OBJECTIVE
Long-term capital appreciation.

OUR INVESTMENT STRATEGY
Normally, the Fund will invest at least 80% of its net assets in equity securities or depository receipts of small capitalization companies domiciled outside of the U.S., including in emerging market countries. We consider small capitalization companies to be companies with market capitalizations within the range of those companies included in the MSCI ACWI ex US Small Cap Index at the time of purchase. Investments in companies that move above or below the capitalization range of the MSCI ACWI ex US Small Cap Index may continue to be held by the Fund in the WCM's sole discretion.

OUR INVESTMENT PROCESS
We use a bottom-up approach that seeks to identify companies with attractive fundamentals, such as long-term growth in revenue, earnings, and show a high probability for superior future growth. We look for companies that are industry leaders with:
- Sustainable competitive advantages
- Corporate culture emphasizing strong, quality and experienced management
- Low or no debt
- Attractive relative valuation

OUR PHILOSOPHY
WCM believes that attractive returns can only be achieved by structuring portfolios distinct from the market indices. As a result, our portfolio typically holds around 50-70 companies, concentrating on our best ideas. Our focus is on industry-leading international small cap organizations, led by visionary management teams with sound business strategies. These companies often dominate their industry, and it is our belief that they will continue that domination well into the future. Thus, when selecting equity investments, our targeted time horizon is 3-4 years.

Natixis Distributors L.P., (fund distributor) and WCM Investment Management are affiliated. Natixis Distribution, L.P. is a limited purpose broker-dealer and the distributor of various registered investment companies for which advisory services are provided by affiliates of Natixis Investment Managers. Foreign and emerging market securities may be subject to greater political, economic, environmental, credit, currency and information risks. Foreign securities may be subject to higher volatility than US securities, due to varying degrees of regulation and limited liquidity. These risks are magnified in emerging markets. Equity securities are volatile and can decline significantly in response to broad market and economic conditions. Currency exchange rates between the US dollar and foreign currencies may cause the value of the Fund’s investments to decline. Growth stocks may be more sensitive to market conditions than other equities, as their prices more closely reflect future expectations. Concentrated investments in a particular region, sector, or industry may be more vulnerable to adverse changes in that industry or the market as a whole.
