against the assets of all of the series in the Trust.

The Declaration of Trust also permits the Board, without shareholder approval, to subdivide the Fund or series or class
of shares into various sub-series or sub-classes with such dividend preferences and other rights as the Trustees may
designate. The Board may also, without shareholder approval, establish one or more additional series or classes or,
with shareholder approval, merge two or more existing series or classes. Shareholders’ investments in such an
additional or merged series would be evidenced by a separate series of shares (i.e., a new “fund”).

The Declaration of Trust provides for the perpetual existence of the Trust. The Trust or the Fund, however, may be
terminated at any time by vote of at least two-thirds of each series of the Trust entitled to vote. In addition, the Fund
may be terminated at any time by vote of at least two-thirds of the outstanding shares of the Fund. Similarly, any class
within the Fund may be terminated by vote of at least two-thirds of the outstanding shares of such class. The
Declaration of Trust further provides that the Board may also, without shareholder approval, terminate the Trust or
Fund upon written notice to its shareholders by vote or written consent of a majority of Trustees.

VOTING RIGHTS

Shareholders of the Fund are entitled to one vote for each full share held (with fractional votes for each fractional
share held) and may vote (to the extent provided therein) on the election of Trustees and the termination of the Trust
and on other matters submitted to the vote of shareholders.

Shareholders of the Trust have identical voting rights to each other. On any matters submitted to a vote of
shareholders, all shares of the Trust then entitled to vote shall, except as otherwise provided in the Trust’s by-laws, be
voted in the aggregate without regard to series of shares, except (i) when required by the 1940 Act, or when the
Trustees shall have determined that the matter affects one or more series materially differently, shares shall be voted
by individual series and (ii) when the matter affects only the interest of one or more series, only shareholders of such
series shall be entitled to vote thereon. Consistent with the current position of the SEC, shareholders of all series vote
together, irrespective of series, on the election of Trustees and the selection of the Trust’s independent registered
public accounting firm, but shareholders of each series vote separately on most other matters requiring shareholder
approval, such as certain changes in investment policies of that series or the approval of the investment advisory
agreement relating to that series.

There will normally be no meetings of shareholders for the purpose of electing Trustees except that, in accordance
with the 1940 Act, (i) the Trust will hold a shareholders’ meeting for the election of Trustees at such time as less than
a majority of the Trustees holding office have been elected by shareholders, and (ii) if there is a vacancy on a Board,
such vacancy may be filled only by a vote of the shareholders unless, after filling such vacancy by other means, at
least two-thirds of the Trustees holding office shall have been elected by the shareholders. In addition, Trustees may
be removed from office by a written consent signed by the holders of two-thirds of the outstanding shares and filed
with the Trust’s custodian or by a vote of the holders of two-thirds of the outstanding shares at a meeting duly called
for that purpose.

Upon written request by a minimum of ten holders of shares having held their shares for a minimum of six (6) months
and having an NAV of at least $25,000 or constituting at least 1% of the outstanding shares, whichever is less, stating
that such shareholders wish to communicate with the other shareholders for the purpose of obtaining the signatures
necessary to demand a meeting to consider removal of a Trustee, the Trust has undertaken to provide a list of
shareholders or to disseminate appropriate materials (at the expense of the requesting shareholders).

Except as set forth above, the Trustees shall continue to hold office and may appoint successor Trustees. Shareholder
voting rights are not cumulative.

The affirmative vote of a majority of shares of the Trust voted (assuming a quorum is present in person or by proxy)
is required to amend a Declaration of Trust if such amendment (i) affects the power of shareholders to vote, (ii) amends
the section of the Declaration of Trust governing amendments, (iii) is one for which a vote is required by law or by
the Trust’s registration statement, or (iv) is submitted to the shareholders by the Trustees. If one or more new series
of the Trust is established and designated by the Trustees, the shareholders having beneficial interests in the funds
shall not be entitled to vote on matters exclusively affecting such new series, such matters including, without
limitation, the adoption of or any change in the investment objectives, policies or restrictions of the new series and the
approval of the investment advisory contracts of the new series. Similarly, the shareholders of the new series shall
not be entitled to vote on any such matters as they affect the other funds.
SHAREHOLDER AND TRUSTEE LIABILITY

Under Massachusetts law, shareholders could, under certain circumstances, be held personally liable for the obligations of the Trust. However, the Declaration of Trust disclaims shareholder liability for acts or obligations of the Trust and requires that notice of such disclaimer be given in each agreement, obligation or instrument entered into or executed by the Trust or the Trustees. The Declaration of Trust provides for indemnification out of the Fund’s property for all loss and expense of any shareholder held personally liable for the obligations of the Fund by reason of owning shares of such Fund. Thus, the risk of a shareholder incurring financial loss on account of shareholder liability is considered remote since it is limited to circumstances in which the disclaimer is inoperative and the Fund itself would be unable to meet its obligations.

The Declaration of Trust further provides that the Board will not be liable for errors of judgment or mistakes of fact or law. However, nothing in the Declaration of Trust protects a Trustee against any liability to which the Trustee would otherwise be subject by reason of willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of his or her office. The by-laws of the Trust provide for indemnification by the Board of Trustees and officers of the Trust, except with respect to any matter as to which any such person did not act in good faith in the reasonable belief that his or her action was in the best interests of the Trust. Such persons may not be indemnified against any liability to the Trust or the Trust’s shareholders to whom he or she would otherwise be subject by reason of willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of his or her office. The Trust offers only its own fund’s shares for sale, but it is possible that the Trust might become liable for any misstatements in a prospectus that relate to another Trust.

CREATIONS AND REDEMPTIONS

The Fund issues and sells shares of the Fund only in Creation Units of 100,000 shares on a continuous basis through the Distributor, without a sales load, at the NAV next determined after receipt of an order in proper form as described in the Authorized Participant Agreement (as defined below), on any Business Day (as defined below).

A “Business Day” with respect to the Fund is each day the Fund is open, including any day that the Fund is required to be open under Section 22(e) of the 1940 Act, which excludes weekends and the following holidays: New Year’s Day, Martin Luther King, Jr. Day, Presidents’ Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. Orders from large institutional investors who have entered into agreements with the Fund’s Distributor (i.e., the “Authorized Participants”), which have been accepted by the Transfer Agent, to create or redeem Creation Units will only be accepted on a Business Day. As noted below, on certain Business Days, underlying markets in which the Fund invests will be closed. On those days, the Fund may be unable to purchase or sell securities in such markets.

The time at which transactions and shares are priced and the time by which orders must be received may be changed in case of an emergency or if regular trading on NYSE Arca is stopped at a time other than its regularly scheduled closing time. The Fund reserves the right to reprocess creation and redemption transactions that were initially processed at any NAV other than the Fund’s official closing NAV (as the same may be subsequently adjusted), and to recover amounts from (or distribute amounts to) Authorized Participants based on the official closing NAV.

Fund Deposit

The consideration for purchase of Creation Units generally consists of Deposit Securities and the Cash Component, which will generally correspond pro rata, to the extent practicable, to the Fund securities, or, as permitted by the Fund, the Cash Deposit. Together, the Deposit Securities and the Cash Component or, alternatively, the Cash Deposit, constitutes the “Fund Deposit,” which represents the minimum initial and subsequent investment amount for a Creation Unit of the Fund. The portfolio of securities required may, in certain limited circumstances, differ from the portfolio of securities the Fund will deliver upon redemption of Fund shares.

The function of the Cash Component is to compensate for any differences between the NAV per Creation Unit and the Deposit Amount (as defined below). The Cash Component is an amount equal to the difference between the NAV of the shares (per Creation Unit) and the “Deposit Amount,” which is an amount equal to the market value of the Deposit Securities. If the Cash Component is a positive number (the NAV per Creation Unit exceeds the Deposit
Amount), the Authorized Participant will deliver the Cash Component to the Fund. If the Cash Component is a negative number (the NAV per Creation Unit is less than the Deposit Amount), the Authorized Participant will receive the Cash Component from the Fund. Computation of the Cash Component excludes any stamp duty or other similar fees and expenses payable upon transfer of beneficial ownership of the Deposit Securities, which shall be the sole responsibility of the Authorized Participant. The Cash Component may also include a “Dividend Equivalent Payment,” which enables the Fund to make a complete distribution of dividends on the next dividend payment date, and is an amount equal, on a per Creation Unit basis, to the dividends on all the securities held by the Fund with ex-dividend dates within the accumulation period for such distribution (the “Accumulation Period”), net of expenses and liabilities for such period, as if all of the securities had been held by the Fund for the entire Accumulation Period. The Accumulation Period begins on the ex-dividend date for the Fund and ends on the next ex-dividend date.

State Street Bank, the Fund’s transfer agent and custodian, through the NSCC, makes available on each Business Day, prior to the opening of business (subject to amendments) on NYSE Arca (currently 9:30 a.m., Eastern time), the identity and the required number of each Deposit Security and the amount of the Cash Component to be included in the current Fund Deposit (based on information at the end of the previous Business Day).

The Deposit Securities and Cash Component are subject to any adjustments, as described below, in order to effect purchases of Creation Units of the Fund until such time as the next-announced composition of the Deposit Securities and Cash Component is made available.

The identity and amount of the Deposit Securities and Cash Component (or Cash Deposit) changes pursuant to the changes in the composition of the Fund’s portfolio and as rebalancing adjustments are effected from time to time by the Subadviser with a view to the investment objective of the Fund.

The Fund may also permit the substitution of an amount of cash (a “cash-in-lieu” amount) to replace any Deposit Security of the Fund that is a non-deliverable instrument. The amount of cash contributed will be equivalent to the price of the instrument listed as a Deposit Security. The Fund reserves the right to permit the substitution of a “cash in-lieu” amount to be added to replace any Deposit Security that may not be available in sufficient quantity for delivery, that may not be eligible for trading by a Participating Party (defined below), that may not be permitted to be re-registered in the name of the Fund as a result of an in-kind creation order pursuant to local law or market convention, or that may not be eligible for transfer through the systems of the Depository Trust Company (the “DTC”) or the Clearing Process (as discussed below), or the Federal Reserve System for U.S. Treasury securities. The Fund also reserves the right to permit a “cash-in-lieu” amount where the delivery of Deposit Securities by the Authorized Participant (as described below) would be restricted under the securities laws or where the delivery of Deposit Securities from an investor to the Authorized Participant would result in the disposition of Deposit Securities by the Authorized Participant becoming restricted under the securities laws, and in certain other situations at the discretion of the Fund.

Except in the limited circumstances described above, Deposit Securities will correspond pro rata to the positions in the Fund’s portfolio. “Cash-in-lieu” amounts will only be used in the creation and redemption process when the use is consistent with applicable law.

**Procedures for Creating Creation Units**

To be eligible to place orders with the Distributor and to create a Creation Unit of the Fund, an entity must be: (i) a “Participating Party” (i.e. a broker-dealer or other participant in the clearing process through the Continuous Net Settlement System of the NSCC (the “Clearing Process”), a clearing agency that is registered with the SEC); or (ii) a participant of the DTC (“DTC Participant”) and must have executed an Authorized Participant Agreement with the Distributor, which has been accepted by the Transfer Agent, with respect to creations and redemptions of Creation Units (“Authorized Participant Agreement”) (discussed below). A Participating Party or DTC Participant who has executed an Authorized Participant Agreement is referred to as an “Authorized Participant.” All shares of the Fund, however created, will be entered on the records of the DTC in the name of its nominee for the account of a DTC Participant.
Except as described below, and in all cases subject to the terms of the applicable Authorized Participant Agreement and any creation and redemption procedures adopted by the Fund and provided to all Authorized Participants, to initiate a creation order for a Creation Unit, an Authorized Participant must submit an irrevocable order to purchase shares in proper form to the Transfer Agent no later than 2:00 p.m., Eastern Time, or such earlier time as may be designated by the Fund and disclosed to Authorized Participants (the “Order Cut-off Time”), on any Business Day for creation of Creation Units to be effected based on the NAV of shares of the Fund on that Business Day. The date on which an order to create Creation Units (or an order to redeem Creation Units, as discussed below) is placed is referred to as the “Transmittal Date.” Orders must be transmitted by an Authorized Participant via the electronic order entry system, by telephone or other transmission method acceptable to the Transfer Agent and the Distributor pursuant to procedures set forth in the Authorized Participant Agreement. Economic or market disruptions or changes, or telephone or other communication failure may impede the ability to reach the Distributor or an Authorized Participant.

All investor orders to create Creation Units shall be placed with an Authorized Participant in the form required by such Authorized Participant. In addition, an Authorized Participant may request that an investor make certain representations or enter into agreements with respect to an order (to provide for payments of cash). Investors should be aware that their particular broker-dealer may not have executed an Authorized Participant Agreement and, therefore, orders to create Creation Units of the Fund will have to be placed by the investor’s broker-dealer through an Authorized Participant. In such cases, there may be additional charges to such investor.

Creation Units may be created in advance of the receipt by the Fund of all or a portion of the Fund Deposit. In such cases, the Authorized Participant will remain liable for the full deposit of the missing portion(s) of the Fund Deposit and will be required to post collateral with the Fund consisting of cash up to 115% of the marked-to-market value of such missing portion(s). The Fund may use such collateral to buy the missing portion(s) of the Fund Deposit at any time and will subject such Authorized Participant to liability for any shortfall between the cost to the Fund of purchasing such securities and the value of such collateral. The Fund will have no liability for any such shortfall. The Fund will return any unused portion of the collateral to the Authorized Participant once the entire Fund Deposit has been properly received by the Custodian and deposited into the Fund. Orders for Creation Units that are effected outside the Clearing Process are likely to require transmittal by the DTC Participant earlier on the Transmittal Date than orders effected using the Clearing Process. Those persons placing orders outside the Clearing Process should ascertain the deadlines applicable to the DTC and the Federal Reserve Bank wire system by contacting the operations department of the broker-dealer or depository institution effectuating such transfer of Deposit Securities and Cash Component.

Orders to create Creation Units of the Fund may be placed through the Clearing Process utilizing procedures applicable for domestic securities (see “Placement of Creation Orders Using the Clearing Process”) or outside the Clearing Process utilizing the procedures applicable for foreign securities (see “Placement of Creation Orders Outside the Clearing Process”). In the event that the Fund includes both domestic and foreign securities, the time for submitting orders as stated in the “Placement of Creation Orders Outside the Clearing Process” section below shall operate.

**Placement of Creation Orders Using the Clearing Process**

Fund Deposits created through the Clearing Process, if available, must be delivered through a Participating Party that has executed an Authorized Participant Agreement.

The Authorized Participant Agreement authorizes the Custodian to transmit to NSCC on behalf of the Participating Party such trade instructions as are necessary to effect the Participating Party’s creation order. Pursuant to such trade instructions from the Custodian to NSCC, the Participating Party agrees to transfer the requisite Deposit Securities (or contracts to purchase such Deposit Securities that are expected to be delivered in a “regular way” manner within two Business Days) and the Cash Component to the Fund, together with such additional information as may be required by the Transfer Agent and the Distributor as set forth in the Authorized Participant Agreement. An order to create Creation Units of the Funds through the Clearing Process is deemed received by the Distributor on the Transmittal Date if (i) such order is received by the Distributor not later than 2:00 p.m., Eastern Time, or such earlier time as may be designated by the Fund and disclosed to Authorized Participants on such Transmittal Date and (ii) all other procedures set forth in the Authorized Participant Agreement are properly followed. All orders are subject to acceptance by the Fund and the Distributor in accordance with the procedures set forth in the Authorized Participant Agreement.
Placement of Creation Orders Outside the Clearing Process

The Distributor will inform the Transfer Agent, the Adviser, the Subadviser and the Custodian upon receipt of a Creation Order. The Custodian will then provide such information to the appropriate sub-custodian. The Custodian will cause the sub-custodian of the Fund to maintain an account into which the Deposit Securities (or the cash value of all or part of such securities, in the case of a permitted or required cash purchase or “cash-in-lieu” amount) will be delivered. Deposit Securities must be delivered to an account maintained at the applicable local custodian. The Fund must also receive, on or before the contractual settlement date, immediately available or same day funds estimated by the Custodian to be sufficient to pay the Cash Component next determined after receipt in proper form of the purchase order, together with the creation transaction fee described below.

Once a creation order is accepted by the Fund and the Distributor, the Transfer Agent will confirm the issuance of a Creation Unit of the Fund against receipt of payment, at such NAV as will have been calculated after receipt in proper form of such order. The Transfer Agent will then transmit a confirmation of acceptance of such order.

Creation Units will not be issued until the transfer of good title to the Fund of the Deposit Securities and the payment of the Cash Component have been completed. When the sub-custodian has confirmed to the Custodian that the required Deposit Securities (or the cash value thereof) have been delivered to the account of the relevant sub-custodian, the Distributor, the Subadvisor and the Adviser will be notified of such delivery and the Transfer Agent will issue and cause the delivery of the Creation Units.

Acceptance of Creation Orders

The Fund and the Distributor reserve the absolute right to reject or revoke acceptance of a creation order transmitted to it in respect to the Fund, for example if: (i) the order is not in proper form; (ii) the investor(s), upon obtaining the shares ordered, would own 80% or more of the currently outstanding shares of the Fund; (iii) acceptance of the Fund Deposit would have certain adverse tax consequences to the Fund; (iv) acceptance of the Fund Deposit would, in the opinion of counsel, be unlawful; (v) acceptance of the Fund Deposit would otherwise, in the discretion of the Fund, the Subadviser or the Adviser, have an adverse effect on the Fund or the rights of beneficial owners of such Fund; or (vi) in the event that circumstances outside the control of the Fund, the Transfer Agent, the Distributor, the Subadviser or the Adviser make it for all practical purposes impossible to process creation orders. Examples of such circumstances include acts of God; public service or utility problems such as fires, floods, extreme weather conditions and power outages resulting in telephone, facsimile and computer failures; market conditions or activities causing trading halts; systems failures involving computer or other information systems affecting the Fund, the Subadviser, the Adviser, the Transfer Agent, the DTC, the Clearing Process, Federal Reserve, the Transfer Agent or any other participant in the creation process, and other extraordinary events. The Distributor shall notify the Authorized Participant acting on behalf of the creator of a Creation Unit of its rejection of the order of such person. The Fund, Transfer Agent, and the Distributor are under no duty, however, to give notification of any defects or irregularities in the delivery of Fund Deposits nor shall any of them incur any liability for the failure to give any such notification.

All questions as to the number of shares of Deposit Securities and the validity, form, eligibility, and acceptance for deposit of any securities to be delivered and the amount and form of the Cash Component, as applicable, shall be determined by the Fund, and the Fund’s determination shall be final and binding.

Creation Transaction Fee

A fixed creation transaction fee of $500, charged by and payable to the Custodian is imposed on each in-kind creation transaction ($100 for cash creations) regardless of the number of Creation Units purchased in the transaction. In the case of cash creations or where the Fund permits a creator to substitute cash in lieu of depositing a portion of the Deposit Securities, the creator may be assessed an additional variable charge of up to 3% of the value of a Creation
Unit to compensate the Fund for the costs associated with purchasing the applicable securities (see “Fund Deposit”) section above. As a result, in order to seek to replicate the in-kind creation order process, the Fund expects to purchase, in the secondary market or otherwise gain exposure to, the portfolio securities that could have been delivered as a result of an in-kind creation order pursuant to local law or market convention, or for other reasons (“Market Purchases”). In such cases where the Fund makes Market Purchases, the Authorized Participant will reimburse the Fund for, among other things, any difference between the market value at which the securities and/or financial instruments were purchased by the Fund and the cash in lieu amount (which amount, at the Advisor’s discretion, may be capped), applicable registration fees, brokerage commissions and certain taxes. The Advisor may adjust the transaction fee to the extent the composition of the creation securities changes or cash in lieu is added to the Cash Component to protect ongoing shareholders. Creators of Creation Units are responsible for the costs of transferring the securities constituting the Deposit Securities to the account of the Fund.

Redemption of Creation Units

Shares may be redeemed only in Creation Units at the NAV next determined after receipt of a redemption request in proper form on a Business Day and only through a Participating Party or DTC Participant who has executed an Authorized Participant Agreement. The Fund will not redeem shares in amounts less than Creation Units (except the Fund may redeem shares in amounts less than a Creation Unit in the event the Fund is being liquidated). Beneficial owners must accumulate enough shares in the secondary market to constitute a Creation Unit in order to have such shares redeemed by the Fund. There can be no assurance, however, that there will be sufficient liquidity in the public trading market at any time to permit assembly of a Creation Unit. Authorized Participants should expect to incur brokerage and other costs in connection with assembling a sufficient number of shares to constitute a redeemable Creation Unit. All redemptions are subject to the procedures contained in the applicable Authorized Participant Agreement.

With respect to the Fund, State Street Bank, through the NSCC, makes available immediately prior to the opening of business on NYSE Arca (currently 9:30 a.m., Eastern time) on each Business Day, the identity of the Fund’s securities and/or an amount of cash that will be applicable (subject to possible amendment or correction) to redemption requests received in proper form (as described below) on that Business Day. An order that is not received in good form is subject to acceptance by the Fund and the Distributor. The Fund’s securities received on redemption will generally correspond pro rata, to the positions in the Fund’s portfolio. The Fund’s securities received on redemption (“Fund Securities”) will generally be identical to Deposit Securities that are applicable to creations of Creation Units. Except as described below, and in all cases subject to the terms of the applicable Authorized Participant Agreement and any creation and redemption procedures adopted by the Fund and provided to all Authorized Participants, to initiate a redemption order for a Creation Unit, an Authorized Participant must submit an irrevocable order to redeem shares in proper form to the Transfer Agent no later than 2:00 p.m., Eastern Time, or such earlier time as may be designated by the Fund and disclosed to Authorized Participants (the “Order Cut-Off Time”), on any Business Day for redemption of Creation Units to be effected based on the NAV of shares of the Fund on that Business Day.

Orders must be transmitted by an Authorized Participant via the electronic order entry system, by telephone or other transmission method acceptable to the Transfer Agent and the Distributor pursuant to procedures set forth in the Authorized Participant Agreement. Economic or market disruptions or changes, or telephone or other communication failure may impede the ability to reach the Distributor or an Authorized Participant.

Unless cash only redemptions are available or specified for the Fund, the redemption proceeds for a Creation Unit will generally consist of Fund Securities – as announced on the morning of the Business Day of the request for a redemption order received in proper form – plus cash in an amount equal to the difference between the NAV of the shares being redeemed, as next determined after a receipt of a request in proper form, and the value of the Fund Securities, less the redemption transaction fee and variable fees described below. Notwithstanding the foregoing, the Fund may substitute a “cash-in-lieu” amount to replace any Fund Security in certain limited circumstances. “Cash-in-lieu” amounts will only be used in the redemption process when the use is consistent with applicable law. The amount of cash paid out in such cases will be equivalent to the value of the instrument listed as the Fund Security. In the event that the Fund Securities have a value greater than the NAV of the shares, a compensating cash payment equal to the difference will be included in the Cash Component required to be delivered by an Authorized Participant.
Redemptions of shares for Fund Securities will be subject to compliance with applicable U.S. federal and state securities laws, and the Fund reserves the right to redeem Creation Units for cash to the extent that the Fund could not lawfully deliver specific Fund Securities upon redemptions or could not do so without first registering the Fund Securities under such laws. An Authorized Participant, or a beneficial owner of shares for which it is acting, subject to a legal restriction with respect to a particular security included in the redemption of a Creation Unit may be paid an equivalent amount of cash. This would specifically prohibit delivery of Fund Securities that are not registered in reliance upon Rule 144A under the Securities Act of 1933 (“1933 Act”) to a redeeming beneficial owner of shares that is not a “qualified institutional buyer,” as such term is defined under Rule 144A of the 1933 Act. The Authorized Participant may request the redeeming beneficial owner of the shares to complete an order form or to enter into agreements with respect to such matters as compensating cash payment.

The right of redemption may be suspended or the date of payment postponed with respect to the Fund: (i) for any period during which NYSE Arca is closed (other than customary weekend and holiday closings); (ii) for any period during which trading on NYSE Arca is suspended or restricted; (iii) for any period during which an emergency exists as a result of which disposal by the Fund of securities it owns or determination of the Fund’s NAV is not reasonably practicable; or (iv) in such other circumstances as permitted by the SEC.

If the Fund determines, based on information available to the Fund when a redemption request is submitted by an Authorized Participant, that (i) the short interest of the Fund in the marketplace is greater than or equal to 100% and (ii) the orders in the aggregate from all Authorized Participants redeeming fund shares on a Business Day represent 25% or more of the outstanding shares of the Fund, such Authorized Participant will be required to verify to the Fund the accuracy of its representations that are deemed to have been made by submitting a request for redemption.

If, after receiving notice of the verification requirement, the Authorized Participant does not verify, with respect to any portion of the shares of the Fund requested to be redeemed, the accuracy of the Authorized Participant’s representations that are deemed to have been made by submitting a redemption request, the Fund reserves the right to reject that portion of the redemption request.

The Fund generally intends to effect deliveries of portfolio securities within two business days (i.e., days on which NYSE is open) of receipt of a redemption request. The ability of the Fund to effect in-kind redemptions within two Business Days of receipt of a redemption request is subject, among other things, to the condition that, within the time period from the date of the request to the date of delivery of the securities, there are no days that are local market holidays on the relevant business days. For every occurrence of one or more intervening holidays in the local market that are not holidays observed in the United States, the redemption settlement cycle may be extended by the number of such intervening local holidays. In addition to holidays, other unforeseeable closings in a foreign market due to emergencies may also prevent the Fund from delivering securities within two business days.

The securities delivery cycles currently practicable for transferring portfolio securities to redeeming investors, coupled with local market holiday schedules, may require a delivery process longer than the standard settlement period. In certain circumstances during the calendar year, the settlement period may be greater than seven calendar days. Such periods are listed in the table below, as are instances where more than seven days will be needed to deliver redemption proceeds. Since certain holidays may occur on different dates in subsequent years, the number of days required to deliver redemption proceeds in any given year may exceed the maximum number of days listed in the table below. The proclamation of new holidays, the treatment by market participants of certain days as “informal holidays” (e.g., days on which no or limited securities transactions occur, as a result of substantially shortened trading hours), the elimination of existing holidays, or changes in local securities delivery practices, could affect the information set forth herein at some time in the future and longer (worse) redemption periods are possible.

Listed below are the dates in calendar year 2019 (the only year for which holidays are known at the time of this SAI filing) in which the regular holidays in non-U.S. markets may impact Fund settlement. This list is based on information available to the Fund. The list may not be accurate or complete and is subject to change.

Redemptions. The longest redemption cycle for the Fund is a function of the longest redemption cycle among the countries and regions whose securities comprise the Fund. In the calendar year 2019 (the only year for which holidays are known at the time of this SAI filing), the dates of regular holidays affecting the following securities markets present the worst-case redemption cycles* for the Fund as follows:

<table>

* The U.S. bond market has recommended early close.
Redemption Transaction Fee

A fixed redemption transaction fee of $500, charged by and payable to the Custodian is imposed on each in-kind redemption transaction ($100 for cash redemptions) regardless of the number of Creation Units redeemed in the transaction. An additional variable charge for cash redemptions or partial cash redemptions (when cash redemptions are permitted or required for the Fund) may also be imposed to compensate the Fund for the costs associated with selling the applicable securities. As a result, in order to seek to replicate the in-kind redemption order process, the Fund expects to sell, in the secondary market, the portfolio securities or settle any financial instruments that may not be permitted to be re-registered in the name of the Participating Party as a result of an in-kind redemption order pursuant to local law or market convention, or for other reasons (“Market Sales”). In such cases where the Fund makes Market Sales, the Authorized Participant will reimburse the Fund for, among other things, any difference between the market value at which the securities and/or financial instruments were sold or settled by the Fund and the cash in lieu amount (which amount, at the Adviser’s discretion, may be capped), applicable registration fees, brokerage commissions and certain taxes (“Transaction Costs”). The Adviser may adjust the transaction fee to the extent the composition of the redemption securities changes or cash in lieu is added to the Cash Component to protect ongoing shareholders. In no event will fees charged by the Fund in connection with a redemption exceed 2% of the value of each Creation Unit. Investors who use the services of a broker-dealer or other such intermediary may be charged a fee for such services. To the extent the Fund cannot recoup the amount of Transaction Costs incurred in connection with a redemption from the redeeming shareholder because of the 2% cap or otherwise, those Transaction Costs will be borne by the Fund’s remaining shareholders and negatively affect the Fund’s performance.

Placement of Redemption Orders Using the Clearing Process

Orders to redeem Creation Units of the Fund through the Clearing Process, if available, must be delivered through a Participating Party that has executed the Authorized Participant Agreement. An order to redeem Creation Units of the Fund using the Clearing Process is deemed received on the Transmittal Date if (i) such order is received by the Transfer Agent not later than 2:00 p.m., Eastern Time, or such earlier time as may be designated by the Fund and disclosed to Authorized Participants on such Transmittal Date and (ii) all other procedures set forth in the Authorized Participant Agreement are properly followed; such order will be effected based on the NAV of the Fund as next determined. All orders must be accepted by the Fund and the Distributor in accordance with the procedures set forth in the Authorized Participant Agreement. An order to redeem Creation Units of the Fund using the Clearing Process made in proper form but received by the Fund after the Order Cut-Off Time will be deemed received on the next Business Day immediately following the Transmittal Date. The requisite Fund Securities (or contracts to purchase such Fund Securities which are expected to be delivered in a “regular way” manner) and the applicable cash payment will be transferred within two Business Days following the date on which such request for redemption is deemed received.

Placement of Redemption Orders Outside the Clearing Process

Arrangements satisfactory to the Fund must be in place for the Participating Party to transfer the Creation Units through the DTC on or before the settlement date. Redemptions of shares for Fund Securities will be subject to compliance with applicable U.S. federal and state securities laws and the Fund (whether or not it otherwise permits or requires cash redemptions) reserves the right to redeem Creation Units for cash to the extent that the Fund could not lawfully deliver specific Fund Securities upon redemptions or could not do so without first registering the Fund Securities under such laws.

In connection with taking delivery of shares for Fund Securities upon redemption of Creation Units, a redeeming shareholder or entity acting on behalf of a redeeming shareholder must maintain appropriate custody arrangements with a qualified broker-dealer, bank or other custody providers in each jurisdiction in which any of the Fund Securities are customarily traded, to which account such Fund Securities will be delivered. If neither the redeeming shareholder nor the entity acting on behalf of a redeeming shareholder has appropriate arrangements to take delivery of the Fund Securities in the applicable foreign jurisdiction and it is not possible to make other such arrangements, or if it is not possible to effect deliveries of the Fund Securities in such jurisdictions, the Fund may, in its discretion, exercise its option to substitute a “cash-in-lieu” amount for such Fund Securities, and the redeeming shareholder will be required to receive its redemption proceeds with respect to such Fund Securities in cash.
BOOK ENTRY ONLY SYSTEM

DTC acts as securities depositary for the shares. Shares of the Fund are represented by securities registered in the name of DTC or its nominee and deposited with, or on behalf of, DTC. Certificates will not be issued for shares.

DTC, a limited-purpose trust company, was created to hold securities of the DTC Participants and to facilitate the clearance and settlement of securities transactions among the DTC Participants in such securities through electronic book-entry changes in accounts of the DTC Participants, thereby eliminating the need for physical movement of securities certificates. DTC Participants include securities broker-dealers, banks, trust companies, clearing corporations and certain other organizations, some of whom (and/or their representatives) own DTC. More specifically, DTC is owned by a number of its DTC Participants and by the NYSE and FINRA. Access to the DTC system is also available to others such as banks, broker-dealers and trust companies that clear through or maintain a custodial relationship with a DTC Participant, either directly or indirectly (the “Indirect Participants”).

Beneficial ownership of shares is limited to DTC Participants, Indirect Participants and persons holding interests through DTC Participants and Indirect Participants. Ownership of beneficial interests in shares (owners of such beneficial interests are referred to herein as “Beneficial Owners”) is shown on, and the transfer of ownership is effected only through, records maintained by DTC (with respect to DTC Participants) and on the records of DTC Participants (with respect to Indirect Participants and Beneficial Owners that are not DTC Participants). Beneficial Owners will receive from or through the DTC Participant a written confirmation relating to their purchase of shares.

Conveyance of all notices, statements and other communications to Beneficial Owners is effected as follows. Pursuant to the Depositary Agreement between the Fund and DTC, DTC is required to make available to the Fund upon request and for a fee to be charged to the Fund a listing of the shares holdings of each DTC Participant. The Fund shall inquire of each such DTC Participant as to the number of Beneficial Owners holding shares, directly or indirectly, through such DTC Participant. The Fund shall provide each such DTC Participant with copies of such notice, statement or other communication, in such form, number and at such place as such DTC Participant may reasonably request, in order that such notice, statement or communication may be transmitted by such DTC Participant, directly or indirectly, to such Beneficial Owners. In addition, the Fund shall pay to each such DTC Participant a fair and reasonable amount as reimbursement for the expenses attendant to such transmittal, all subject to applicable statutory and regulatory requirements.

Share distributions shall be made to DTC or its nominee, Cede & Co., as the registered holder of all shares. DTC or its nominee, upon receipt of any such distributions, shall credit immediately DTC Participants’ accounts with payments in amounts proportionate to their respective beneficial interests in shares as shown on the records of DTC or its nominee. Payments by DTC Participants to Indirect Participants and Beneficial Owners of shares held through such DTC Participants will be governed by standing instructions and customary practices, as is now the case with securities held for the accounts of customers in bearer form or registered in a “street name,” and will be the responsibility of such DTC Participants.

The Fund has no responsibility or liability for any aspects of the records relating to or notices to Beneficial Owners, or payments made on account of beneficial ownership interests in such shares, or for maintaining, supervising or reviewing any records relating to such beneficial ownership interests or for any other aspect of the relationship between DTC and the DTC Participants or the relationship between such DTC Participants and the Indirect Participants and Beneficial Owners owning through such DTC Participants.

DTC may determine to discontinue providing its service with respect to the shares at any time by giving reasonable notice to the Fund and discharging its responsibilities with respect thereto under applicable law.

Under such circumstances, the Fund shall take action either to find a replacement for DTC to perform its functions at a comparable cost or, if such a replacement is unavailable, to issue and deliver printed certificates representing ownership of shares, unless the Fund makes other arrangements with respect thereto satisfactory to the NYSE Area.
SHARE PRICES

The trading prices of the Fund’s shares in the secondary market generally differ from the Fund’s daily NAV and are affected by market forces such as the supply of and demand for ETF shares and shares of underlying securities held by the Fund, economic conditions and other factors. Information regarding the approximate intraday value of shares of the Fund is disseminated every 15 seconds throughout each trading day by NYSE Arca or by market data vendors or other information providers. The approximate intraday value per share is based on the current value of the securities or other assets and/or other assets, including cash required to be deposited in exchange for a Creation Unit. This approximate value does not necessarily reflect the precise composition of the current portfolio of securities held by the Fund at a particular point in time or the best possible valuation of the current portfolio, and therefore should not be viewed as a “real-time” update of the Fund’s NAV, which is computed only once a day. The quotations of certain Fund holdings may not be updated during U.S. trading hours if such holdings do not trade in the United States. The Fund is not involved in, or responsible for, the calculation or dissemination of these approximate values and makes no warranty as to their accuracy.

NET ASSET VALUE

NAV is the price of one share of the Fund without a sales charge, and is calculated each business day using this formula:

\[
\text{Net Asset Value} = \frac{\text{Total market value of securities} + \text{Cash and other assets} - \text{Liabilities}}{\text{Number of outstanding shares}}
\]

The NAV of Fund shares is determined pursuant to policies and procedures approved by the Board of Trustees, as summarized below:

- A share's NAV is determined at the close of regular trading on the New York Stock Exchange ("NYSE") on the days the NYSE is open for trading. This is normally 4:00 p.m., Eastern Time. The Fund's shares will not be priced on the days on which the NYSE is closed for trading. In addition, the Fund's shares will not be priced on the holidays listed in this SAI. See the section "Net Asset Value" in the SAI for more details.

- The price that an Authorized Participant pays for purchasing or redeeming shares in Creation Units will be based upon the NAV next calculated after an order is received by the Transfer Agent "in good order" (meaning that the order is complete and contains all necessary information).

- Requests received by the Transfer Agent in good order during a trading window that is open after the NYSE closes will be processed based upon the NAV determined at the close of regular trading on the next day that the NYSE is open. If the Transfer Agent receives the order in good order during a trading window that is open prior to the NYSE market close, the shareholder will receive that day's NAV. See the section “Creations and Redemptions” in this SAI for more details.

- If the Fund invests in foreign securities, it may experience NAV changes on days when you cannot buy or sell its shares.

The total NAV of shares of the Fund (the excess of the assets of the Fund over the liabilities) is determined at the close of regular trading (normally 4:00 p.m., Eastern Time) on each day that the NYSE is open for trading. The Fund will not price its shares on the following holidays: New Year’s Day, Martin Luther King Day, Presidents’ Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. Fund securities and other investments are valued at market value based on market quotations obtained or determined by independent pricing services recommended by the Adviser and approved by the Board of Trustees. Fund securities and other investments for which market quotations are not readily available, or which are deemed to be unreliable by the Adviser, are valued at fair value as determined in good faith by the Adviser pursuant to procedures approved by the Board of Trustees, as described below. Market value is determined as follows:

- **Equity securities (including closed-end investment companies and ETFs), exchange-traded notes, rights, and warrants** — listed equity securities are valued at the last sale price quoted on the exchange where
they are traded most extensively or, if there is no reported sale during the day, the closing bid quotation as reported by an independent pricing service. Securities traded on the NASDAQ Global Select Market, NASDAQ Global Market and NASDAQ Capital Market are valued at the NASDAQ Official Closing Price (“NOCP”), or if lacking an NOCP, at the most recent bid quotations on the applicable NASDAQ Market. Unlisted equity securities (except unlisted preferred equity securities discussed below) are valued at the last sale price quoted in the market where they are traded most extensively or, if there is no reported sale during the day, the closing bid quotation as reported by an independent pricing service. If there is no sale price or closing bid quotation available unlisted equity securities will be valued using evaluated bids furnished by an independent pricing service, if available. In some foreign markets, an official close price and a last sale price may be available from the foreign exchange or market. In those cases, the official close price is used. Valuations based on information from foreign markets may be subject to the Fund’s fair value policies described below. If a right is not traded on any exchange, its value is based on the market value of the underlying security, less the cost to subscribe to the underlying security (e.g., to exercise the right), adjusted for the subscription ratio. If a warrant is not traded on any exchange, a price is obtained from a broker-dealer.

- **Debt Securities and unlisted preferred equity securities** — evaluated bids furnished to the Fund by an independent pricing service using market information, transactions for comparable securities and various relationships between securities, if available, or bid prices obtained from broker-dealers.
- **Senior Loans** — bid prices supplied by an independent pricing service, if available, or bid prices obtained from broker-dealers.
- **Bilateral Swaps** — bilateral credit default swaps are valued based on mid prices (between the bid price and the ask price) supplied by an independent pricing service. Bilateral interest rate swaps and bilateral standardized commodity and equity index total return swaps are valued based on prices supplied by an independent pricing service. If prices from an independent pricing service are not available, prices from a broker-dealer may be used.
- **Centrally Cleared Swaps** — settlement prices of the clearing house on which the contracts were traded or prices obtained from broker-dealers.
- **Options** — domestic exchange-traded single name equity options contracts (including options on ETFs) are valued at the mean of the National Best Bid and Offer quotations. Foreign exchange-traded single name equity options contracts are valued at the most recent settlement price. Options contracts on domestic indices shall be priced at the average of the closing bid and ask quotations as of the close of trading on the Chicago Board Options Exchange (“CBOE”). On the last business day of the month, the Funds will fair value the S&P 500® index options using the closing rotation values published by the CBOE. Options contracts on foreign indices are priced at the most recent settlement price. Options on futures contracts are valued using the current settlement price on the exchange on which, over time, they are traded most extensively. Other exchange-traded options are valued at the average of the closing bid and ask quotations on the exchange on which, over time, they are traded most extensively. Over-the-counter (“OTC”) currency options and swaptions are valued at mid prices (between the bid and the ask price) supplied by an independent pricing service, if available. Other OTC options contracts (including currency options and swaptions not priced through an independent pricing service) are valued based on prices obtained from broker-dealers. Valuations based on information from foreign markets may be subject to the Funds’ fair value policies described below.
- **Futures** — most recent settlement price on the exchange on which the Adviser believes that, over time, they are traded most extensively. Valuations based on information from foreign markets may be subject to the Funds’ fair value policies described below.
- **Forward Foreign Currency Contracts** — interpolated rates determined based on information provided by an independent pricing service.

Foreign denominated assets and liabilities are translated into U.S. dollars based upon foreign exchange rates supplied by an independent pricing service. Fund securities and other investments for which market quotations are not readily available are valued at fair value as determined in good faith by the Adviser pursuant to procedures approved by the Board of Trustees. The Fund may also value securities and other investments at fair value in other circumstances such as when extraordinary events occur after the close of a foreign market but prior to the close of the NYSE. This may include situations relating to a single issuer (such as a declaration of bankruptcy or a delisting of the issuer’s security from the primary market on which it has traded) as well as events affecting the securities markets in general (such as market disruptions or closings and significant fluctuations in U.S. and/or foreign markets). When fair valuing its
securities or other investments, the Fund may, among other things, use modeling tools or other processes that may take into account factors such as securities or other market activity and/or significant events that occur after the close of the foreign market and before the time a fund's NAV is calculated. Fair value pricing may require subjective determinations about the value of a security, and fair values used to determine the Fund’s NAV may differ from quoted or published prices, or from prices that are used by others, for the same securities. In addition, the use of fair value pricing may not always result in adjustments to the prices of securities held by the Fund. Valuation for securities traded in the OTC market may be based on factors such as market information, transactions for comparable securities, various relationships between securities or bid prices obtained from broker-dealers. Evaluated prices from an independent pricing service may require subjective determinations and may be different than actual market prices or prices provided by other pricing services.

Trading in some of the portfolio securities or other investments of the Fund takes place in various markets outside the United States on days and at times other than when the NYSE is open for trading. Therefore, the calculation of the Fund’s NAV does not take place at the same time as the prices of many of its portfolio securities or other investments are determined, and the value of the Fund’s portfolio may change on days when the Fund is not open for business and its shares may not be purchased or redeemed.

DISTRIBUTIONS

As described in the Prospectus, it is the policy of the Fund to pay to its shareholders, as dividends, all or substantially all of its net investment income monthly and to distribute annually all or substantially all of its net realized long-term and short-term capital gains annually, if any, after offsetting any capital loss carryforwards. To the extent permitted by law, the Board may adopt a different schedule for making distributions as long as distributions of net investment income and net realized capital gains, if any, are made at least annually. The Fund’s distribution rate fluctuates over time for various reasons, and there can be no assurance that the Fund’s distributions will not decrease or that the Fund will make any distributions when scheduled.

Ordinary income dividends and capital gain distributions are reinvested based upon the NAV determined as of the close of the NYSE on the ex-dividend date for each dividend or distribution. Shareholders, however, may elect to receive their ordinary income dividends or capital gain distributions, or both, in cash. The election may be made at any time by submitting a written request directly to Natixis ETFs, contacting Natixis ETFs at 1-800-458-7452 or visiting im.natixis.com to change your distribution option. In order for a change to be in effect for any dividend or distribution, it must be received by the Fund on or before the record date for such dividend or distribution.

If a dividend or capital gain distribution check remains uncashed for six (6) months and your account is still open, the Fund will reinvest the dividend or distribution in additional shares of the Fund promptly after making this determination and the check will be cancelled. In addition, future dividends and capital gains distributions will be automatically reinvested in additional shares of the Fund unless you subsequently contact the Fund and request to receive distributions by check.

As required by federal law, U.S. federal tax information regarding Fund distributions will be furnished to each shareholder for each calendar year early in the succeeding year.

TAXES

The following discussion of certain U.S. federal income tax consequences of an investment in the Fund is based on the Code, U.S. Treasury regulations, and other applicable authorities, all as of the date of this Statement. These authorities are subject to change by legislative or administrative action, possibly with retroactive effect. The following discussion is only a summary of some of the important U.S. federal tax considerations generally applicable to investments in the Fund. There may be other tax considerations applicable to particular shareholders. Shareholders should consult their own tax advisers regarding their particular situations and the possible application of foreign, state and local tax laws.
Taxation of the Fund

The Fund has elected or intends to elect to be treated as a RIC under Subchapter M of the Code and intends each year to qualify and to be eligible to be treated as such. In order to qualify for the special tax treatment accorded to RICs and their shareholders under the Code, the Fund must, among other things: (i) derive at least 90% of its gross income in each taxable year from (a) dividends, interest, payments with respect to certain securities loans, gains from the sale or other disposition of stock, securities or foreign currencies, or other income (including, but not limited to, gains from options, futures or forward contracts) derived with respect to its business of investing in such stock, securities or currencies, and (b) net income derived from interests in “qualified publicly traded partnerships” (“QPTPs”); (ii) diversify its holdings so that at the end of each quarter of the Fund’s taxable year (a) at least 50% of the value of the Fund’s total assets consists of cash and cash items, U.S. government securities, securities of other RICs, and other securities limited, with respect to any one issuer, to not more than 5% of the value of the Fund’s total assets and 10% of the outstanding voting securities of such issuer, and (b) not more than 25% of the value of the Fund’s total assets is invested, including through corporations in which the Fund owns a 20% or more voting stock interest (1) in the securities (other than those of the U.S. government or other RICs) of any one issuer or of two or more issuers that the Fund controls and that are engaged in the same, similar or related trades or businesses, or (2) in the securities of one or more QPTPs; and (iii) distribute with respect to each taxable year at least 90% of the sum of its investment company taxable income (as that term is defined in the Code without regard to the deduction for dividends paid — generally taxable ordinary income and the excess, if any, of net short-term capital gains over net long-term capital losses, in each case determined with reference to any capital loss carryforwards) and net tax-exempt interest income, if any, for such year.

In general, for purposes of the 90% gross income requirement described in (i) above, income derived by the Fund from a partnership will be treated as qualifying income only to the extent such income is attributable to items of income of the partnership that would be qualifying income if realized directly by the Fund. However, 100% of the net income derived from an interest in a QTP (a partnership (a) interests in which are traded on an established securities market or are readily tradable on a secondary market or the substantial equivalent thereof, and (b) that derives less than 90% of its income from the qualifying income described in (i)(a) above) will be treated as qualifying income. In general, such entities will be treated as partnerships for U.S. federal income tax purposes because they meet the passive income requirement under Code Section 7704(c)(2). In addition, although in general the passive loss rules of the Code do not apply to RICs, such rules do apply to a RIC with respect to items attributable to an interest in a QPTP.

The tax treatment of certain derivative instruments in which the Fund might invest is not certain and may bear on the Fund’s ability to qualify as a RIC under the Code. In particular, it is unclear how such instruments, and the income or gains therefrom are treated under the gross income or diversification tests applicable to RICs. In the event the Fund were not to qualify as a RIC, the Fund would be subject to tax on its taxable income at corporate rates, and all distributions from earnings and profits would be taxable to shareholders as ordinary income, as further described below.

For purposes of the diversification requirements set forth in (ii) above, the term “outstanding voting securities of an issuer” includes the equity securities of a QPTP. Also for purposes of the diversification requirements in (ii) above, identification of the issuer (or, in some cases, issuers) of a particular Fund investment can depend on the terms and conditions of that investment. In some cases, identification of the issuer (or issuers) is uncertain under current law, and an adverse determination or future guidance by the Internal Revenue Service (“IRS”) with respect to identification of the issuer for a particular type of investment may adversely affect the Fund’s ability to satisfy the diversification requirements.

Assuming that it qualifies for treatment as a RIC, the Fund will not be subject to U.S. federal income tax on income or gains distributed to its shareholders in a timely manner in the form of dividends (including Capital Gain Dividends, as defined below). If the Fund were to fail to satisfy the income, diversification or distribution requirements described above, the Fund could in some cases cure such failure, including by paying a fund-level tax, paying interest, making additional distributions or disposing of certain assets. If the Fund were ineligible to or did not cure such a failure for any year, or if the Fund otherwise were to fail to qualify as a RIC accorded special tax treatment for such year, the
Fund would be subject to tax on its taxable income at corporate rates, and all distributions from earnings and profits, including any distributions of net long-term capital gains, would be taxable to shareholders as ordinary income. Some portions of such distributions may be eligible for the dividends-received deduction in the case of corporate shareholders and may be eligible to be treated as qualified dividend income in the case of shareholders taxed as individuals, provided in both cases that the shareholder meets certain holding period and other requirements in respect of the Fund’s shares (as described below). In addition, the Fund could be required to recognize unrealized gains, pay substantial taxes and interest and make substantial distributions before requalifying for the special tax treatment accorded to RICs under the Code.

The Fund intends to distribute at least monthly to its shareholders all or substantially all of its investment company taxable income (computed without regard to the dividends-paid deduction). If the Fund retains any investment company taxable income, it will be subject to tax at regular corporate rates on the amount retained. The Fund also intends to distribute annually all or substantially all of its net capital gain (that is, the excess of net long-term capital gain over net short-term capital loss, in each case determined with reference to any loss carryforwards). If the Fund retains any net capital gain, it will be subject to tax at regular corporate rates on the amount retained, but may designate the retained amount as undistributed capital gains in a timely notice to its shareholders who then in turn (i) will be required to include in income for U.S. federal income tax purposes, as long-term capital gains, their respective shares of such undistributed amount, and (ii) will be entitled to credit their proportionate shares of the tax paid by the Fund on such undistributed amount against their U.S. federal income tax liabilities, if any, and to claim refunds on properly-filed U.S. federal income tax returns to the extent the credit exceeds such liabilities. If the Fund makes this designation, for U.S. federal income tax purposes, the tax basis of shares owned by a shareholder of the Fund will be increased by an amount equal to the difference between the amount of undistributed capital gains included in the shareholder’s gross income under clause (i) of the preceding sentence and the tax deemed paid by the shareholder under clause (ii) of the preceding sentence. The Fund is not required to, and there can be no assurance that the Fund will, make this designation if it retains all or a portion of its net capital gain in a taxable year.

In determining its net capital gain, including in connection with determining the amount available to support a Capital Gain Dividend, its taxable income and its earnings and profits, a RIC may elect to treat any post-October capital loss (defined as any net capital loss attributable to the portion of the taxable year, if any, after October 31 or, if there is no such loss, the net long-term capital loss or net short-term capital loss attributable to such portion of the taxable year) and certain late-year ordinary losses (generally, the sum of (i) net ordinary losses, if any, from the sale, exchange or other taxable disposition of property attributable to the portion of the taxable year, if any, after October 31, and its (ii) other net ordinary loss, if any, attributable to the portion of the taxable year, if any, after December 31) as if incurred in the succeeding taxable year.

Capital losses in excess of capital gains (“net capital losses”) are not permitted to be deducted against the Fund’s net investment income. Instead, potentially subject to certain limitations, the Fund may carry net capital losses from any taxable year forward to offset capital gains in future years, thereby reducing the amount the Fund would otherwise be required to distribute in such future years to qualify for the special tax treatment accorded a RIC and avoid a fund-level tax. The Fund may carry net capital losses forward to one or more subsequent taxable years without expiration. The Fund must apply such carryforwards first against gains of the same character.

If the Fund fails to distribute in a calendar year at least an amount equal to the sum of 98% of its ordinary income for such year and 98.2% of its capital gain net income for the one-year period ending on October 31 of such year (or November 30 or December 31 of that year if the Fund is permitted to elect and so elects) plus any such amounts retained from the prior year, the Fund will be subject to a nondeductible 4% excise tax on the undistributed amounts. For purposes of the required excise tax distribution, the Fund’s ordinary gains and losses from the sale, exchange or other taxable disposition of property that would be taken into account after October 31 generally are treated as arising on January 1 of the following calendar year, if the Fund makes the election described above, no such gains or losses will be so treated. Also for purposes of the excise tax, the Fund will be treated as having distributed any amount on which it has been subject to corporate income tax in the taxable year ending within the calendar year. The Fund generally intends to make distributions sufficient to avoid imposition of the 4% excise tax, although there can be no assurance that it will be able to do so.
Taxation of Fund Distributions

For U.S. federal income tax purposes, distributions of investment income generally are taxable to shareholders as ordinary income to the extent of the Fund’s earnings and profits. Taxes on distributions of capital gains are determined by how long the Fund owned (or is deemed to have owned) the investments that generated them, rather than how long a shareholder has owned his or her shares. In general, the Fund will recognize long-term capital gain or loss on the disposition of assets it has owned (or is deemed to have owned) for more than one year, and short-term capital gain or loss on the disposition of investments it has owned (or is deemed to have owned) for one year or less. Distributions of net capital gain that are properly reported by the Fund as capital gain dividends (“Capital Gain Dividends”) generally will be taxable to a shareholder receiving such distributions as long-term capital gain includible in net capital gain and taxed to individuals at reduced rates. Distributions of the excess of net short-term capital gain over net long-term capital loss generally will be taxable to a shareholder receiving such distributions as ordinary income. Distributions from capital gains generally are made after applying any available capital loss carryforwards.

Fund distributions are taxable to shareholders as described herein even if they are paid from income or gains earned by the Fund before a shareholder’s investment (and thus were included in the price the shareholder paid for his or her shares). Distributions are taxable whether shareholders receive them in cash or in additional shares.

Dividends declared and payable by the Fund during October, November or December to shareholders of record on a date in any such month and paid by the Fund during the following January generally will be treated for U.S. federal income tax purposes as paid by the Fund and received by shareholders on December 31 of the year in which the dividends are declared rather than the calendar year in which they are received.

Distributions of investment income properly reported by the Fund as derived from “qualified dividend income” will be taxable to individuals at the reduced rates applicable to long-term capital gain. In order for some portion of the dividends received by the Fund shareholder to be qualified dividend income, the Fund must meet holding period and other requirements with respect to some portion of the dividend-paying stocks in its portfolio and the shareholder must meet holding period and other requirements with respect to that Fund’s shares. In general, a dividend will not be treated as qualified dividend income (at either the Fund or shareholder level) (1) if the dividend is received with respect to any share of stock held for fewer than 61 days during the 121-day period beginning on the date which is 60 days before the date on which such share becomes ex-dividend with respect to such dividend (or, in the case of certain preferred stock, 91 days during the 181-day period beginning 90 days before such date), (2) to the extent that the recipient is under an obligation (whether pursuant to a short sale or otherwise) to make related payments with respect to positions in substantially similar or related property, (3) if the recipient elects to have the dividend income treated as investment income for purposes of the limitation on deductibility of investment interest, or (4) if the dividend is received from a foreign corporation that is (a) not eligible for the benefits of a comprehensive income tax treaty with the U.S. (with the exception of dividends paid on stock of such a foreign corporation that is readily tradable on an established securities market in the U.S.) or (b) treated as a PFIC (as defined below). Income derived from investments in derivatives, fixed-income securities and REITs generally is not eligible for treatment as qualified dividend income.

In general, distributions of investment income properly reported by the Fund as derived from qualified dividend income will be treated as qualified dividend income in the hands of a shareholder taxed as an individual provided the shareholder meets the holding period and other requirements described above with respect to the Fund’s shares.

If the aggregate qualified dividends received by the Fund during any taxable year are 95% or more of its gross income (excluding net long-term capital gain over net short-term capital loss), then 100% of the Fund’s dividends (other than dividends properly reported as Capital Gain Dividends) will be eligible to be treated as qualified dividend income.

In general, properly reported dividends of net investment income received by corporate shareholders of the Fund generally will qualify for the dividends-received deduction available to corporations to the extent they are properly reported as being attributable to the amount of eligible dividends received by the Fund from domestic corporations for the taxable year. In general, a dividend received by the Fund will not be treated as an eligible dividend (1) if it has been received with respect to any share of stock that the Fund has held for less than 46 days (91 days in the case of certain preferred stock) during the 91-day period beginning on the date which is 45 days before the date on which
such share becomes ex-dividend with respect to such dividend (during the 181-day period beginning 90 days before such date in the case of certain preferred stock) or (2) to the extent that the Fund is under an obligation (pursuant to a short sale or otherwise) to make related payments with respect to positions in substantially similar or related property. Moreover, the dividends-received deduction may be disallowed or reduced (1) if the corporate shareholder fails to satisfy the foregoing requirements with respect to its shares of the Fund or (2) otherwise by application of various provisions of the Code (for example, the dividends-received deduction is reduced in the case of a dividend received on debt-financed portfolio stock — generally stock acquired with borrowed funds).

Any distribution of income that is attributable to (i) income received by the Fund in lieu of dividends with respect to securities on loan pursuant to a securities lending transaction or (ii) dividend income received by the Fund on securities it temporarily purchased from a counterparty pursuant to a repurchase agreement that, for U.S. federal income tax purposes, is treated as a loan by the Fund, generally will not constitute qualified dividend income to individual shareholders or be eligible for the dividends-received deduction for corporate shareholders.

Pursuant to proposed regulations on which RICs may rely, distributions by a RIC to its shareholders that the RIC properly reports as “section 199A dividends,” as defined and subject to certain conditions described below, are treated as qualified REIT dividends in the hands of non-corporate shareholders. Non-corporate shareholders are permitted a federal income tax deduction equal to 20% of qualified REIT dividends received by them, subject to certain limitations. Very generally, a “section 199A dividend” is any dividend or portion thereof that is attributable to certain dividends received by the RIC from REITs, to the extent such dividends are properly reported as such by the RIC in a written notice to its shareholders. A section 199A dividend is treated as a qualified REIT dividend only if the shareholder receiving such dividend holds the dividend-paying RIC shares for at least 46 days of the 91-day period beginning 45 days before the shares become ex-dividend, and is not under an obligation to make related payments with respect to a position in substantially similar or related property. A RIC is permitted to report such part of its dividends as section 199A dividends as are eligible, but is not required to do so.

The Code generally imposes an additional Medicare contribution tax on the net investment income of certain individuals, trusts and estates to the extent their income exceeds certain threshold amounts. For these purposes, “net investment income” generally includes, among other things, (i) distributions paid by the Fund of net investment income and capital gains as described above, and (ii) any net gain from the sale, exchange or other taxable disposition of Fund shares. Shareholders are advised to consult their tax advisers regarding the possible implications of this additional tax on their investment in the Fund.

If the Fund makes a distribution in excess of its current and accumulated “earnings and profits” in any taxable year, the excess distribution will be treated as a return of capital to the extent of a shareholder’s tax basis in his or her shares, and thereafter as capital gain. A return of capital generally is not taxable, but it reduces a shareholder’s basis in his or her shares, thus reducing any loss or increasing any gain on a subsequent taxable disposition by the shareholder of such shares.

Sale, Exchange or Other Disposition of Shares

A sale, exchange or other disposition of Fund shares generally will give rise to a gain or loss. In general, any gain or loss realized upon a taxable disposition of shares will be treated as long-term capital gain or loss if the shares have been held for more than twelve (12) months. Otherwise, gain or loss on the taxable disposition of Fund shares generally will be treated as short-term capital gain or loss. However, any loss realized upon a taxable disposition of Fund shares held by a shareholder for six (6) months or less will be treated as long-term, rather than short-term, to the extent of any Capital Gain Dividends received (or deemed received) by the shareholder with respect to the shares. All or a portion of any loss realized upon a taxable disposition of Fund shares will be disallowed under the Code’s “wash sale” rules if other substantially identical shares of the Fund are purchased within 30 days before or after the disposition. In such a case, the basis of the newly purchased shares will be adjusted to reflect the disallowed loss.

Upon the sale, exchange or other disposition of Fund shares, the Fund or, in the case of shares purchased through a financial intermediary, the financial intermediary may be required to provide you and the IRS with cost basis and certain other related tax information about the Fund shares you so disposed of. See the Fund’s Prospectus for more information.
Foreign Taxation

Income, gain and proceeds received by the Fund from investments in securities of foreign issuers may be subject to foreign withholding or other taxes. This will decrease the Fund’s yield on securities subject to such taxes. Tax treaties between certain countries and the U.S. may reduce or eliminate such taxes. The Fund generally does not expect that shareholders will be entitled to claim a credit or deduction with respect to such foreign taxes incurred by the Fund.

Tax Implications of Certain Fund Investments

Options, Futures, Forward Contracts, Swap Agreements and Hedging Transactions. The tax treatment of certain positions entered into by the Fund, including regulated futures contracts, certain foreign currency positions and certain listed non-equity options, will be governed by Section 1256 of the Code (“Section 1256 Contracts”). Gains or losses on Section 1256 Contracts generally are considered 60% long-term and 40% short-term capital gains or losses (“60/40” gains or losses) although certain foreign currency gains and losses from such contracts may be treated as ordinary in character, as described below. Also, any Section 1256 Contracts held by the Fund at the end of each taxable year (and, for purposes of the 4% excise tax, on certain other dates as prescribed under the Code) are “marked to market” with the result that unrealized gains or losses are treated as though they were realized and the resulting gain or loss is treated as 60/40 or ordinary gain or loss, as applicable.

The Fund’s investments in futures contracts, forward contracts, options, straddles, swap agreements, and options on swaps and foreign currencies, derivatives, as well as any of its other hedging, short sale, or similar transactions, may be subject to one or more special tax rules (including the mark-to-market, constructive sale, notional principal contract, straddle, wash sale and short sale rules). These rules may affect whether gains and losses recognized by the Fund are treated as ordinary or capital, accelerate the recognition of income to the Fund, defer losses to the Fund, or cause adjustments in the holding periods of the Fund’s securities, thereby affecting whether capital gains and losses are treated as short-term or long-term. These rules, therefore, could affect the amount, timing and/or character of distributions to shareholders. Moreover, because the tax rules applicable to these types of transactions are in some cases uncertain under current law, an adverse determination or future guidance by the IRS with respect to these rules (which determination or guidance could be retroactive) may affect whether the Fund has made sufficient distributions, and otherwise satisfied the relevant requirements, to maintain its qualification as a RIC and avoid a fund-level tax.

In general, option premiums received by the Fund are not immediately included in the income of the Fund. Instead, the premiums are recognized when the option contract expires, the option is exercised by the holder, or the Fund transfers or otherwise terminates the option (e.g., through a closing transaction). If a call option written by the Fund is exercised and the Fund sells or delivers the underlying stock, the Fund generally will recognize capital gain or loss equal to (a) the sum of the strike price and the option premium received by the Fund minus (b) the Fund’s basis in the stock. Such gain or loss generally will be short-term or long-term depending upon the holding period of the underlying stock. If securities are purchased by the Fund pursuant to the exercise of a put option written by it, that Fund generally will subtract the premium received for purposes of computing its cost basis in the securities purchased. Gain or loss arising in respect of a termination of the Fund’s obligation under an option other than through the exercise of the option and related sale or delivery of the underlying stock will be short-term gain or loss depending on whether the premium income received by that Fund is greater or less than the amount paid by the Fund (if any) in terminating the transaction. Thus, for example, if an option written by the Fund expires unexercised, that Fund generally will recognize short-term gain equal to the premium received.

Certain covered call writing activities of the Fund may trigger the U.S. federal income tax straddle rules contained primarily in Section 1092 of the Code. Very generally, where applicable, Section 1092 requires (i) that losses be deferred on positions deemed to be offsetting positions with respect to “substantially similar or related property,” to the extent of unrealized gain in the latter, and (ii) that the holding period of such a straddle position that has not already been held for the long-term holding period be terminated and begin anew once the position is no longer part of a straddle. Options on single stocks that are not “deep in the money” may constitute qualified covered calls, which generally are not subject to the straddle rules; the holding period on stock underlying qualified covered calls that are “in the money” although not “deep in the money” will be suspended during the period that such calls are outstanding. Thus, the straddle rules and the rules governing qualified covered calls could cause gains that would otherwise
constitute long-term capital gains to be treated as short-term capital gains, and distributions that would otherwise constitute “qualified dividend income” or qualify for the dividends-received deduction to fail to satisfy the holding period requirements and therefore to be taxed as ordinary income or to fail to qualify for the 70% dividends-received deduction, as the case may be.

Certain of the Fund’s investments in derivative instruments, foreign currency denominated instruments, and any of the Fund’s transactions in foreign currencies and hedging activities, may produce a difference between its book income and its taxable income. If the Fund’s book income is less than the sum of its taxable income and net tax-exempt income (if any), the Fund could be required to make distributions exceeding book income to qualify as a RIC that is accorded special tax treatment and avoid a fund-level tax. If the Fund’s book income exceeds the sum of its taxable income, including net realized capital gains, and net tax-exempt income (if any), the distribution (if any) of such excess will be treated as (i) a dividend to the extent of the Fund’s remaining earnings and profits (including earnings and profits arising from tax-exempt income, if any), (ii) thereafter, as a return of capital to the extent of the recipient’s basis in the shares, and (iii) thereafter, as gain from the sale or exchange of a capital asset.

Certain Foreign Currency Tax Issues. Gain or loss on foreign currency denominated debt securities and on certain other financial instruments, such as forward currency contracts and currency swaps, that is attributable to fluctuations in exchange rates occurring between the date of acquisition and the date of settlement or disposition of such securities or instruments may be treated under Section 988 of the Code as ordinary income or loss. The Fund may elect out of the application of Section 988 of the Code with respect to the tax treatment of each of its foreign currency forward contracts to the extent that (i) such contract is a capital asset in the hands of the Fund and is not part of a straddle transaction and (ii) the Fund makes an election by the close of the day the contract is entered into to treat the gain or loss attributable to such contract as capital gain or loss.

The Fund’s forward contracts may qualify as Section 1256 Contracts under the Code if the underlying currencies are currencies for which there are futures contracts that are traded on and subject to the rules of a qualified board or exchange. However, a forward currency contract that is a Section 1256 Contract would, absent an election out of Section 988 of the Code as described in the preceding paragraph, be subject to Section 988. Accordingly, although such a forward currency contract would be marked-to-market annually like other Section 1256 Contracts, the resulting gain or loss would be ordinary. If the Fund were to elect out of Section 988 with respect to forward currency contracts that qualify as Section 1256 Contracts, the tax treatment generally applicable to Section 1256 Contracts, as described above, would apply to those forward currency contracts: that is, the contracts would be marked-to-market annually and gains and losses with respect to the contracts would be treated as 60/40 gain or loss. If the Fund were to elect out of Section 988 with respect to any of its forward currency contracts that do not qualify as Section 1256 Contracts, such contracts will not be marked to market annually and the Fund will recognize short-term or long-term capital gain or loss depending on the Fund’s holding period therein. The Fund may elect out of Section 988 with respect to all, some or none of its forward currency contracts.

Investments in Other RICs. The Fund’s investments in shares of another ETF, a mutual fund or another company that qualifies as a RIC (each, an “underlying RIC”) can cause the Fund to be required to distribute greater amounts of net investment income or net capital gain than the Fund would have distributed had it invested directly in the securities held by the underlying RIC, rather than in shares of the underlying RIC. Further, the amount or timing of distributions from the Fund qualifying for treatment as a particular character (e.g., long-term capital gain, eligibility for dividends-received deduction, etc.) will not necessarily be the same as it would have been had the Fund invested directly in the securities held by the underlying RIC.

If the Fund receives dividends from an underlying RIC, and the underlying RIC reports such dividends as qualified dividend income, then the Fund is permitted in turn to report a portion of its distributions as qualified dividend income, provided the Fund meets holding period and other requirements with respect to shares of the underlying RIC.

If the Fund receives dividends from an underlying RIC and the underlying RIC reports such dividends as eligible for the dividends-received deduction, then the Fund is permitted in turn to report its distributions derived from those dividends as eligible for the dividends-received deduction as well, provided the Fund meets holding period and other requirements with respect to shares of the underlying RIC.
Partnerships and Other Pass-Through Structures. To the extent the Fund invests in entities that are treated as partnerships (other than QPTPs, as defined above), trusts, or other pass-through structures for U.S. federal income tax purposes, all or a portion of any income and gains from such entities could constitute non-qualifying income to the Fund for purposes of the 90% gross income requirement described above. For example, income that the Fund derives from indirect investments, through such entities, in certain commodity-linked instruments generally will not or may not be considered qualifying income for the purposes of the 90% gross income requirement. In such cases, the Fund’s investments in such entities could be limited by its intention to qualify as a RIC, and could bear on its ability to so qualify. Income from such entities may be allocated to the Fund on a gross, rather than net, basis, for purposes of the 90% gross income requirement.

Investments in Exchange-Traded Notes. The timing and character of income or gains arising from exchange-traded notes can be uncertain. An adverse determination or future guidance by the IRS with respect to such rules (which determination or guidance could be retroactive) may affect the Fund’s ability to qualify for treatment as a RIC and to avoid a fund-level tax.

Certain Investments in REITs, REMICS and TMPs. An investment by the Fund in REIT equity securities may result in the Fund receiving cash in excess of the REIT’s earnings; if the Fund distributes these amounts, such distributions could constitute a return of capital to Fund shareholders for U.S. federal income tax purposes. Dividends received by the Fund from a REIT will not qualify for the corporate dividends-received deduction and generally will not constitute qualified dividend income.

Mortgage-Related Securities. The Fund may invest directly or indirectly (including through a REIT) in residual interests in real estate mortgage investment conduits (“REMICs”) (including by investing in residual interests in CMOs with respect to which an election to be treated as a REMIC is in effect) or equity interests in taxable mortgage pools (“TMPs”). Under a notice issued by the IRS in October 2006 and Treasury regulations that have yet to be issued but may apply retroactively, a portion of the Fund’s income (including income allocated to the Fund from a REIT or other pass-through entity) that is attributable to a residual interest in a REMIC or an equity interest in a TMP (referred to in the Code as an “excess inclusion”) will be subject to U.S. federal income tax in all events. This notice also provides, and the regulations are expected to provide, that excess inclusion income of a RIC generally will be allocated to shareholders of the RIC in proportion to the dividends received by such shareholders, with the same consequences as if the shareholders held the related interest directly. As a result, to the extent the Fund invests in such interests, it may not be a suitable investment for charitable remainder trusts (“CRTs”), as noted below.

In general, excess inclusion income allocated to shareholders (i) cannot be offset by net operating losses (subject to a limited exception for certain thrift institutions), (ii) will constitute unrelated business taxable income (“UBTI”) to entities (including a qualified pension plan, an individual retirement account, a 401(k) plan, a Keogh plan or other tax-exempt entity) subject to tax on UBTI, thereby potentially requiring such an entity that is allocated excess inclusion income, and otherwise might not be required to file a tax return, to file a tax return and pay tax on such income and (iii) in the case of a non-U.S. shareholder, will not qualify for any reduction in U.S. federal withholding tax. See “Tax-Exempt Shareholders” below for a discussion of the special tax consequences that may result where a tax-exempt entity invests in a RIC that recognizes excess inclusion income. A shareholder will be subject to U.S. federal income tax on such inclusions notwithstanding any exemption from such income tax otherwise available under the Code. The Fund does not intend to invest in REITs in which a substantial portion of the assets will consist of residual interests in REMICs or equity interests in TMPs.

Special Rules for Debt Obligations. Some debt obligations with a fixed maturity date of more than one year from the date of issuance (and zero-coupon debt obligations with a fixed maturity date of more than one year from the date of issuance) that are acquired by the Fund will be treated as debt obligations that are issued originally at a discount. Generally, the amount of the OID is treated as interest income and is included in the Fund’s income (and required to be distributed by that Fund) over the term of the debt security, even though payment of that amount is not received until a later time, upon partial or full repayment or disposition of the debt security. In addition, payment-in-kind securities will give rise to income that is required to be distributed and is taxable even though the Fund holding the security receives no interest payment in cash on the security during the year.
Some debt obligations with a fixed maturity date of more than one year from the date of issuance that are acquired by the Fund in the secondary market may be treated as having “market discount.” Very generally, market discount is the excess of the stated redemption price of a debt obligation (or in the case of an obligation issued with OID, its “revised issue price”) over the purchase price of such obligation. Subject to the discussion below regarding Section 451 of the Code, (i) generally, any gain recognized on the disposition of, and any partial payment of principal on, a debt security having market discount is treated as ordinary income to the extent the gain, or principal payment, does not exceed the “accrued market discount” on such debt security. (ii) alternatively, the Fund may elect to accrue market discount currently, in which case the Fund will be required to include the accrued market discount in the Fund’s income (as ordinary income) and thus distribute it over the term of the debt security, even though payment of that amount is not received until a later time, upon partial or full repayment or disposition of the debt security. And (iii) the rate at which the market discount accrues, and thus is included in the Fund’s income, will depend upon which of the permitted accrual methods the Fund elects. Notwithstanding the foregoing, effective for taxable years beginning after 2017, Section 451 of the Code generally requires any accrual method taxpayer to take into account items of gross income no later than the time at which such items are taken into account as revenue in the taxpayer’s financial statements. Although the application of Section 451 to the accrual of market discount is currently unclear, the Treasury and IRS have announced that they intend to issue proposed regulations providing that Section 451 does not apply to market discount. If Section 451 were to apply to the accrual of market discount, the Fund would be required to include in income any market discount as it takes the same into account on its financial statements.

Some debt obligations with a fixed maturity date of one year or less from the date of issuance that are acquired by the Fund may be treated as having OID or, in certain cases, “acquisition discount” (very generally, the excess of the stated redemption price over the purchase price). The Fund will be required to include the OID or acquisition discount in income (as ordinary income) and thus distribute it over the term of the debt security, even though payment of that amount is not received until a later time, upon partial or full repayment or disposition of the debt security. The rate at which OID or acquisition discount accrues, and thus is included in the Fund’s income, will depend upon which of the permitted accrual methods the Fund elects.

If the Fund holds the foregoing kinds of obligations, or other obligations subject to special rules under the Code, it may be required to pay out as an income distribution each year an amount which is greater than the total amount of cash interest the Fund actually received. Such distributions may be made from the cash assets of the Fund or, if necessary, by disposition of portfolio securities including at a time when it may not be advantageous to do so. These dispositions may cause the Fund to realize higher amounts of short-term capital gains (generally taxed to shareholders at ordinary income tax rates) and, in the event the Fund realizes net capital gains from such transactions, its shareholders may receive a larger Capital Gain Dividend than if the Fund had not held such obligations.

Higher-Risk Securities. The Fund may invest in below investment-grade fixed-income securities, including debt obligations of issuers not currently paying interest or that are in default. Investments in debt obligations that are at risk of, or in default, present special tax issues for the Fund. Tax rules are not entirely clear about issues such as whether and to what extent the Fund should recognize market discount on such a debt obligation, when the Fund may cease to accrue interest, original issue discount or market discount, when and to what extent the Fund may take deductions for bad debts or worthless securities and how the Fund should allocate payments received on obligations in default between principal and interest income. These and other related issues will be addressed by the Fund when, as and if it invests in such securities, in order to seek to ensure that it distributes sufficient income to preserve its status as a RIC and does not become subject to U.S. federal income or excise tax.

Certain High-Yield Discount Obligations. A portion of the interest paid or accrued on certain high-yield discount obligations in which the Fund may invest may be treated as a dividend for purposes of the corporate dividends-received deduction. In such cases, if the issuer of the high-yield discount obligations is a domestic corporation, dividend payments by the Fund to corporate shareholders may be eligible for the dividends-received deduction to the extent of the deemed dividend portion of such accrued interest.

Securities Purchased at a Premium. Very generally, where the Fund purchases a bond at a price that exceeds the redemption price at maturity (i.e., at a premium) the premium is amortizable over the remaining term of the bond. In the case of a taxable bond, if the Fund makes an election applicable to all such bonds it purchases, which election is irrevocable without consent of the IRS, the Fund reduces the current taxable income from the bond by the amortized premium and reduces its tax basis in the bond by the amount of such offset; upon the disposition or maturity of such
bonds, the Fund is permitted to deduct any remaining premium allocable to a prior period. In the case of a tax-exempt bond, tax rules require the Fund to reduce its tax basis by the amount of amortized premium.

**Passive Foreign Investment Companies.** The Fund’s investments that are treated as equity investments for U.S. federal income tax purposes in certain passive foreign investment companies ("PFICs") could potentially subject the Fund to U.S. federal income tax (including interest charges) on distributions received from the PFIC or on proceeds received from a disposition of shares in the PFIC. This tax cannot be eliminated by making distributions to Fund shareholders. However, the Fund may make certain elections to avoid the imposition of that tax. For example, the Fund may elect to mark the gains (and to a limited extent losses) in a PFIC “to the market” as though the Fund had sold and repurchased its holdings in the PFIC on the last day of the Fund’s taxable year. Such gains and losses are treated as ordinary income and loss. The Fund also may in certain cases elect to treat a PFIC as a “qualified electing fund” (i.e., make a “QEF election”), in which case the Fund would be required to include in its income annually its share of the PFIC’s income and net capital gains, regardless of whether it receives any distributions from the PFIC.

The mark-to-market and QEF elections may accelerate the recognition of income (without the receipt of cash) and increase the amount required to be distributed by the Fund to avoid taxation. Making either of these elections therefore may require the Fund to liquidate other investments (including when it is not advantageous to do so) to meet its distribution requirements, which also may accelerate the recognition of gain and affect the Fund’s total return. Because it is not always possible to identify a foreign corporation as a PFIC, the Fund may incur the tax and interest charges described above in some instances. If the Fund indirectly invests in PFICs by virtue of the Fund’s investment in other funds, it may not make such PFIC elections; rather, the underlying funds directly investing in the PFICs would decide whether to make such elections. Dividends paid by PFICs generally will not be eligible to be treated as “qualified dividend income.”

**Tax-Exempt Shareholders**

Income of a RIC that would be UBTI if earned directly by a tax-exempt entity generally will not constitute UBTI when distributed to a tax-exempt shareholder of that RIC. Notwithstanding this “blocking” effect, a tax-exempt shareholder may realize UBTI by virtue of its investments in the Fund if shares in the Fund constitute debt-financed property in the hands of the tax-exempt shareholder within the meaning of Code Section 514(b).

A tax-exempt shareholder may also recognize UBTI if the Fund recognizes excess inclusion income derived from direct or indirect investments in residual interests in REMICs or equity interests in TMs, as described above, if the amount of such income recognized by the Fund exceeds that Fund’s investment company taxable income (after taking into account deductions for dividends paid by the Fund). Furthermore, any investment in residual interests of a CMO that has elected to be treated as a REMIC can create complex tax consequences, especially if the Fund has state or local governments or other tax-exempt organizations as shareholders.

In addition, special tax consequences apply when CRTs invest in RICs that invest directly or indirectly in residual interests in REMICs or equity interests in TMs. Under legislation enacted in December 2006, if a CRT (defined in Section 664 of the Code) realizes any UBTI for a taxable year, a 100% excise tax is imposed on such UBTI. Under IRS guidance issued in October 2006, a CRT will not recognize UBTI as a result of investing in a fund that recognizes excess inclusion income. Rather, if at any time during any taxable year a CRT (or one of certain other tax-exempt shareholders, such as the United States, a state or political subdivision, or an agency or instrumentality thereof, and certain energy cooperatives) is a record holder of a share in a fund that recognizes excess inclusion income, then the fund will be subject to a tax on the portion of its excess inclusion income for the taxable year that is allocable to such shareholders at the highest U.S. federal corporate income tax rate. To the extent permitted under the 1940 Act, the Fund may elect to specially allocate any such tax to the applicable CRT (or other shareholder), and thus reduce such shareholder’s distributions for the year by the amount of the tax that relates to such shareholder’s interest in the Fund. The extent to which this IRS guidance remains applicable in light of the December 2006 legislation is unclear. CRTs and other tax-exempt investors are urged to consult their tax advisers concerning the consequences of investing in the Fund.
Backup Withholding

The Fund generally is required to withhold and remit to the U.S. Treasury a percentage of the taxable distributions paid to any individual shareholder who fails to properly furnish the Fund with a correct taxpayer identification number, who has under-reported dividend or interest income, or who fails to certify to the Fund that he or she is not subject to such withholding.

Backup withholding is not an additional tax. Any amounts withheld may be credited against the shareholder’s U.S. federal income tax liability, provided the appropriate information is furnished to the IRS.

Non-U.S. Shareholders

Distributions by the Fund to shareholders that are not “U.S. persons” within the meaning of the Code (“Foreign Persons”) properly reported by the Fund as (1) Capital Gain Dividends, (2) short-term capital gain dividends and (3) interest-related dividends, each as defined and subject to certain conditions described below, generally are not subject to withholding of U.S. federal income tax.

In general, the Code defines (1) “short-term capital gain dividends” as distributions of net short-term capital gains in excess of net long-term capital losses and (2) “interest-related dividends” as distributions from U.S. source interest income of types similar to those not subject to U.S. federal income tax if earned directly by an individual Foreign Person, in each case to the extent such distributions are properly reported as such by the Fund in a written notice to shareholders.

The exceptions to withholding for Capital Gain Dividends and short-term capital gain dividends do not apply to (A) distributions to an individual Foreign Person who is present in the United States for a period or periods aggregating 183 days or more during the year of the distribution and (B) distributions attributable to gain that is treated as effectively connected with the conduct by the Foreign Person of a trade or business within the United States under special rules regarding the disposition of U.S. real property interests as described below. If the Fund invests in a RIC that pays such distributions to the Fund, such distributions retain their character as not subject to withholding if properly reported when paid by the Fund to Foreign Persons. The exception to withholding for interest-related dividends does not apply to (A) that has not provided a satisfactory statement that the beneficial owner is not a U.S. person, (B) to the extent that the dividend is attributable to certain interest on an obligation if the Foreign Person is the issuer or is a 10% shareholder of the issuer, (C) that is within certain foreign countries that have inadequate information exchange with the United States, or (D) to the extent the dividend is attributable to interest paid by a person that is a related person of the Foreign Person and the Foreign Person is a controlled foreign corporation. The Fund is permitted to report such part of its dividends as interest-related and/or short-term capital gain dividends as are eligible, but is not required to do so.

In the case of shares held through an intermediary, the intermediary is permitted to withhold even if the Fund reports all or a portion of a payment as an interest-related or short-term capital gain dividend to shareholders. Foreign Persons should contact their intermediaries regarding the application of these rules to their accounts.

Distributions by the Fund to Foreign Persons other than Capital Gain Dividends, short-term capital gain dividends, and interest-related dividends (e.g., dividends attributable to dividend and foreign-source interest income or to short-term capital gains or U.S. source interest income to which the exception from withholding described above does not apply) are generally subject to withholding of U.S. federal income tax at a rate of 30% (or lower applicable treaty rate).

If a beneficial holder of Fund shares who or which is a Foreign Person has a trade or business in the United States, and Fund dividends received by such holder are effectively connected with the conduct of such trade or business, the dividends generally will be subject to U.S. federal net income taxation at regular income tax rates and, in the case of a foreign corporation, may also be subject to a branch profits tax. If a beneficial holder of Fund shares who or which is a Foreign Person is eligible for the benefits of a tax treaty, any effectively connected income or gain will generally be subject to U.S. federal income tax on a net basis only if it is also attributable to a permanent establishment maintained by the holder in the United States. More generally, a beneficial holder of Fund shares who or which is a
Foreign Person and who or which is a resident in a country with an income tax treaty with the United States may obtain different tax results than those described herein, and is urged to consult its tax advisors.

A beneficial holder of Fund shares who or which is a Foreign Person is not, in general, subject to U.S. federal income tax on gains (and is not allowed a deduction for losses) realized on a sale or other disposition of shares of the Fund unless (i) such gain is effectively connected with the conduct of a trade or business carried on by such holder within the United States, (ii) in the case of an individual holder, the holder is present in the United States for a period or periods aggregating 183 days or more during the year of the sale or other disposition and certain other conditions are met or (iii) the special rules relating to gain attributable to the sale or other disposition of “U.S. real property interests” (“USRPIs”) apply to the Foreign Person’s sale of shares of the Fund (as described below).

Subject to certain exceptions (for example, for a fund that is a “United States real property holding corporation” as described below), the Fund is generally not required to withhold on the amount of a non-dividend distribution (i.e., a distribution that is not paid out of the Fund’s current or accumulated earnings and profits for the applicable taxable year) when paid to a beneficial holder of Fund shares who or which is a Foreign Person.

Special rules would apply if the Fund were a qualified investment entity (“QIE”) because it is either a “U.S. real property holding corporation” (“USRPHC”) or would be a USRPHC but for the operation of certain exceptions to the definition of USRPIs described below. Very generally, a USRPHC is a domestic corporation that holds USRPIs the fair market value of which equals or exceeds 50% of the sum of the fair market values of the corporation’s USRPIs, interests in real property located outside the United States, and other trade or business assets. USRPIs generally are defined as any interest in U.S. real property and any interest (other than solely as a creditor) in a USRPHC or, very generally, an entity that has been a USRPHC in the last five years. A fund that holds, directly or indirectly, significant interests in REITs may be a USRPHC. Interests in domestically controlled QIEs, including REITs and RICs that are QIEs, not-greater-than-10% interests in publicly traded classes of stock in REITs and not-greater-than-5% interests in publicly traded classes of stock in RICs generally are not USRPIs, but these exceptions do not apply for purposes of determining whether the Fund is a QIE.

If an interest in the Fund were a USRPI, a greater-than-5% shareholder that is a Foreign Person generally would be required to file a U.S. tax return in connection with the sale of its Fund shares, and pay related taxes due on any gain realized on the sale.

If the Fund were a QIE, under a special “look-through” rule, any distributions by the Fund to a Foreign Person attributable directly or indirectly to (i) distributions received by the Fund from a lower-tier RIC or REIT that the Fund is required to treat as USRPI gain in its hands and (ii) gains realized on the disposition of USRPIs by the Fund would retain their character as gains realized from USRPIs in the hands of the Fund’s Foreign Persons and would be subject to U.S. tax withholding. In addition, such distributions could result in the Foreign Person being required to file a U.S. tax return and pay tax on the distributions at regular U.S. federal income tax rates. The consequences to a Foreign Person, including the rate of such withholding and character of such distributions (e.g., as ordinary income or USRPI gain), would vary depending upon the extent of the Foreign Person’s current and past ownership of the Fund.

Shareholders that are Foreign Persons also may be subject to “wash sale” rules to prevent the avoidance of the tax filing and payment obligations discussed above through the sale and repurchase of Fund shares.

The Fund generally does not expect that it will be a QIE.

In order to qualify for any exemptions from withholding described above or for lower withholding tax rates under income tax treaties, or to establish an exemption from backup withholding, Foreign Persons must comply with special certification and filing requirements relating to their non-U.S. status (including, in general, furnishing an IRS Form W-8BEN, W-8BEN-E or substitute form). Foreign Persons should consult their tax advisers concerning the tax consequences of ownership of shares of the Fund, including the certification and filing requirements imposed on foreign investors in order to qualify for an exemption from the backup withholding tax described above or a reduced rate of withholding provided by treaty.
Shareholder Reporting Obligations With Respect to Foreign Bank and Financial Accounts.

Shareholders that are U.S. persons and own, directly or indirectly, more than 50% of the Fund by vote or value could be required to report annually their financial interest in the Fund’s foreign financial accounts, if any, on FinCEN Form 114, Report of Foreign Bank and Financial Accounts. Shareholders should consult a tax advisor, or if holding shares through an intermediary, their intermediary, regarding the applicability to them of this reporting requirement.

Tax Shelter Reporting Regulations.

Under Treasury regulations, if a shareholder recognizes a loss of $2 million or more for an individual shareholder or $10 million or more for a corporate shareholder, the shareholder must file with the IRS a disclosure statement on Form 8886. Direct holders of portfolio securities are in many cases excepted from this reporting requirement, but under current guidance, shareholders of a RIC are not excepted. Future guidance may extend the current exception from this reporting requirement to shareholders of most or all RICs. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer’s treatment of the loss is proper. Shareholders should consult their tax advisers to determine the applicability of these regulations in light of their individual circumstances.

Certain Additional Reporting and Withholding Requirements

Sections 1471-1474 of the Code and the U.S. Treasury and IRS guidance issued thereunder (collectively, “FATCA”) generally require the Fund to obtain information sufficient to identify the status of each of its shareholders under FATCA or under an applicable intergovernmental agreement (an “IGA”) between the United States and a foreign government. If a shareholder of the Fund fails to provide the requested information or otherwise fails to comply with FATCA or an IGA, the Fund may be required to withhold under FATCA at a rate of 30% with respect to that shareholder on ordinary dividends it pays. The IRS and the Department of Treasury have issued proposed regulations providing that these withholding rules will not apply to the gross proceeds of share redemptions or Capital Gain Dividends the Fund pays. If a payment by the Fund is subject to FATCA withholding, the Fund is required to withhold even if such payment would otherwise be exempt from withholding under the rules applicable to Foreign Persons described above (e.g., short-term capital gain dividends and interest-related dividends).

Each prospective investor is urged to consult its tax advisor regarding the applicability of FATCA and any other reporting requirements with respect to the prospective investor’s own situation, including investments through an intermediary.

Other Tax Matters

Special tax rules apply to investments through defined contribution plans and other tax-qualified plans and tax-advantaged arrangements. Shareholders should consult their tax advisers to determine the suitability of shares of the Fund as an investment through such plans and arrangements and the precise effect of such an investment on their particular tax situations.

Dividends and distributions and gains from the sale of Fund shares may be subject to state, local and foreign taxes. Shareholders are urged to consult their tax advisers regarding specific questions as to federal, state, local and, where applicable, foreign taxes.

PERFORMANCE INFORMATION

Quantitative performance information for the Fund is updated on a daily basis, including differences between the Fund’s daily market price on the NYSE Arca and its NAV per share, and is available at im.natixis.com.

Yield and Total Return

The Fund may advertise the yield and total return of its shares. The Fund’s yield and total return will vary from time to time depending upon market conditions, the composition of its portfolio and operating expenses of the Fund. These factors, possible differences in the methods used in calculating yield and total return and the tax-exempt status of distributions should be considered when comparing the Fund’s yield and total return to yields and total returns.
published for other investment companies and other investment vehicles. Yield and total return should also be considered relative to changes in the value of the Fund’s shares and to the relative risks associated with the investment objectives and policies of the Fund. Yield and total return may be stated with or without giving effect to any expense limitations in effect for the Fund. For those funds that present yields and total returns reflecting an expense limitation or waiver, the yield or total return would have been lower if no limitation or waiver were in effect.

The Fund may also present one or more distribution rates in its sales literature. These rates will be determined by annualizing the distributions from net investment income and net short-term capital gain over a recent 12-month, 3-month or 30-day period and dividing that amount by the maximum offering price or the NAV. If the NAV, rather than the maximum offering price, is used to calculate the distribution rate, the rate will be higher.

At any time in the future, yield and total return may be higher or lower than past yields or total return, and there can be no assurance that any historical results will continue.

Investors in the Fund are specifically advised that share prices, expressed as the NAVs per share, will vary just as yield and total return will vary. An investor’s focus on the yield of the Fund to the exclusion of the consideration of the share price of the Fund may result in the investor’s misunderstanding the total return he or she may derive from the Fund.

**Benchmark Comparisons**

Performance information for the Fund, once it has one calendar year of performance history will be included in the Prospectus (in the section “Risk/Return Bar Chart and Table” in the Fund Summary), along with the performance of an appropriate benchmark index. Because index comparisons are generally calculated as of the end of each month, index performance information under the “Life of Fund” or “Life of Class” headings in the Prospectus may not be coincident with the inception date of the Fund once performance information for the Fund is shown. In such an instance, index performance will generally be presented from the month-end nearest to the inception date of the Fund.

**THIRD-PARTY INFORMATION**

Each of the third-party entities involved in compiling, computing or creating index information, disclaims all warranties (including, without limitation, any warranties of originality, accuracy, completeness, timeliness, non-infringement, merchantability and fitness for a particular purpose) with respect to such information.

**FINANCIAL STATEMENTS**

The financial statements, financial highlights and the reports of PricewaterhouseCoopers LLP, the independent registered public accounting firm included in the Fund’s annual report dated December 31, 2018, are incorporated herein by reference to such report. The Fund’s annual and semiannual reports are available upon request and without charge. The Fund will send a single copy of its annual and semiannual report to an address at which more than one shareholder of record with the same last name has indicated that mail is to be delivered. Shareholders may request additional copies of any annual or semiannual report by telephone at 800-458-7452 or by writing to the Fund at: 888 Boylston Street, Suite 800, Boston, MA 02199 or by visiting the Fund’s website at im.natixis.com. The annual and semiannual reports are also available on-line at the SEC’s website at www.sec.gov.
The Fund makes use of average portfolio credit quality standards to assist institutional investors whose own investment guidelines limit their investments accordingly. In determining the Fund’s overall dollar-weighted average quality, unrated securities are treated as if rated, based on the Adviser’s or Subadviser’s view of their comparability to rated securities. The Fund’s use of average quality criteria is intended to be a guide for those investors whose investment guidelines require that assets be invested according to comparable criteria. Reference to an overall average quality rating for the Fund does not mean that all securities held by the Fund will be rated in that category or higher. The Fund’s investments may range in quality from securities rated in the lowest category in which the Fund is permitted to invest to securities rated in the highest category (as rated by S&P Global Ratings, Moody’s Investors Service, Inc. (“Moody’s”) or Fitch Investor Services, Inc. (“Fitch”) or, if unrated, determined by the Adviser or Subadviser to be of comparable quality). The percentage of the Fund’s assets invested in securities in a particular rating category will vary. Following is a description of S&P Global Ratings’, Moody’s, and Fitch’s ratings applicable to fixed-income securities.

S&P Global Ratings—A brief description of the applicable rating symbols of S&P Global Ratings and their meanings (as published by S&P Global Ratings) follows:

### Issue Credit Rating Definitions

An S&P Global Ratings issue credit rating is a forward-looking opinion about the creditworthiness of an obligor with respect to a specific financial obligation, a specific class of financial obligations, or a specific financial program (including ratings on medium-term note programs and commercial paper programs). It takes into consideration the creditworthiness of guarantors, insurers, or other forms of credit enhancement on the obligation and takes into account the currency in which the obligation is denominated. The opinion reflects S&P Global Ratings’ view of the obligor’s capacity and willingness to meet its financial commitments as they come due, and this opinion may assess terms, such as collateral security and subordination, which could affect ultimate payment in the event of default.

Issue credit ratings can be either long-term or short-term. Short-term ratings are generally assigned to those obligations considered short-term in the relevant market. Short-term ratings are also used to indicate the creditworthiness of an obligor with respect to put features on long-term obligations. Medium-term notes are assigned long-term ratings.

### Long-Term Issue Credit Ratings

Issue credit ratings are based, in varying degrees, on S&P Global Ratings’ analysis of the following considerations:

- The likelihood of payment—the capacity and willingness of the obligor to meet its financial commitment on an obligation in accordance with the terms of the obligation;
- The nature and provisions of the financial obligation and the promise we impute; and
- The protection afforded by, and relative position of, the financial obligation in the event of a bankruptcy, reorganization, or other arrangement under the laws of bankruptcy and other laws affecting creditors’ rights.

An issue ratings is an assessment of default risk, but may incorporate an assessment of relative seniority or ultimate recovery in the event of default. Junior obligations are typically rated lower than senior obligations, to reflect lower priority in bankruptcy, as noted above. (Such differentiation may apply when an entity has both senior and
subordinated obligations, secured and unsecured obligations, or operating company and holding company obligations.)

AAA
An obligation rated ‘AAA’ has the highest rating assigned by S&P Global Ratings. The obligor’s capacity to meet its financial commitment on the obligation is extremely strong.

AA
An obligation rated ‘AA’ differs from the highest-rated obligations only to a small degree. The obligor’s capacity to meet its financial commitment on the obligation is very strong.

A
An obligation rated ‘A’ is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor’s capacity to meet its financial commitment on the obligation is still strong.

BBB
An obligation rated ‘BBB’ exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

BB, B, CCC, CC, and C
Obligations rated ‘BB’, ‘B’, ‘CCC’, ‘CC’, and ‘C’ are regarded as having significant speculative characteristics. ‘BB’ indicates the least degree of speculation and ‘C’ the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

BB
An obligation rated ‘BB’ is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to the obligor’s inadequate capacity to meet its financial commitment on the obligation.

B
An obligation rated ‘B’ is more vulnerable to nonpayment than obligations rated ‘BB’, but the obligor currently has the capacity to meet its financial commitment on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor’s capacity or willingness to meet its financial commitment on the obligation.

CCC
An obligation rated ‘CCC’ is currently vulnerable to nonpayment, and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitment on the obligation.

CC
An obligation rated ‘CC’ is currently highly vulnerable to nonpayment. The ‘CC’ rating is used when a default has not yet occurred, but S&P Global Ratings expects default to be a virtual certainty, regardless of the anticipated time to default.
C

An obligation rated ‘C’ is currently highly vulnerable to nonpayment, and the obligation is expected to have lower relative seniority or lower ultimate recovery compared to obligations that are rated higher.

D

An obligation rated ‘D’ is in default or in breach of an imputed promise. For non-hybrid capital instruments, the ‘D’ rating category is used when payments on an obligation are not made on the date due, unless S&P Global Ratings believes that such payments will be made within five business days in the absence of a stated grace period or within the earlier of the stated grace period or 30 calendar days. The ‘D’ rating also will be used upon the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. An obligation’s rating is lowered to ‘D’ if it is subject to a distressed exchange offer.

Plus (+) or minus (–)

The ratings from ‘AA’ to ‘CCC’ may be modified by the addition of a plus (+) or minus (–) sign to show relative standing within the major rating categories.

NR

This indicates that a rating has not been assigned or is no longer assigned.

Short-Term Issue Credit Ratings

A-1

A short-term obligation rated ‘A-1’ is rated in the highest category by S&P Global Ratings. The obligor’s capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor’s capacity to meet its financial commitment on these obligations is extremely strong.

A-2

A short-term obligation rated ‘A-2’ is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor’s capacity to meet its financial commitment on the obligation is satisfactory.

A-3

A short-term obligation rated ‘A-3’ exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to weaken an obligor’s capacity of the obligor to meet its financial commitments on the obligation.

B

A short-term obligation rated ‘B’ is regarded as vulnerable and has significant speculative characteristics. The obligor currently has the capacity to meet its financial commitments; however, it faces major ongoing uncertainties that could lead to the obligor’s inadequate capacity to meet its financial commitments.

C

A short-term obligation rated ‘C’ is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation.
D

A short-term obligation rated ‘D’ is in default or in breach of an imputed promise. For non-hybrid capital instruments, the ‘D’ rating category is used when payments on an obligation are not made on the date due, unless S&P Global Ratings believes that such payments will be made within any stated grace period. However, any stated grace period longer than five business days will be treated as five business days. The ‘D’ rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. A rating on an obligation is lowered to ‘D’ if it is subject to a distressed exchange offer.

SPUR (S&P Underlying Rating)

A SPUR is an opinion about the stand-alone capacity of an obligor to pay debt service on a credit-enhanced debt issue, without giving effect to the enhancement that applies to it. These ratings are published only at the request of the debt issuer or obligor with the designation SPUR to distinguish them from the credit-enhanced rating that applies to the debt issue. S&P Global Ratings maintains surveillance of an issue with a published SPUR.

Municipal Short-Term Note Ratings Definitions

An S&P Global Ratings U.S. municipal note rating reflects S&P Global Ratings’ opinion about the liquidity factors and market access risks unique to the notes. Notes due in three years or less will likely receive a note rating. Notes with an original maturity of more than three years will most likely receive a long-term debt rating. In determining which type of rating, if any, to assign, S&P Global Ratings’ analysis will review the following considerations:

- Amortization schedule—the larger the final maturity relative to other maturities, the more likely it will be treated as a note; and
- Source of payment—the more dependent the issue is on the market for its refinancing, the more likely it will be treated as a note.

Note rating symbols are as follows:

SP-1

Strong capacity to pay principal and interest. An issue determined to possess a very strong capacity to pay debt service is given a plus (+) designation.

SP-2

Satisfactory capacity to pay principal and interest, with some vulnerability to adverse financial and economic changes over the term of the notes.

SP-3

Speculative capacity to pay principal and interest.

D

“D” is assigned upon failure to pay the note when due, completion of a distressed exchange offer, or the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions.
Dual Ratings

Dual ratings may be assigned to debt issues that have a put option or demand feature. The first component of the rating addresses the likelihood of repayment of principal and interest as due, and the second component of the rating addresses only the demand feature. The first component of the rating can relate to either a short-term or long-term transaction and accordingly use either short-term or long-term rating symbols. The second component of the rating relates to the put option and is assigned a short-term rating symbol (for example, ‘AAA/A-1+’ or ‘A-1+/A-1’). With U.S. municipal short-term demand debt, the U.S. municipal short-term note rating symbols are used for the first component of the rating (for example ‘SP-1+/A-1+’).

S&P Global Ratings’ Disclaimers

The analyses, including ratings, of S&P Global Ratings and its affiliates (together, S&P Global Ratings) are statements of opinion as of the date they are expressed and not statements of fact or recommendations to purchase, hold, or sell any securities or make any investment decisions. S&P Global Ratings assumes no obligation to update any information following publication. Users of ratings or other analyses should not rely on them in making any investment decision. S&P Global Ratings’ opinions and analyses do not address the suitability of any security. S&P Global Ratings does not act as a fiduciary or an investment advisor except where registered as such. While S&P Global Ratings has obtained information from sources it believes to be reliable, it does not perform an audit and undertakes no duty of due diligence or independent verification of any information it receives. Ratings and other opinions may be changed, suspended, or withdrawn at any time.

Active Qualifiers

S&P Global Ratings uses the following qualifiers that limit the scope of a rating. The structure of the transaction can require the use of a qualifier such as a ‘p’ qualifier, which indicates the rating addresses the principal portion of the obligation only. A qualifier appears as a suffix and is part of the rating.

Federal deposit insurance limit: ‘L’ qualifier

Ratings qualified with ‘L’ apply only to amounts invested up to federal deposit insurance limits.

Principal: ‘p’ qualifier

This suffix is used for issues in which the credit factors, the terms, or both, that determine the likelihood of receipt of payment of principal are different from the credit factors, terms or both that determine the likelihood of receipt of interest on the obligation. The ‘p’ suffix indicates that the rating addresses the principal portion of the obligation only and that the interest is not rated.

Preliminary Ratings: ‘prelim’ qualifier

Preliminary ratings, with the ‘prelim’ suffix, may be assigned to obligors or obligations, including financial programs, in the circumstances described below. Assignment of a final rating is conditional on the receipt by S&P Global Ratings of appropriate documentation. S&P Global Ratings reserves the right not to issue a final rating. Moreover, if a final rating is issued, it may differ from the preliminary rating.

- Preliminary ratings may be assigned to obligations, most commonly structured and project finance issues, pending receipt of final documentation and legal opinions.

- Preliminary ratings may be assigned to obligations that will likely be issued upon the obligor’s emergence from bankruptcy or similar reorganization, based on late-stage reorganization plans, documentation and discussions with the obligor. Preliminary ratings may also be assigned to the obligors. These ratings
consider the anticipated general credit quality of the reorganized or post-bankruptcy issuer as well as attributes of the anticipated obligation(s).

- Preliminary ratings may be assigned to entities that are being formed or that are in the process of being independently established when, in S&P Global Ratings’ opinion, documentation is close to final. Preliminary ratings may also be assigned to the obligations of these entities.

- Preliminary ratings may be assigned when a previously unrated entity is undergoing a well-formulated restructuring, recapitalization, significant financing or other transformative event, generally at the point that investor or lender commitments are invited. The preliminary rating may be assigned to the entity and to its proposed obligation(s). These preliminary ratings consider the anticipated general credit quality of the obligor, as well as attributes of the anticipated obligation(s), assuming successful completion of the transformative event. Should the transformative event not occur, S&P Global Ratings would likely withdraw these preliminary ratings.

- A preliminary recovery rating may be assigned to an obligation that has a preliminary issue credit rating.

**Termination Structures: ‘t’ qualifier**

This symbol indicates termination structures that are designed to honor their contracts to full maturity or, should certain events occur, to terminate and cash settle all their contracts before their final maturity date.

**Counterparty instrument rating: 'cir' qualifier**

This symbol indicates a counterparty instrument rating (CIR), which is a forward-looking opinion about the creditworthiness of an issuer in a securitization structure with respect to a specific financial obligation to a counterparty (including interest rate swaps, currency swaps, and liquidity facilities). The CIR is determined on an ultimate payment basis; these opinions do not take into account timeliness of payment.

**Inactive Qualifiers (Inactive qualifiers are no longer applied or outstanding)**

**Contingent upon final documentation: ‘** inactive qualifier**

This symbol indicated that the rating was contingent upon S&P Global Ratings’ receipt of an executed copy of the escrow agreement or closing documentation confirming investments and cash flows. Discontinued use in August 1998.

**Termination of obligation to tender: ‘c’ inactive qualifier**

This qualifier was used to provide additional information to investors that the bank may terminate its obligation to purchase tendered bonds if the long-term credit rating of the issuer was lowered to below an investment-grade level and/or the issuer’s bonds were deemed taxable. Discontinued use in January 2001.

**U.S. direct government securities: ‘G’ inactive qualifier**

The letter ‘G’ followed the rating symbol when the Fund’s portfolio consisted primarily of direct U.S. government securities.

**Public Information Ratings: ‘pi’ qualifier**

This qualifier was used to indicate ratings that were based on an analysis of an issuer's published financial information, as well as additional information in the public domain. Such ratings did not, however, reflect in-depth meetings with an issuer's management and therefore, could have been based on less comprehensive information than ratings without a 'pi' suffix. Discontinued use as of December 2014 and as of August 2015 for Lloyd's Syndicate Assessments.
Provisional Ratings: ‘pr’ inactive qualifier

The letters ‘pr’ indicate that the rating was provisional. A provisional rating assumed the successful completion of a project financed by the debt being rated and indicates that payment of debt service requirements was largely or entirely dependent upon the successful, timely completion of the project. This rating, however, while addressing credit quality subsequent to completion of the project, made no comment on the likelihood of or the risk of default upon failure of such completion.

Quantitative Analysis of public information: ‘q’ inactive qualifier

A ‘q’ subscript indicates that the rating is based solely on quantitative analysis of publicly available information. Discontinued use in April 2001.

Extraordinary risks: ‘r’ inactive qualifier

The ‘r’ modifier was assigned to securities containing extraordinary risks, particularly market risks, that are not covered in the credit rating. The absence of an ‘r’ modifier should not be taken as an indication that an obligation would not exhibit extraordinary noncredit-related risks. S&P Global Ratings discontinued the use of the ‘r’ modifier for most obligations in June 2000 and for the balance of obligations (mainly structured finance transactions) in November 2002.

Local Currency and Foreign Currency Ratings

S&P Global Ratings issuer credit ratings make a distinction between foreign currency ratings and local currency ratings. A foreign currency rating on an issuer will differ from the local currency rating on it when the obligor has a different capacity to meet its obligations denominated in its local currency versus obligations denominated in a foreign currency.

Moody’s Investors Service, Inc.—A brief description of the applicable Moody’s rating symbols and their meanings (as published by Moody’s) follows:

Long-Term Obligation Ratings

Ratings assigned on Moody’s global long-term and short-term rating scales are forward-looking opinions of the relative credit risks of financial obligations issued by non-financial corporates, financial institutions, structured finance vehicles, project finance vehicles, and public sector entities. Moody’s defines credit risk as the risk that an entity may not meet its contractual financial obligations as they come due and any estimated financial loss in the event of default or impairment. The contractual financial obligations1 addressed by Moody’s ratings are those that call for, without regard to enforceability, the payment of an ascertainable amount, which may vary based upon standard sources of variation (e.g., floating interest rates), by an ascertainable date. Moody’s rating addresses the issuer’s ability to obtain cash sufficient to service the obligation, and its willingness to pay.2 Moody’s ratings do not address non-standard sources of variation in the amount of the principal obligation (e.g., equity indexed), absent an express statement to the contrary in a press release accompanying an initial rating. Long-term ratings are assigned to issuers or obligations with an original maturity of one year or more and reflect both on the likelihood of a default or impairment on contractual financial obligations and the expected financial loss suffered in the event of default or impairment. Short-term ratings are assigned to obligations with an original maturity of thirteen months or less and reflect both on the likelihood of a default on or impairment on contractual financial obligations and the expected financial loss suffered in the event of default or impairment. Moody’s issues ratings at the issuer level and instrument level on both the long-term scale and the short-term scale. Typically, ratings are made publicly available although private and unpublished ratings may also be assigned.

Moody’s differentiates structured finance ratings from fundamental ratings (i.e., ratings on nonfinancial corporate, financial institution, and public sector entities) on the global long-term scale by adding (sf ) to all structured finance ratings. The addition of (sf ) to structured finance ratings should eliminate any presumption
that such ratings and fundamental ratings at the same letter grade level will behave the same. The (sf) indicator for structured finance security ratings indicates that otherwise similarly rated structured finance and fundamental securities may have different risk characteristics. Through its current methodologies, however, Moody’s aspires to achieve broad expected equivalence in structured finance and fundamental rating performance when measured over a long period of time.

Moody’s Global Long-Term Rating Scale:

**Aaa**
Obligations rated Aaa are judged to be of the highest quality, subject to the lowest level of credit risk.

**Aa**
Obligations rated Aa are judged to be of high quality and are subject to very low credit risk.

**A**
Obligations rated A are judged to be upper-medium grade and are subject to low credit risk.

**Baa**
Obligations rated Baa are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

**Ba**
Obligations rated Ba are judged to be speculative and are subject to substantial credit risk.

**B**
Obligations rated B are considered speculative and are subject to high credit risk.

**Caa**
Obligations rated Caa are judged to be speculative of poor standing and are subject to very high credit risk.

**Ca**
Obligations rated Ca are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.

**C**
Obligations rated C are the lowest rated and are typically in default, with little prospect for recovery of principal or interest.

**Note:** Moody’s appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category. Additionally, a “(hyb)” indicator is appended to all ratings of hybrid securities issued by banks, insurers, finance companies, and securities firms.
Issuer Ratings

Issuer Ratings are opinions of the ability of entities to honor senior unsecured debt and debt-like obligations. As such,Issuer Ratings incorporate any external support that is expected to apply to all current and future issuance of senior unsecured financial obligations and contracts, such as explicit support stemming from a guarantee of all senior unsecured financial obligations and contracts, and/or implicit support for issuers subject to joint default analysis (e.g., banks and government-related issuers). Issuer Ratings do not incorporate support arrangements, such as guarantees, that apply only to specific (but not to all) senior unsecured financial obligations and contracts. While Issuer Ratings reflect the risk that debt and debt-like claims are not serviced on a timely basis, they do not reflect the risk that a contract or other non-debt obligation will be subjected to commercial disputes. Additionally, while an issuer may have senior unsecured obligations held by both supranational institutions and central banks (e.g., IMF, European Central Bank), as well as other investors, Issuer Ratings reflect only the risks faced by other investors.

Long-Term and Short-Term Obligation Ratings

Moody’s assigns ratings to long-term and short-term financial obligations. Long-term ratings are assigned to issuers or obligations with an original maturity of one year or more and reflect both on the likelihood of a default on contractually promised payments and the expected financial loss suffered in the event of default. Short-term ratings are assigned to obligations with an original maturity of thirteen months or less and reflect both on the likelihood of a default on contractually promised payments and the expected financial loss suffered in the event of default.

Medium-Term Note Program Ratings

Moody’s assigns provisional ratings to medium-term note (“MTN”) programs and definitive ratings to the individual debt securities issued from them (referred to as drawdowns or notes).

MTN program ratings are intended to reflect the ratings likely to be assigned to drawdowns issued from the program with the specified priority of claim (e.g., senior or subordinated). To capture the contingent nature of a program rating, Moody’s assigns provisional ratings to MTN programs. A provisional rating is denoted by a (P) in front of the rating and is defined elsewhere in this document.

The rating assigned to a drawdown from a rated MTN or bank/deposit note program is definitive in nature, and may differ from the program rating if the drawdown is exposed to additional credit risks besides the issuer’s default, such as links to the defaults of other issuers, or has other structural features that warrant a different rating. In some circumstances, no rating may be assigned to a drawdown.

Moody’s encourages market participants to contact Moody’s Ratings Desks or visit www.moodys.com directly if they have questions regarding ratings for specific notes issued under a medium-term note program. Unrated notes issued under an MTN program may be assigned an NR (not rated) symbol.

Global Short-Term Rating Scale

P-1

Issuers (or supporting institutions) rated Prime-1 have a superior ability to repay short-term debt obligations.

P-2

Issuers (or supporting institutions) rated Prime-2 have a strong ability to repay short-term debt obligations.

P-3

Issuers (or supporting institutions) rated Prime-3 have an acceptable ability to repay short-term obligations.
Issuers (or supporting institutions) rated Not Prime do not fall within any of the Prime rating categories.

**Short-Term Issuer Ratings**

Not included in Moody’s current definitions.

_Fitch Investor Services, Inc._ – A brief description of the applicable rating symbols of Fitch and their meanings (as published by Fitch) follows:

**Credit Rating Scales**

Fitch Ratings’ credit ratings relating to issuers are an opinion on the relative ability of an entity to meet financial commitments, such as interest, preferred dividends, repayment of principal, insurance claims or counterparty obligations. Credit ratings relating to securities and obligations of an issuer can include a recovery expectation. Credit ratings are used by investors as indications of the likelihood of receiving the money owed to them in accordance with the terms on which they invested. The agency’s credit ratings cover the global spectrum of corporate, sovereign (including supranational and sub-national), financial, bank, insurance, municipal and other public finance entities (including supranational and sub-national entities) and the securities or other obligations they issue, as well as structured finance securities backed by receivables or other financial assets.

The terms “investment grade” and “speculative grade” have established themselves over time as shorthand to describe the categories ‘AAA’ to ‘BBB’ (investment grade) and ‘BB’ to ‘D’ (speculative grade). The terms “investment grade” and “speculative grade” are market conventions, and do not imply any recommendation or endorsement of a specific security for investment purposes. “Investment grade” categories indicate relatively low to moderate credit risk, while ratings in the “speculative” categories either signal a higher level of credit risk or that a default has already occurred.

For the convenience of investors, Fitch may also include issues relating to a rated issuer that are not and have not been rated on its web page. Such issues are also denoted as ‘NR’.

Credit ratings express risk in relative rank order, which is to say they are ordinal measures of credit risk and are not predictive of a specific frequency of default or loss. For information about the historical performance of ratings please refer to Fitch’s Ratings Transition and Default studies which detail the historical default rates and their meaning. The European Securities and Markets Authority also maintains a central repository of historical default rates.

Fitch’s credit ratings do not directly address any risk other than credit risk. In particular, ratings do not deal with the risk of a market value loss on a rated security due to changes in interest rates, liquidity and other market considerations. However, in terms of payment obligation on the rated liability, market risk may be considered to the extent that it influences the ability of an issuer to pay upon a commitment. Ratings nonetheless do not reflect market risk to the extent that they influence the size or other conditionality of the obligation to pay upon a commitment (for example, in the case of index-linked bonds).

In the default components of ratings assigned to individual obligations or instruments, the agency typically rates to the likelihood of non-payment or default in accordance with the terms of that instrument’s documentation. In limited cases, Fitch may include additional considerations (i.e., rate to a higher or lower standard than that implied in the obligation’s documentation).

**Long-Term Rating Scales**

**Issuer Default Ratings**
Rated entities in a number of sectors, including financial and non-financial corporations, sovereigns, insurance companies and certain sectors within public finance, are generally assigned Issuer Default Ratings (IDRs). IDRs are also assigned to certain entities or enterprises in global infrastructure, project finance and public finance. IDRs opine on an entity’s relative vulnerability to default (including by way of distressed debt exchange) on financial obligations. The “threshold” default risk addressed by the IDR is generally that of the financial obligations whose non-payment would best reflect the uncured failure of that entity. As such, IDRs also address relative vulnerability to bankruptcy, administrative receivership or similar concepts.

In aggregate, IDRs provide an ordinal ranking of issuers based on the agency’s view of their relative vulnerability to default, rather than a prediction of a specific percentage likelihood of default.

**AAA**

Highest credit quality. ‘AAA’ ratings denote the lowest expectation of default risk. They are assigned only in cases of exceptionally strong capacity for payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

**AA**

Very high credit quality. ‘AA’ ratings denote expectations of very low default risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

**A**

High credit quality. ‘A’ ratings denote expectations of low default risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.

**BBB**

Good credit quality. ‘BBB’ ratings indicate that expectations of default risk are currently low. The capacity for payment of financial commitments is considered adequate but adverse business or economic conditions are more likely to impair this capacity.

**BB**

Speculative. ‘BB’ ratings indicate an elevated vulnerability to default risk, particularly in the event of adverse changes in business or economic conditions over time; however, business or financial flexibility exists that supports the servicing of financial commitments.

**B**

Highly speculative. ‘B’ ratings indicate that material default risk is present, but a limited margin of safety remains. Financial commitments are currently being met; however, capacity for continued payment is vulnerable to deterioration in the business and economic environment.

**CCC**

Substantial credit risk. Default is a real possibility.

**CC**

Very high levels of credit risk. Default of some kind appears probable.

**C**
Near default. A default or default-like process has begun or the issuer is in standstill, or for a closed funding vehicle, payment capacity is irrevocably impaired. Conditions that are indicative of a ‘C’ category rating for an issuer include:

a. the issuer has entered into a grace or cure period following non-payment of a material financial obligation;

b. the issuer has entered into a temporary negotiated waiver or standstill agreement following a payment default on a material financial obligation;

c. the formal announcement by the issuer or their agent of a distressed debt exchange;

d. a closed financing vehicle where payment capacity is irrevocably impaired such that it is not expected to pay interest and/or principal in full during the life of the transaction, but where no payment default is imminent.

RD

Restricted default. ‘RD’ ratings indicate an issuer that in Fitch’s opinion has experienced:

a. an uncured payment default or distressed debt exchange on a bond, loan or other material financial obligation but

b. has not entered into bankruptcy filings, administration, receivership, liquidation or other formal winding-up procedure, and

c. has not otherwise ceased operating. This would include:

   i. the selective payment default on a specific class or currency of debt;

   ii. the uncured expiry of any applicable grace period, cure period or default forbearance period following a payment default on a bank loan, capital markets security or other material financial obligation;

   iii. the extension of multiple waivers or forbearance periods upon a payment default on one or more material financial obligations, either in series or in parallel; or

d. ordinary execution of a distressed debt exchange on one or more material financial obligations.

D

Default. ‘D’ ratings indicate an issuer that in Fitch’s opinion has entered into bankruptcy filings, administration, receivership, liquidation or other formal winding-up procedure, or which has otherwise ceased business.

Default ratings are not assigned prospectively to entities or their obligations; within this context, non-payment on an instrument that contains a deferral feature or grace period generally will not be considered a default until after the expiration of the deferral or grace period, unless a default is otherwise driven by bankruptcy or other similar circumstance, or by a distressed debt exchange.

In all cases, the assignment of a default rating reflects the agency’s opinion as to the most appropriate rating category consistent with the rest of its universe of ratings, and may differ from the definition of default under the terms of an issuer’s financial obligations or local commercial practice.

Limitations of the Issuer Credit Rating Scale

Specific limitations relevant to the issuer credit rating scale include:

- The ratings do not predict a specific percentage of default likelihood or failure likelihood over any given time period.
The ratings do not opine on the market value of any issuer’s securities or stock, or the likelihood that this value may change.

The ratings do not opine on the liquidity of the issuer’s securities or stock.

The ratings do not opine on the possible loss severity on an obligation should an issuer (or an obligation with respect to structured finance transactions) default, except in the following cases:

- Ratings assigned to individual obligations of issuers in corporate finance, banks, non-bank financial institutions, insurance and covered bonds.
- In limited circumstances for U.S. public finance obligations where Chapter 9 of the Bankruptcy Code provides reliably superior prospectus for ultimate recovery to local government obligations that benefit from a statutory lien on revenues or during the pendency of a bankruptcy proceeding under the Code if there is sufficient visibility on potential recovery prospectus.

The ratings do not opine on the suitability of an issuer as a counterparty to trade credit.

The ratings do not opine on any quality related to an issuer’s business, operational or financial profile other than the agency’s opinion on its relative vulnerability to default, or in the case of the bank Viability Ratings on its relative vulnerability to failure. For the avoidance of doubt, not all defaults will be considered a default for rating purposes. Typically, a default relates to the liability payable to an unaffiliated, outside investor.

The ratings do not opine on any quality related to a transaction’s profile other than the agency’s opinion on the relative vulnerability to default of an issuer and/or of each rated tranche or security.

The ratings do not predict a specific percentage of extraordinary support likelihood over any given period.

In the case of bank Support Ratings and Support Rating Floors, the ratings do not opine on any quality related to an issuer’s business, operational or financial profile other than the agency’s opinion on its relative likelihood of receiving external extraordinary support.

The ratings do not opine on the suitability of any security for investment or any other purposes.

**Short-Term Credit Ratings**

**Short-Term Ratings Assigned to Issuers and Obligations**

A short-term issuer or obligation rating is based in all cases on the short-term vulnerability to default of the rated entity and relates to the capacity to meet financial obligations in accordance with the documentation governing the relevant obligation. Short-term deposit ratings may be adjusted for loss severity. Short-Term Ratings are assigned to obligations whose initial maturity is viewed as “short term” based on market convention. Typically, this means up to 13 months for corporate, sovereign and structured obligations, and up to 36 months for obligations in U.S. public finance markets.

**F1**

Highest short-term credit quality. Indicates the strongest intrinsic capacity for timely payment of financial commitments; may have an added “+” to denote any exceptionally strong credit feature.

**F2**

Good short-term credit quality. Good intrinsic capacity for timely payment of financial commitments.

**F3**

Fair short-term credit quality. The intrinsic capacity for timely payment of financial commitments is adequate.
B
Speculative short-term credit quality. Minimal capacity for timely payment of financial commitments, plus heightened vulnerability to near term adverse changes in financial and economic conditions.

C
High short-term default risk. Default is a real possibility.

RD
Restricted default. Indicates an entity that has defaulted on one or more of its financial commitments, although it continues to meet other financial obligations. Typically applicable to entity ratings only.

D
Default. Indicates a broad-based default event for an entity, or the default of a short-term obligation.

Limitations of the Short-Term Ratings Scale

Specific limitations relevant to the Short-Term Ratings scale include:

- The ratings do not predict a specific percentage of default likelihood over any given time period.
- The ratings do not opine on the market value of any issuer’s securities or stock, or the likelihood that this value may change.
- The ratings do not opine on the liquidity of the issuer’s securities or stock.
- The ratings do not opine on the possible loss severity on an obligation should an obligation default.
- The ratings do not opine on any quality related to an issuer or transaction’s profile other than the agency’s opinion on the relative vulnerability to default of the rated issuer or obligation should an issuer (or an obligation with respect to structured finance transactions) default, except in the following cases:
  - Ratings assigned to individual obligations of issuers in corporate finance, banks, non-bank financial institutions, insurance and covered bonds.
  - In limited circumstances for U.S. public finance obligations where Chapter 9 of the Bankruptcy Code provides reliably superior prospects for ultimate recovery to local government obligations that benefit from a statutory lien on revenues or during the pendency of a bankruptcy proceeding under the Code if there is sufficient visibility on potential recovery prospects.
- The ratings do not opine on the suitability of an issuer as a counterparty to trade credit.
- The ratings do not opine on any quality related to an issuer’s business, operational or financial profile other than the agency’s opinion on its relative vulnerability to default or in the case of bank Viability Ratings on its relative vulnerability to failure. For the avoidance of doubt, not all defaults will be considered a default for rating purposes. Typically, a default relates to a liability payable to an unaffiliated, outside investor.
- The ratings do not opine on any quality related to a transaction’s profile other than the agency’s opinion on the relative vulnerability to default of an issuer and/or of each rated tranche or security.
- The ratings do not predict a specific percentage of extraordinary support likelihood over any given period.
- In the case of bank Support Ratings and Support Rating Floors, the ratings do not opine on any quality related to an issuer’s business, operational or financial profile other than the agency’s opinion on its relative likelihood of receiving external extraordinary support.
- The ratings do not opine on the suitability of any security for investment or any other purposes.
Rating Actions

**Assignment (New Rating)**:
A rating has been assigned to a previously unrated issuer or issue.

**Publication (Publish)**.
Initial public announcement of a rating on the agency’s website, although not necessarily the first rating assigned. This action denotes when a previously private rating is published. In cases where the publication coincides with a rating change, Fitch will only publish the changed rating. The rating history during the time when the rating was private will not be published.

**Affirmed**
The rating has been reviewed with no change in rating. Ratings affirmations may also include an affirmation of, or change to an Outlook when an Outlook is used.

**Upgrade**: 
The rating has been raised in the scale.

**Downgrade**: 
The rating has been lowered in the scale.

**Reviewed No Action**: 
The rating has been reviewed with no change in rating. Such action will be published on the agency’s website, but a rating action commentary will not be issued. This rating action is only available for routine structured finance and U.S. public finance surveillance activities and large portfolio/sector reviews in other groups. This is not applicable to ratings or rating modifiers that have changed (including Rating Watch, Rating Outlook or Recovery Ratings).

**Matured*/Paid-In-Full**
a. ‘Matured’ – This action is used when an issue has reached the end of its repayment term and rating coverage is discontinued. This indicates that a previously rated issue has been repaid, but other issues of the same program (rated or unrated) may remain outstanding. For the convenience of investors, Fitch may also include issues relating to a rated issuer or transaction that are not and have not been rated on its section of the web page relating to the respective issuer or transaction. Denoted as ‘NR’.
b. ‘Paid-In-Full’ – This action indicates that the issue has been paid in full. In covered bonds, PIF is only used when all issues of a program have been repaid. Denoted as ‘PIF.’

**Pre-refunded**
Assigned to long-term US Public Finance issues after Fitch assesses refunding escrow.

**Withdrawn**
The rating has been withdrawn and the issue or issuer is no longer rated by Fitch. Withdrawals may occur for one or several of the following reasons:

- Incorrect or insufficient information.
- Bankruptcy of the rated entity, debt restructuring or default.
- Reorganization of rated entity (e.g. merger or acquisition of rated entity or rated entity no longer exists).
- The debt instrument was taken private.
- Withdrawal of a guarantor rating.
- An Expected Rating that is no longer expected to convert to a Final Rating.
- Criteria or policy change.
Bonds were pre-refunded, repaid early (off schedule), or canceled. This includes cases where the issuer has no debt outstanding and is no longer issuing debt.

- Ratings are no longer considered relevant to the agency’s coverage.
- Commercial reasons.
- Other reasons.

When a public rating is withdrawn, Fitch will issue a Rating Action Commentary that details the current rating and Outlook or Watch status (if applicable), a statement that the rating is withdrawn and the reason for the withdrawal.

Withdrawals cannot be used to forestall a rating action. Every effort is therefore made to ensure that the rating opinion upon withdrawal reflects an updated view. Where significant elements of uncertainty remain (for example, a rating for an entity subject to a takeover bid) or where information is otherwise insufficient to support a revised opinion, the agency attempts when possible to indicate in the withdrawal disclosure the likely direction and scale of any rating movement had coverage been maintained. Ratings that have been withdrawn will be indicated by the symbol ‘WD’.

Under Criteria Observation
The rating has been placed “Under Criteria Observation” upon the publication of new or revised criteria that is applicable to the rating, where the new or revised criteria has yet to be applied to the rating and where the criteria could result in a rating change when applied but the impact is not yet known.

Under Criteria Observation (UCO) does not satisfy Fitch’s minimum annual credit review requirement. Placing a rating on UCO signals the beginning of a period during which the new or revised criteria will be applied. Placing a rating on UCO does not affect the level of the rating or its existing Outlook or Watch status. Where there is heightened probability of the application of the new or revised criteria resulting in a rating change in a particular direction, a Rating Watch may be considered more appropriate than the UCO to reflect the impact of the new or revised criteria. The status of UCO will be resolved after the application of the new or revised criteria which must be completed within six months from the publication date of the new or revised criteria.

UCO is only applicable to private and public international credit ratings. It is not applicable to National Ratings, Non-Credit Scale Ratings, Credit Opinions or Rating Assessment Services. It is not applicable to ratings status Paid in Full, Matured, Withdrawn or Not Rated.

Criteria Observation Removed
A Criteria Observation Removed rating action will remove UCO status and will be taken where further review has determined that the rating would not change upon application of the new or revised criteria and no other rating action has occurred to previously resolve the UCO. It is required that UCO be removed through credit rating actions — such as affirm, upgrade or downgrade — being taken in the period six months from the date of placing the rating on UCO. In some situations, the full rating portfolio will not be reviewed within the six month period yet it can be determined based on considering the changes in the new or revised criteria that the ratings will not be impacted. In these situations the Criteria Observation Removed is appropriate. This action does not affect the rating level or the existing Outlook or Watch status. Criteria Observation Removed does not satisfy Fitch’s minimum annual credit review requirement.

Recovery Rating Revision
Change to an issue’s Recovery Rating.

Rating Modifier Actions:
Modifiers include Rating Outlooks and Rating Watches.

Outlook Revision
Outlook revisions (e.g. to Rating Outlook Stable from Rating Outlook Positive) are used to indicate changes in the ratings trend. In structured finance transactions, the Outlook may be revised independently of a full review of the underlying rating.

An Outlook revision may also be used when a series of potential event risks has been identified, none of which individually warrants a Rating Watch but which cumulatively indicate heightened probability of a rating change over the following one to two years.

A revision to the Outlook may also be appropriate where a specific event has been identified that could lead to a change in ratings, but where the conditions and implications of that event are largely unclear and subject to high execution risk over a one- to two-year period.

**Rating Watch Maintained***
The issue or issuer has been reviewed and remains on active Rating Watch status.

**Rating Watch On***
The issue or issuer has been placed on active Rating Watch status.

**Rating Watch Revision***
Rating Watch status has changed.

**Rating Watch Resolved***:
The issue or issuer has been reviewed and ceases to be on active Rating Watch. This rating action is typically used in conjunction with another action on the rating and the Outlook, such as affirmation, downgrade or upgrade or Outlook affirmation or revision.

**Support Floor Rating Revision**
Applicable only to Support ratings related to Financial Institutions, which are amended only with this action.

**Under Review**
Applicable to ratings that may undergo a change in scale not related to changes in fundamental credit quality. Final action will be “Revision Rating”.

*A rating action must be recorded for each rating in a required cycle to be considered compliant with Fitch policy concerning aging of ratings. Not all Ratings or Data Actions, or changes in rating modifiers, will meet this requirement. Actions that meet this requirement are noted with an * in the definitions.*
